## NOTES TO THE FINANCIAL STATEMENTS

- 31 December 1999
- 1. Principal Activities and Operations

All group companies are incorporated in Jamaica and their principal activities are the manufacture and distribution of consumer products.

During 1995, three of the company's subsidiaries ceased operations and terminated the employment of their workforces. Certain of the companies also sold trademarks, a significant portion of their inventories, and plant and machinery to Colgate Palmolive Company during 1996.

In connection with the above, these companies also signed a Non-Competitive Agreement for a period of five years from 17 January 1996, which prohibits the companies and their affiliates from engaging in the manufacture of products which would compete with those manufactured by the buyer or its affiliates.

All amounts in these financial statements are stated in Jamaican dollars.

- 2. Significant Accounting Policies
  - (a) Accounting convention

These financial statements have been prepared under the historical cost convention as modified by the revaluation of certain fixed assets.

(b) Use of estimates

The preparation of financial statements in conformity with Jamaican generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period, Actual results could differ from those estimates.

#### (c) Consolidation

The group financial statements incorporate the financial statements of the company, its subsidiaries and associated company made up to 31 December 1999 (note 3(a)).

#### (d) Associated company

The equity method of accounting is used to account for the associated company. Under this method, the group's share of profit or losses of the associated company is included in the group profit and loss account and any tax attributable to the share of profits is included in the group's tax charge. In the group balance sheet, the investment is shown at cost or written down value plus the group's share of reserves arising since the acquisition of the investments.

# (e) Fixed assets and depreciation

Fixed assets are stated at cost or valuation. The cost or valuation of fixed assets, with the exception of land, is written off on the straight line basis over the expected useful lives of the assets. The expected average useful lives are as follows:

Buildings - 40 - 50 years
Plant, equipment and furniture - 5 - 40 years
Motorvehicles - 3 years

#### (f) Inventories

Inventories are stated at the lower of cost and net realisable value. The cost of finished goods includes cost of raw materials used, direct labour and an appropriate proportion of overhead expenses.

### (g) Rates of exchange

Assets and liabilities denominated in foreign currencies are translated at the rates of exchange prevailing at balance sheet date. Gains or losses are credited or charged to the profit and loss account.

#### (h) Fair value of financial instruments

The amounts included in the financial statements for cash, receivables, payables and accrued liabilities reflect their appropriate fair values because of the short term nature of these instruments.

The fair values of the group's other financial instruments are discussed in Note 22.

#### (i) Deferred taxation

Deferred taxation is provided for only to the extent that there is reasonable probability that the liabilities will arise in the foreseeable future.

#### (j) Leases

The present value of the minimum lease payments under finance leases is capitalised as fixed assets and a corresponding obligation to the lessor recorded.

Lease payments are treated as consisting of principal and finance charges. The finance charges are recorded so as to give a constant periodic rate of return on the outstanding obligations.

# (k) Borrowing costs

Borrowing costs incurred in relation to expenditure on assets not yet in use are capitalised.

## (1) Capital reserve on consolidation

Capital reserve arising on consolidation is amortised over its economic life, estimated by the Directors to be ten years.

#### (m) Investments

Investments are stated as follows:

- (i) Quoted equities at the lower of cost and market value
- (ii) Government of Jamaica and units in Money Market Unit Trusts at lower of cost or market value.
- (iii) Investments in associated companies are accounted for using the equity method of accounting (note 2(d)).
- (n) Comparative information

Where necessary, comparative figures have been reclassified to conform with changes in presentation in the current year. In particular, the comparatives have been adjusted or extended to take into account the requirements of the following new Accounting Standards:

- (i) JSSAP 3.29 Financial Instruments: Disclosure and Presentation
- (ii) JSSAP 3.30 Presentation of Financial Statements

|                                     | 1999              | 1998              |

- (a) The tax charge is disproportionate to the reported results in both years, mainly as a result of investments in tax free government instruments.
- (b) Subject to agreement with the Commissioner of Income Tax, losses available for offset against future profits of certain subsidiaries amount to approximately \$2,718,000 (1998 \$5,820,000).

# 9. Earnings per Share

The calculation of earnings per share/stock is based on the net profit attributable to shareholders and 183,608,000 ordinary shares in issue after the bonus issue during the year (Note 17). The earnings per share for the previous year have been adjusted accordingly.

As at 31 December 1993, fixed assets excluding furniture and fixtures and motor vehicles were revalued by D. C. Tavares and Finson Company Limited (Appraisers/Valuators) and Baird and Henderson Valuators Limited as follows:

- (a) Land at fair market value.
- (b) Buildings, plant and machinery at replacement cost.

The resultant increments arising from the revaluations of fixed assets have been credited to capital reserve (Note 18).

Certain buildings are situated on land that has been leased. The unexpired portion of the lease is 61 years.

As at 31 December 1999, motor vehicles with net book value of approximately \$ 4,867,000 (1998 \$4,610,000), acquired under finance leases, have been included in the balance noted above.

As indicated in note 1, three subsidiaries ceased manufacturing operations during 1995. Under the circumstances, related assets of these entities were adjusted to realisable values. Such values in the case of buildings, have been estimated by the Directors to be \$ 26,418,000, at 31 December 1995, being the estimated value at which they will be

utilised as warehouses. One of these buildings, with a net carrying value of \$ 5,997,000, is not currently used in the group's operations; accordingly, no depreciation has been charged in respect of this item.

The net reductions arising from the restatement of fixed assets have been charged to capital reserve (Note 18) and to operations where available reserves have been exceeded.
