## Notes to the Financial Statements

- 31 December 2000
- 1. Identification and Principal Activities

The company is incorporated and resident in Jamaica. The group's primary activities are the operation of a commercial television station and radio stations.

The group financial statements present the results of operations and financial position of the company and its wholly owned subsidiaries, Multi-Media Jamaica Limited (formerly Reditech Services Limited) and Television Jamaica Limited. The subsidiaries are incorporated in Jamaica.

These financial statements are presented in Jamaican dollars.

- 2. Summary of Accounting Policies
  - (a) Basis of preparation

The financial statements have been prepared in accordance with and comply with Jamaican Accounting Standards and have been prepared under the historical cost convention as modified by the revaluation of certain fixed assets.

(b) Use of estimates

The preparation of financial statements in conformity with Jamaican generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and

liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

(c) Revenue recognition

Sales are recognised upon delivery of products. Interest income is recognised as it accrues unless collectibility is in doubt.

(d) Depreciation

Depreciation is calculated on a straight line basis at rates which will write off the carrying value of the assets over the period of their expected useful lives. Annual rates are as follows:

| Freehold buildings<br>Furniture | 2.5%<br>10%  |
|---------------------------------|--|
| Office machinery                | 15% for the first six years<br>10% in the seventh year |
| Motor vehicles                  | 25%  |
| Station equipment               | 15% for the first six years                            |
|                                 | 10% for the seventh year                               |
| Equipment on or for rental      | 15% for the first six years                            |
|                                 | 10% for the seventh year                               |
| Computer equipment              | 33 1/3%  |

(e) Inventories

Inventories are stated at the lower of average cost and net realisable value, cost being determined on a weighted average basis.

(f) Cash and cash equivalents

For the purpose of the cash flow statement, cash and cash equivalents comprise cash and deposits at bank and in hand.

(g) Deferred taxation

Deferred taxation is not recognised in these financial statements because the timing differences are not expected to reverse in the foreseeable future.

#### (h) Foreign currencies

Foreign currency balances outstanding at the balance sheet date are translated at rates of exchange ruling on that date. Transactions in foreign currencies are converted at the rate of exchange ruling on the dates of those transactions. Gains and losses arising from fluctuations in exchange rates are included in the profit and loss account.

(i) Financial Instruments

Financial instruments carried on the balance sheet include cash and bank balances, deferred expenditure,

investments, long term receivables, receivables, payables and finance leases.

The fair values of the group's financial instruments are discussed in Note 27.

(j) Leases

Leases of fixed assets where the company assumes substantially all the benefits and risks of ownership

are classified as finance leases. Finance leases are capitalised and recorded as assets and liabilities

at the estimated present value of the underlying lease payments. Each lease payment is allocated between

the reduction of the liability and finance charges. The finance charges are allocated to the periods during the lease term so as to achieve a constant rate on the remaining balance outstanding. The finance

charges are charged to the profit and loss account over the lease periods. The fixed assets acquired under

finance lease contracts are depreciated over the useful lives of the assets.

(k) Comparative information

Where necessary, comparative figures have been reclassified to conform with changes in presentation in the

current year.
