

FIRST JAMAICA INVESTMENTS LIMITED
and its subsidiaries

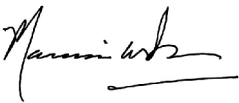

30 June 2006

The Group's pre-tax profits from its own continuing operations rose from \$208 million for the six (6) months to 30 June 2005 to \$284 million for the six (6) months to 30 June 2006 - an increase of over \$76 million or 37%. These results were partly attributable to the continued impressive performance of our property company, whose revenues increased by some 22% to \$350 million (2005: \$287 million), with occupancies averaging over 95%. We are confident that our rental income will continue to grow, whilst we augment such growth by expanding in the area of new property development, a field in which we are actively seeking opportunities.

The other major contributor to the Group's increase in pre-tax profits from its own operations was that of First Jamaica Investments Limited itself, where increased activity in the investment field yielded an increase in pre-tax profits of over 55%. Offsetting these significant increases in income was an increase in the Group's effective rate of taxation, coupled with a significant restatement of 2005 profits on the part of our associated companies (Note 2). These adverse factors had the effect of reflecting an overall decrease in Profit from Continuing Operations down to \$543 million from \$584 million in 2005.

For the quarter to 30 June 2006, the Group's pre-tax profits from its own continuing operations also increased significantly to \$135 million - up by 28% over the corresponding 3-month period of 2005. Again, this quite satisfactory result was more than offset, not only by a sharp increase in our effective rate of taxation but also by the restatement in 2005 profits in our share of the results of associated companies (Note 2). The net effect of this was a 26% decline to \$287 million (2005: \$387 million) in the quarter's Profit from Continuing Operations.

The unaudited consolidated balance sheet records stockholders' funds at \$8,062 million (2005: \$7,338 million), an increase of 10%. If the market value of Life of Jamaica stock units as at 30 June 2006 were to be used, Stockholders' Funds would increase to \$10,544 million or \$34.88 per stock unit.

Operating profits	128,448
Taxation	<u>(29,697)</u>
Profit from discontinued operations	<u>98,751</u>

Note 2

Restatements

An associated company has made adjustments to certain intangibles, which were applied retroactively from the date of acquisition. A gain on sale of shares to the associated company's ultimate parent, previously recognized in the fourth quarter of 2005, has now been reflected in the second quarter of 2005, the period in which the shares were actually transferred. The company's gain on discontinued operations has been adjusted for related expenses under-provided in the first half of 2005. The effects of these changes to the prior year financial statements are as follows:

	Previously Stated	Adjustments	Restated
	\$'000	\$'000	\$'000
Share of results of associated companies (net of taxation)	308,388	92,469	400,857
Gain on disposal of discontinued operations	1,687,658	(95,777)	1,591,881
