Notice of Annual General Meeting

Notice is hereby given that the thirty-ninth Annual General Meeting of First Jamaica Investments Limited will be held at the Terra Nova All-Suite Hotel, 17 Waterloo Road, Kingston 10, on Thursday, June 23, 2011, at 2:00 p.m. for the following purposes:

1. To receive the Audited Financial Statements for the year ended December 31, 2010, and the Reports of the Directors and Auditors thereon.

To consider and (if thought fit) pass the following Resolution: -

“THAT the Audited Accounts for the year ended December 31, 2010, together with the Reports of the Directors and the Auditors thereon, be and are hereby adopted.”

2. Dividend

To declare the interim dividends of 1.30 cents paid during the year as the final dividend for the year ended December 31, 2010.

To consider and (if thought fit) pass the following Resolution: -

“THAT the interim dividends of \$0.30 cents and special dividend of \$0.10 cents paid March 26, 2010, \$0.30 cents paid June 18, 2010, \$0.30 cents paid September 17, 2010 and \$0.30 paid December 10, 2010, making a total of \$1.30 cents, be declared as the final dividend for the year ended 31 December 2010.”

3. To elect Directors

(i) The Directors retiring by Rotation pursuant to Article 98 of the Articles of Incorporation are Messrs. Paul A. B. Facey and Donovan H. Perkins, who being eligible offer themselves for re-election.

To consider and (if thought fit) pass the following Resolution: -

(a) “THAT the retiring Director Mr. Paul A. B. Facey be re-elected a Director of the Company.”

(b) “THAT the retiring Director Mr. Donovan H. Perkins be re-elected a Director of the Company.”

(ii) Pursuant to Article 96 of the Articles of Incorporation Mr. Ian Parsard and Mrs. Kathleen A. J. Moss were appointed to the

Board of Directors since the last Annual General Meeting, and will retire at this Annual General Meeting. Being eligible they offer themselves for election.

To consider and (if thought fit) pass the following Resolution: -

(c) “THAT the retiring Director Mr. Ian Parsard be elected a Director of the Company.”

(d) “THAT the retiring Director Mrs. Kathleen A. J. Moss be elected a Director of the Company.”

4. To fix the remuneration of the Directors.

To consider and (if thought fit) pass the following Resolution: -

“THAT the amount of \$4,751,000 shown in the Accounts of the Company for the year ended December 31, 2010, for Non-Executive Directors’ fees be and is hereby approved.”

5. To fix the remuneration of the Auditors or to determine the manner in which such remuneration is to be fixed.

To consider and (if thought fit) pass the following Resolution: -

“THAT the Directors be and are hereby authorized to fix the remuneration of the Auditors, PricewaterhouseCoopers, who have signified their willingness to continue in office.”

6. To consider any other business of an Annual General Meeting.

By order of the Board

Gene M. Douglas
Secretary
Kingston, Jamaica
18 March 2011

A member entitled to attend and vote at the above-mentioned meeting is entitled to appoint one or more proxies to attend and on a poll to vote instead of him. Such proxy must be lodged at the Company’s Registered Office not less than forty-eight hours before the meeting. A proxy need not be a member. A suitable form of proxy is enclosed.

Report of the Directors

The Directors are pleased to present their Report and the Audited Accounts for the year ended 31 December 2010.

	\$'000
The Group profit before taxation was	1,829,227
Taxation amounted to	(166,247)
Profit after tax	1,662,980
Non-controlling interests in results of subsidiaries	(20,847)
Net profit attributable to owners of the parent	1,642,133
Dividends paid	(392,964)
Retained earnings brought forward	5,908,268
Transfers to reserves	(300,352)
Retained earnings carried forward	6,857,085

DIVIDENDS

The Directors have recommended that the interim dividends paid to stockholders on March 26, 2010, June 18, 2010, September 17, 2010 and December 10, 2010 be declared as the final dividend for the year ended 31 December 2010.

DIRECTORS

The Directors retiring by rotation pursuant to Article 98 of the Articles of Incorporation are Messrs. Paul A. B. Facey and Donovan H. Perkins, who being eligible offer themselves for re-election.

Pursuant to Article 96 of the Articles of Incorporation, Mr. Ian Parsard and Mrs. Kathleen A. J. Moss who were appointed since the last Board Meeting will retire at this Annual General Meeting and being eligible offer themselves for election.

During the year, Mr. Roy Collister a Director of the Board since 1999 died. He was the chairman of the Audit and Human Resources and Compensation Committee and a member of the Investment Committee.

AUDITORS

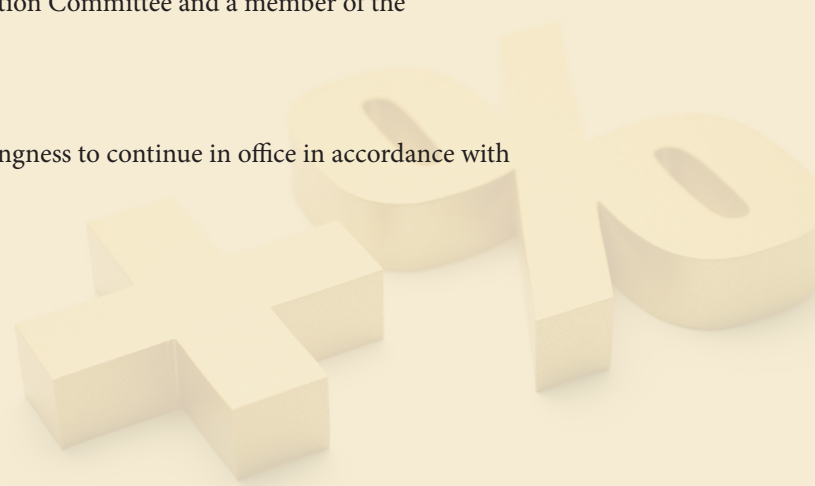

PricewaterhouseCoopers have expressed their willingness to continue in office in accordance with Sections 153 and 154 of the Companies Act 2004.

Statement from the Chairman & the Chief Executive Officer

On behalf of the Directors, we are pleased to present the Annual Report of First Jamaica Investments Limited (FJI) and its subsidiaries for the year ended 31 December 2010.

Net profit attributable to equity holders was \$1,642 million for 2010, compared to \$1,918 million in the previous year, a 14% decline. Earnings per stock unit for 2010 were \$5.43 compared to the 2009 level of \$6.35.

Stockholders' equity increased by 16% to \$13.5 billion (2009: \$11.6 billion), which equates to a book value per stock unit of \$44.61 as at 31 December 2010 (31 December 2009: \$38.36). Total assets as at

31 December 2010 amounted to \$14.6 billion, an increase of 18% over 2009.

Property

Property investments continue to perform well for the group with property income increasing by \$75 million, 6%, to \$1,256 million, including a 9% increase in rental income to \$956 million and a \$300 million property revaluation gain. Investment properties grew in value by 9% to \$3,894

million as at 31 December 2010 (2009: \$3,590 million), driven principally by revaluation gains. Whilst this increase in property value reflects, in part, the higher net rentals achieved during the year, the carrying values are still significantly below replacement and development costs. Occupancies for the year remained stable at an average rate of 98%. Contribution to operating profit decreased by 5% to \$589 million from \$618 million in 2009.

Stephen B. Facey,
Chief Executive Officer

Investments

Our Investment portfolio was adversely affected by the lower interest rates and the revaluation of the Jamaican Dollar. Investment income decreased by 63% from the 2009 level to \$137 million. Our investment management segment posted an operating profit of \$129 million for the year, a decrease of \$236 million compared to last year's profit of \$365 million. In 2009, we recorded foreign exchange gains of \$115 million, while the recent strengthening of the Jamaican dollar resulted in \$49 million of recorded foreign exchange losses in 2010, a swing of \$164 million. Additionally, interest income of \$136 million was \$43 million below the 2009 level, as a result of reduced interest rates both locally and overseas. Finally, we recorded impairment losses of \$24 million compared to \$9 million in 2009. Net unrealized gains in

our portfolio of available for sale securities, which are accounted for through comprehensive income and stockholders' equity, amounted to \$82 million for the year compared to \$101 million last year.

Associated Company

Net profit attributable to shareholders of Sagicor Life Jamaica Limited (SLJ) amounted to \$4,671 million, an increase of 6% over the \$4,390 million posted in 2009. Basic earnings per share for the current year were \$1.24 compared to \$1.17 for the previous year, representing a return on average equity of 21%. During the year Sagicor paid out to its shareholders \$1,617 million or \$0.43 per share in dividends. Shareholder's equity as at 31 December 2010 was \$25,203 million, compared to \$19,863 million for the previous year.

Associated Company, Sagicor Life Jamaica Limited (SLJ) achieved an increase of 6% in Net Profit Attributable to Shareholders.

Sagicor's Net Profit
Attributable to Stockholders
(J\$ MILLIONS)

**Statement from the
Chairman & the Chief Executive Officer (Cont'd)**

We continue to believe that opportunities will be prevalent in 2011 and beyond both in Jamaica and overseas. We will focus on taking advantage of these opportunities as appropriate when they present themselves.

This substantial increase of 27% was due partly to the growth in retained earnings, and partly to the improved fair values of securities held as available for sale, for which the after-tax unrealized gains are reflected as a component of equity. Pan Caribbean Financial Services Limited (PCFS), SLJ's subsidiary, had another creditable year with net income improving by \$46 million to end the year at \$1,524 million, an increase of 3%, despite a lower interest rate environment and unrealized foreign exchange losses

in 2010. PCFS's net interest income advanced 5% to \$2,746 million, up \$126 million over 2009, influenced primarily by balance sheet growth.

Dividends

During 2010 the Directors authorized the payment of dividends totaling \$1.30 (including \$0.10 special dividend). This represents a payout of approximately 23.9% of 2010 profits.

Outlook

Through 2010 the Jamaican economy contracted even as the global downturn softened. However, positives to take from 2010 were the most favourable leading economic and social indicators in over 25 years, led by lower interest rates, better fiscal management, and lower crime rate. We look forward to our country growing out of its longstanding difficulties.

We will continue to manage our risks prudently, and keep operating expenses in line with revenues. We continue to believe that opportunities will be prevalent in 2011 and beyond both in Jamaica and overseas. We will focus on taking advantage of these opportunities as appropriate when they present themselves.

Our success in 2010 would not have been possible without the support of our respected clients and the dedication, commitment and efforts of our staff and fellow Directors.

Maurice W. Facey
Chairman

Stephen B. Facey
Chief Executive Officer

Management Discussion and Analysis

First Jamaica Investments Limited is an 83% owned subsidiary of Pan-Jamaican Investment Trust Limited involved in investment and property management.

The objective of the Management Discussion and Analysis is to provide stockholders with information to assist in their evaluation and analysis of the company's performance during the year 2010. It is the responsibility of management to ensure the integrity of the information presented in this report. The report conforms to and should be used in conjunction with the audited financial statements.

Economic Overview

The year 2010 saw the successful implementation of the Jamaica Debt Exchange programme (JDX) as well as the signing of a standby agreement between the Government of Jamaica and the International Monetary Fund (IMF). Interest rates declined as a result of the JDX and continued to trend downwards during the year, with an average 90 days Treasury Bill rate of 8.95% (2009 - 18.6%). The cost of borrowing remained high during the year, as lending institutions were slow in responding to the call for reduced rates. The Government had notable success in stabilizing the exchange rate, with the Jamaican Dollar (J\$) appreciating by 4% against the US Dollar (US\$), a turnaround from the 11% depreciation for 2009.

Treasury Bill 90 days average yield

Management Discussion and Analysis (Cont'd)

Annual inflation as measured by the Consumer Price Index was 11.7% (2009 – 10.2%) a small increase over the prior year. The annual average unemployment rate of 12.4% was 6% above that of 2009 - 11.7%. This affected mainly our retail property holdings as those tenants rely on the ability of the consumers to purchase their goods and services. Despite this we maintained an average of 98% occupancy level of our retail properties as well as our commercial properties for 2010.

Exchange rate J\$ to the US\$

Financial Overview

The year 2010 was challenging yet successful for the group. Investment income decreased \$232 million, 63%, as a result of both lower yields on investment securities caused principally by the JDX, in which high yielding interest rate (average 18%) Government of Jamaica (GOJ) securities were exchanged for lower interest rate (average 12%) securities, and an appreciation of the J\$ by 4% against the US\$, which hurt reported earnings as the group has net foreign currency denominated (principally US\$) assets of \$1.7 billion (2009 - \$1.6 billion), resulting in foreign exchange losses of \$49.3 million (2009 – net gains of \$115.2 million). Property income rose \$75 million, which more than offset a 10% increase in direct property costs impacted principally

by higher energy costs resulting from a rebound in world oil prices. Operating expenses net of direct cost of property management increased by \$43 million, or 17% including a \$17 million increase in pension expense resulting from a lower interest rate outlook. Share of results of our associated company Sagicor Life Jamaica Limited (SLJ) fell marginally by 4%. Overall, our net profit attributable to equity holders declined by 14.4% compared to 2009, with earnings per stock unit falling to \$5.43 (2009 - \$6.35), a return on average equity of 13% (2009 – 18%). Despite this, dividends per stock unit were 18% greater than 2009, with a payout ratio of 24%, an increase of 38% over prior year.

Average return on property value (%)	21.7	22.7	(4)
Average yield on investments (%)	5.2	16.4	(68)

Management Discussion and Analysis (Cont'd)

Income

Total income declined by 11% to \$1.5 billion (2009 - \$1.6 billion), due to a fall in investment and other income. Property income increased 6% over 2009.

Property Income

Property income, which consists of rental income and fair value gains on property valuation, increased by 6%. An increase in rental income of 9% was partly offset by a reduction in revaluation gains of 1.5% to \$300 million. This reduction is attributable to slow growth in the level of projected future rental income, as well as likely inflationary pressures on our cost base. Average return on property value (property income net of direct expenses as a percentage of average property values) was relatively flat, 22% (2009 – 23%). Average occupancy level for the year was 98% (2009 – 98.7%) a marginal reduction over 2009.

Investment Income

Investment income reduced by 63% compared to 2009 due mainly to:

- Reduction in interest rates and yields compared to prior year, primarily as a result of the JDX.
- Appreciation of the J\$ against the US\$ compared to depreciation in 2009.
- Impairment charges against investment securities of \$24 million (2009 – \$9 million).

Interest earned was \$136 million, 24% below the \$179 million of 2009 with an average yield of 7.6% (2009 – 12.5%). With a combined 54% of investment assets in GOJ and repurchase agreements, interest income was significantly affected by the decline in interest rates during the year.

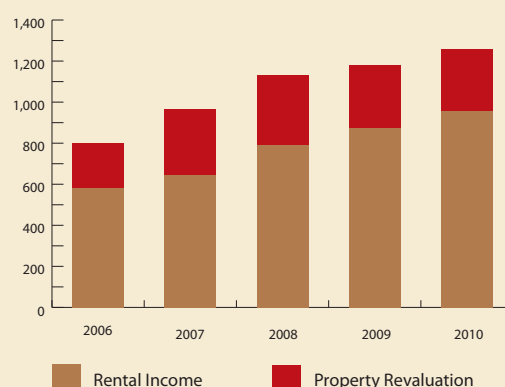

The 4% appreciation of the J\$ to the US\$ resulted in net foreign exchange losses of \$49 million compared to net gains of \$115 million for 2009, a \$164 million reduction in investment income. The group holds approximately 69% of its investment securities in US\$ denominated instruments.

Our equity portfolio continues to produce cash returns with dividend income of \$39 million, 12% more than 2009 - \$35 million.

Total Income (millions)

Property Income (millions)

Investment Income (millions)

Management Discussion and Analysis (Cont'd)

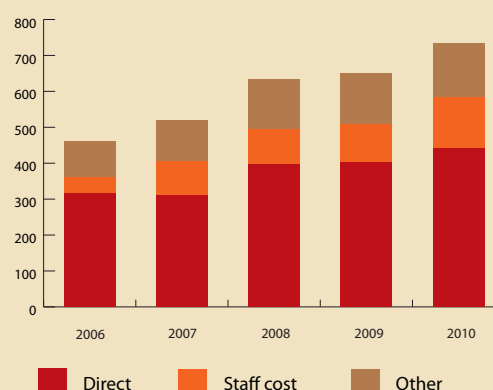

Operating Expenses

Operating expenses comprising direct property expenses and administrative expenses increased by 13% to \$738 million (2009 - \$653 million). The efficiency ratio deteriorated by 27% to 50.7% (2009 - 39.90%) due to increased expenses and reduced total income.

Direct property expenses increased by 10% to \$443 million (2009 - \$401 million) driven by inflationary adjustments as well as increased electricity costs due to rising oil prices on the world market. Average electricity rate per kilowatt was \$22.11 (2009 - \$18.04) representing a 22.6% increase over 2009.

Administrative expenses for 2010 increased by 17% with staff costs increasing by 31%. The 31% increase in staff costs was significantly influenced by a \$17 million increase in pension expense resulting from a lower interest rate outlook. Overhead levels are currently under review in an effort to contain increases below inflation.

Operating Expenses (In Millions)

Quarterly Results

Net Profit attributable to owner of the parent for the 4th quarter was an improvement over the 3rd quarter of 2010. Results for the quarters in 2010 were affected by lower interest rates resulting principally from the JDX, as well as foreign exchange losses versus gains in 2009. Dividends paid per quarter to equity holders in

2010 were an improvement over amounts paid in 2009 (except for the 4th quarter of 2009 which included a special dividend of \$0.10 per stock unit) despite lower profits. The stock price moved to \$36.00 at 31 December 2010 from \$26.50 at 31 December 2009, a 36% increase.

Management Discussion and Analysis (Cont'd)

Investment Assets 2010

Investment Assets 2009

Investment Assets 2010

Investment Assets 2009

Investment Assets

The group continues to hold a large portion of its portfolio in repurchase agreements and deposits, to maintain liquidity in an environment of uncertainty and in order to capitalize on potential opportunities. Mix of securities by asset class was broadly consistent with 2009.

In 2010 assets denominated in foreign currency were 69% of the portfolio compared to 65% in 2009. The group maintains its foreign currency denominated assets to ensure that loan liabilities denominated in foreign currency are adequately covered and to diversify the group's asset base.

healthy liquid asset base to ensure its minimum capital requirements were met at all times and to retain cash both for reinvestment and as a hedge in a period of great uncertainty. During the year an additional 12.8 million stock units in SLJ were acquired, increasing our shareholding to 24.78% (2009 – 24.46%).

Investment in Associated Companies

Our investment in associated companies, represented principally by Sagikor Life Jamaica Limited (SLJ) continues to have a significant positive impact on our profit. SLJ's net profit attributable to equity holders of \$4.67 billion was 6% more than prior year with our share of profit being \$1.1 billion. Dividends received of \$397 million (2009 - \$524 million) were 24% below prior year, as SLJ sought to maintain a

Investment in Associated Companies		
	2010	2009
\$ million	\$'000	\$'000
Investment in associated companies	7,149	5,755
Share of net profit	1,147	1,189
Dividends received	397	524

Loan Liabilities

During the year the group drew down US\$5 million of its US\$17.5 million loan facility with the International Finance Corporation (IFC). The loan is being used partly to finance the generator replacement project at the Pan Caribbean Building complex in New Kingston. Gearing ratio (loan and lease financing as a percentage of stockholders equity) increased marginally to 3.8% from 2.1%, well within conservative levels.

Management Discussion and Analysis (Cont'd)

Stockholders' Equity

Stockholders' equity increased to \$13 billion in 2010, 16% more than 2009. The increase was enhanced by gains on available for sale investment securities of \$81.6 million (2009 – \$101) and reserves movement of \$556 million (2009 – \$372) relating to SLJ. Book value per stock unit at year end 2010 was \$44.61 (2009 - \$38.36).

Stockholders' equity

Capital Management and Resources

The Board of Directors has ultimate responsibility for capital management. The Board of Directors monitors the group's return on capital and approves the level of dividends to ordinary stockholders. During the year a total of \$392 million (2009-\$332) was paid out in dividends.

The group has available an additional US\$12.5 million loan financing from the International Finance Corporation (IFC) with a tenor of 10 years and a 2 year moratorium on principal. Management believes that additional financing could be acquired at commercial or better rates should the need arise for the acquisition of future investments.

Risk Management

The Investment and Risk Management Committee, a sub-committee of the Board of Directors, has the responsibility for managing and monitoring the risk associated with financial assets and liabilities.

The Investment and Risk Management Committee:

- Monitors the adequacy and effectiveness of the Group's system of risk management

- Ensures that the risk associated with the asset mix is effectively balanced
- Recommends investment opportunities to the Board of Directors for approval.

The Investment and Risk Management Committee consists of Non-Executive and Executive Directors of the group duly appointed by the Board. The Board also appoints the Chairman and Secretary of the Investment and Risk Management Committee.

The Committee met 11 times during the year. The committee chairman is The Hon. Maurice W. Facey.

Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and system or from external events. The group mitigates operational risk through the segregation of duties, implementation and monitoring of internal controls procedures as well as providing staff with the required training to adequately perform their duties. The group also ensures that assets are adequately insured.

Market risk

The group is exposed to market risk on both its financial assets and financial liabilities. Market risk is the risk that fair value or cash flows of the group's financial instruments will fluctuate due to changes in interest rates, market prices and foreign exchange rates. The investment department manages market risk by monitoring closely the local and international markets.

Interest risk

Interest rate risk is the risk of loss due to the volatility of interest rate on financial instruments. Through the guidance of the Investment and Risk Management Committee, the group manages its interest rate risk by maintaining an appropriate mix of fixed and variable rate instruments.

Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in exchange rates. The group manages its currency risk by ensuring that financial assets denominated in foreign currencies adequately match financial liabilities denominated in foreign currencies and that the net exposure is kept to an acceptable level.

• Price risk

Price risk is the risk of loss due to changes in trading prices, whether caused by factors specific to individual instruments or its issuer or factors affecting all instruments in the market. The investment department closely monitors prices of financial instruments and where appropriate will trade underperforming instruments to reduce the impact of any adverse price fluctuations.

Liquidity Risk

Liquidity risk is the risk that the group is unable to meet its financial obligations when they fall due. Through the investment department, the group manages and maintains an adequate level of cash and marketable securities that can be liquidated, both to be able meet obligations as they fall due and to protect against any unforeseen interruption to cash flow.

Audit Committee

The Audit Committee, a sub-committee of the Board of Directors, has responsibility for overseeing the financial reporting process to ensure balance, transparency and integrity of the published financial information. The committee also monitors the effectiveness of all

internal financial control systems in accordance with international standards, liaising with the external auditors. The committee consists principally of non-executive directors of the Board, which also appoints the Chairman and Secretary. The Board Chairman cannot be a member of the Committee.

The Audit Committee has clearly defined terms of reference, procedures, responsibilities and powers, which are principally to:

- Monitor the adequacy and effectiveness of the group’s system of control, the business risk assurance function and the external auditors
- Review the group’s annual and interim financial statements and related policies and assumptions and any accompanying reports or related policies and statements.
- Develop and implement policy on the engagement of the external auditors to supply non-audit services.

The committee is chaired by Mrs. Kathleen Moss and met 4 times during the year.

Corporate Governance

The Board of Directors during the year appointed a Governance Committee as a sub-committee to the Board. The Governance Committee has responsibility for promoting good corporate governance practices and will provide the assistance to the Board of Directors in establishing and monitoring the principles of good governance to preserve shareholders value.

Non-Directors*

Board of Directors

Hon. Maurice W. Facey, OJ., JP.

Hon. Maurice Facey has served as Chairman of First Jamaica Investments Limited since 2004. A highly respected pioneer in real estate development, he has long been credited with being a true catalyst for change, and he is best known as the Chairman of Pan-Jamaican Investment Trust Limited. The group continues to benefit and thrive under his leadership and entrepreneurial spirit. Mr. Facey is a founding Director of Jamaica Property Company, a main subsidiary of First Jamaica. He has served on several Boards over the years and currently is the Chairman of Kingston Restoration Company.

Stephen B. Facey, M. Arch

As CEO of First Jamaica Investments Limited, Mr. Stephen Facey brings over 25 years of business experience to the Board. An architect by training with substantial experience in real estate, he is currently the Managing Director of Jamaica Property Company Limited, an established property management company. He currently serves on the Boards of Pan-Jamaican Investment Trust Limited, Sagicor Life Jamaica Limited, Hardware and Lumber Limited, Kingston Restoration Company, The New Kingston Civic Association and Kingston City Centre Improvement Company.

W.G. Bryan Ewen, FCA

Mr. Bryan Ewen, a chartered accountant by training, is a past CEO of First Jamaica Investments Limited and past Vice President of Finance of Pan-Jamaican Investment Trust Limited. Over the decades the group has benefited tremendously from his broad knowledge and experience in financial management, accounting and banking. Having served on several other boards, he currently sits on the Boards of Pan-Jamaican Investment Trust Limited and Jamaica Property Company Limited.

Paul A. B. Facey, MBA

Mr. Facey serves as the Vice President, Investments for First Jamaica Investments Limited and Pan-Jamaican Investment Trust Limited. He brings to the board his over 17 years of substantial experience in the trading, manufacturing and financial sectors. Mr. Facey sits on the boards of Pan-Jamaican Investment Trust Limited and Sagicor Life Jamaica Limited, where he is also a member of the Investment and Audit Committees.

T. Matthew W. Pragnell, BA

Mr. Pragnell joined the board of First Jamaica Investment Limited in 2009. He is the Chief Executive Officer of the CGM Gallagher Group, the largest insurance broker and risk management group in the English-speaking Caribbean with operations in Jamaica, Barbados, St. Lucia, St. Vincent and Grenada. Mr. Pragnell originally trained in insurance as a Lloyd's Broker in the city of London. He is one of the founding directors of Panacea Insurance Company, the group's captive insurance vehicle domiciled in St. Lucia. He is a past president of the Jamaica Insurance Brokers Association and has also non-executive director experience in banking.

Donovan H. Perkins, MBA

Mr. Donovan Perkins is the CEO of Pan Caribbean Financial Services Limited. Under his leadership the company has grown through a series of mergers and acquisitions into a diversified Financial Services Group. In addition to serving on the Boards within the Pan Caribbean Group, Mr. Perkins is a Director of Pan-Jamaican Investment Trust Limited, Jamaica Producers Group Limited, National Insurance Fund, The Jamaica Stock Exchange and the National Water Commission. He previously served as Vice President of the Jamaica Bankers Association and the Private Sector Organisation of Jamaica.

Board of Directors (Cont'd)

Ian Parsard, MBA (Hons), ACCA

Mr. Ian Parsard is the Vice President of Finance and Energy for the Jamaica Broilers Group Limited, one of the Caribbean's most successful vertically integrated agro-processing entities. With over 20 years of expertise in finance and information technology, Mr. Parsard continues to exercise his prudent business acumen as a member of the Group's Executive Team in the development and execution of the company's strategic plan and was instrumental in the company's successful foray into the ethanol industry in 2007. He was appointed to the Board in August 2010 and currently serves as a Director on the Boards of Jamaica Broilers Group Limited, the Mustard Seed Agricultural Program and the Caymanas Track Limited in addition to serving as the President of the JBG Cooperative Credit Union. A past Jamaica Scholar (1985) and a Chartered Accountant, Mr. Parsard also holds an MBA from the University of Pennsylvania's Wharton School of Business, graduating with highest honours as the Palmer Scholar.

Kathleen A.J. Moss, BSc.(Mgmt.), MBA, CBV

Kathleen A. J. Moss, is a Management Consultant and Chartered Business Valuator with Sierra Associates, an independent advisory and business valuation firm that she established in 1993. She was appointed to the Board in August 2010, and chairs the audit committee. Mrs. Moss serves on the Boards of Jamaica Producers Group, where she chairs the audit committee, and is a member of the Executive and Compensation Committees; NEM Insurance Company (Jamaica) Limited where she is Deputy Chairman, and Assurance Brokers Jamaica Ltd. Mrs. Moss is a member of the Investment Committee and the Internal Audit Committee of Jamaica National Building Society. She is a trustee of the Violence Prevention Alliance, a member of the Canadian Institute of Chartered Business Valuators and a graduate of the University of the West Indies and McGill University.

Tribute to the Hon. Roy Collister, OJ.

July 5, 1935-April 11, 2010

Pan-Jamaican Investment Trust Limited, its subsidiaries and associated companies record with regret the death on April 11, 2010 of the Hon. Roy Collister, OJ., highly respected member of the boards of Pan-Jamaican Investment Trust Limited and First Jamaica Investments Limited.

Mr. Collister's association with Pan-Jamaican Investment Trust spanned over twenty-five years. He was a founding director of, and from 1985 to 1992, Deputy Chairman of Pan-Caribbean Merchant Bank Limited (PCMB), which was established in 1983 by a Pan-Jamaican led consortium of companies. This private sector consortium, which sought through PCMB to provide development capital and infrastructural services for advancing the local economy, included T. Geddes Grant Limited, (TGGL) which Mr. Collister served for thirty-three years. He ended his illustrious career with TGGL as Group Chairman and Chief Executive of the Caribbean-wide entity.

Mr. Collister also served the Pan-Jamaican Group of Companies

from 1999 as a Director of First Jamaica Investments Limited (then First Life Insurance Company Limited) and as a member of the Board of Pan-Jamaican Investment Trust Limited from 2000 until his death.

Born in the Isle of Man, United Kingdom in 1935, Roy Collister held a degree in Commerce from the University of Manchester, England. He was a fellow of the Institute of Chartered Accountants of Jamaica as well as the Institute of Chartered Accountants of England and Wales. He emigrated to Jamaica in 1959, became a Jamaican citizen in 1965 and quietly set about making a most remarkable and enduring contribution to the development of the financial services and business sectors in his adopted country.

In the course of his career, Mr. Collister was a partner in the auditing practice of Ernst & Young, and over the years held directorships in an extensive list of companies in Jamaica and the Caribbean. He was a Past President of the Jamaica Chamber of Commerce as well as the Private Sector Organization of Jamaica. Mr. Collister was a member of the Council of the Jamaica Stock Exchange. He further served as a director of the University of the West Indies Development Fund and was Chairman of the Fund's Financial Committee.

Roy Collister is remembered by a grateful nation particularly for his commitment to tax reform in Jamaica. He was Chairman of the Jamaican Government's Tax Reform Committee, the work of which resulted in major reforms of Jamaica's personal and corporate

tax systems implemented in the 1980s as well as the design of the General Consumption Tax (GCT). He further served as a Director of the Trade Board, Jamaica National Investment Promotion, Jamaica Export Credit Insurance Corporation, the Export Development Fund, as a member of the Government's Divestment Committee and as Chairman of the Jamaica Bauxite Institute.

In Regional affairs, Roy Collister served the Caribbean Law Institute's Advisory Committee and was a Past President of the Caribbean Association of Industry and Commerce. He was also a Trustee of the Caribbean Latin American Action Organization seeking to ease trade restrictions on CARICOM exports to the US.

In March 2010, Roy Collister was conferred with the national honour, the Order of Jamaica by the Government in recognition of his services to Jamaica and to the business sector in particular.

Roy Collister was an exemplary member of the Jamaican business community who was dedicated to the advancement of the Jamaican and Caribbean economies. He was a devoted husband, father, grandfather, an admired colleague and a trusted friend.

The Pan-Jamaican Group extends sincere condolences to Roy Collister's widow, Sylvia and sons, Keith and Paul, his family, colleagues and friends on the loss of an exceptional individual. We are privileged to have had the benefit of his expertise, dedication to excellence and wise counsel.

May his soul rest in peace.

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of First Jamaica Investments Limited, its subsidiaries and associated companies ("the group"), and the accompanying financial statements of First Jamaica Investments Limited ("the company") standing alone, set out on pages 21 to 81, which comprise the consolidated and company statement of financial position as of 31 December 2010 and the consolidated and company income statements, the consolidated and company statements of comprehensive income, the consolidated and company statements of changes in equity and the consolidated and company statements of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and with the requirements of the Jamaican Companies Act. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatements, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

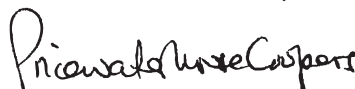

Opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the group and the company as of 31 December 2010, and of the financial performance and cash flows of the group and the company for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Jamaican Companies Act.

Report on Other Legal and Regulatory Requirements

As required by the Jamaican Companies Act, we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of our audit.

In our opinion, proper accounting records have been kept, so far as appears from our examination of those records, and the accompanying financial statements are in agreement therewith and give the information required by the Act, in the manner so required.

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

1. Identification and Principal Activities

- (a) First Jamaica Investments Limited (“the company”) is incorporated and domiciled in Jamaica. It is an 83.00% (2009 – 73.31%) owned subsidiary of Pan-Jamaican Investment Trust Limited (the Parent Company) which is also incorporated and domiciled in Jamaica.

The main activities of the company are the holding of investments, and property management and rental. The registered office of the company is located at 60 Knutsford Boulevard, Kingston 5.

The company is listed on the Jamaica Stock Exchange.

- (b) The company’s subsidiaries, associated companies and other consolidated entities, which together with the company are referred to as “the group” are as follows:

	Principal Activities	Proportion of issued equity capital held by	
		Company	Subsidiaries
Subsidiaries			
Jamaica Property Company Limited	Commercial Property Rental	100%	-
Jamaica Property Development Limited	Property Management	-	100%
Jamaica Property Management Limited	Property Management	-	100%
Portfolio Partners Limited	Investment Management	100%	-
Castleton Investments Limited (Incorporated in St Lucia)	Investment Management	100%	-
St Andrew Developers Limited	Property Development	33 1/3%	33 1/3%
Imbrook Properties Limited	Property Development	-	100%
Knutsford Holdings Limited	Office Rental	32%	28%
Associated Companies			
Sagicor Life Jamaica Limited	Insurance and Pension Management	24.78%	
Impan Properties Limited	Office Rental		20%
Other Consolidated Entity			
First Jamaica Employee Share Ownership Scheme	Employee Share Ownership Plan	100%	

With the exception of Castleton Investments Limited (“Castleton”), which is incorporated and domiciled in St. Lucia, all of the company’s subsidiaries associated companies and other consolidated entities are incorporated and domiciled in Jamaica. The group’s holding in Castleton was acquired in the current year. For all other entities within the group, there has been no significant change over the prior year, of the proportion of capital held.

2. Summary of Significant Accounting Policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

(a) Basis of preparation

The consolidated financial statements of the group and the financial statements of the company standing alone (together referred to as the financial statements) have been prepared in accordance with International Financial Reporting Standards (IFRS). The financial statements have been prepared under the historical cost convention, as modified by the revaluation of investment properties, available-for-sale financial assets, and financial assets at fair value through profit and loss.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 3.

(expressed in Jamaican Dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

Standards and amendments to published standards effective 1 January 2010 that are relevant to the group's operations

The following standards and amendments to previously existing standards, which became effective in the current financial year are relevant to the group, and have impacted the financial statements as described below.

- **IAS 1 (Amendment), 'Presentation of financial statements'**. The amendment provides clarification that the potential settlement of a liability by issue of equity is not relevant to its classification as current or non current. By amending the definition of current liability, the amendment permits a liability to be classified as non current (provided that the entity has an unconditional right to defer settlement by transfer of cash or other assets for at least 12 months after the accounting period) notwithstanding the fact that the entity could be required by the counterparty to settle in shares at any time. The new guidance has had no impact on the group's financial statements, as the group and the company present an unclassified Statement of financial position.
- **IFRS 3 (revised), 'Business combinations', and consequential amendments to IAS27, 'Consolidated and separate financial statements', IAS 28, 'Investments in associates', and IAS 31, 'Interests in joint ventures'**, - The revised standard is to be applied prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after 1 July 2009. The revised standard continues to apply the acquisition method to business combinations but with some significant changes when compared with IFRS 3. For example, all payments to purchase a business are recorded at fair value at the acquisition date, with contingent payments classified as debt subsequently remeasured through the statement of comprehensive income. There is a choice on an acquisition-by-acquisition basis to measure the non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets. All acquisition-related costs are now expensed. Where control is achieved in stages, the revised standard also requires goodwill to be determined only at the acquisition date rather than at the previous stages. The determination of goodwill includes a requirement for the previously held equity interest to be adjusted to fair value, with any gain or loss recorded in the income statement. IAS 27 (revised) requires the effects of all transactions with non-controlling interests to be recorded in equity if there is no change in control and these transactions will no longer result in goodwill or gains and losses. The standard also specifies the accounting when control is lost. Any remaining interest in the entity is re-measured to fair value, and a gain or loss is recognised in profit or loss.
- **IAS 28 (revised)** requires that gains or losses on the dilution of investments in associated companies, where the group retains significant influence, be recorded in the income statement.

The adoption of this standard had no impact on the financial statements, as there were no business combinations and no transactions with non-controlling interests of subsidiaries. There were also no dilutions of the group's holdings in its associated companies. The aforementioned amendments will be applied prospectively.

Standards, interpretations and amendments to published standards that are not yet effective

At the date of authorisation of these financial statements, certain new standards, interpretations and amendments to existing standards have been issued which are mandatory for the group's accounting periods beginning on or after 1 January 2011 or later periods, but were not effective at the statement of financial position date, one of which the group has early adopted. The group has assessed the relevance of all such new standards, interpretations and amendments, has determined that the following may be immediately relevant to its operations, and has concluded as follows:

- **Amendment to IAS 12, 'Income taxes', effective 1 January 2012 (Early adopted by the group)**. This amendment introduces rebuttable presumption that value of investment property measured at fair value will be recovered entirely through sale. Management has early adopted this standard and has determined that there is no material impact on the group's financial statements.
- **IAS 24 (Revised), 'Related party disclosures', effective 1 January 2011**. This amendment removes the requirement for government related entities to disclose details of all transactions with the government and other government-related entities and it clarifies and simplifies the definition of a related party. The new guidance is not expected to have a material impact on the group's financial statements.
- **Amendment to IFRS 7, 'Financial Instruments: Disclosure', effective 1 July 2011**. The amendments will promote transparency in the reporting of transfer transactions and improve users' understanding of the risk exposures relating to transfers of financial assets and the effect of those risks on an entity's financial position, particularly those involving securitisation of financial assets. Management is of the view that the amendment will not impact the group, as it presently does not participate in securitization transactions.

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

Standards, interpretations and amendments to published standards that are not yet effective (continued)

- **IFRS 9, 'Financial instruments'**. The standard introduces new requirements for the classification and measurement of financial assets and financial liabilities and is effective from 1 January 2013 with early adoption permitted. The standard divides all financial assets and financial liabilities that are currently in the scope of IAS 39 into two classifications – those measured at amortised cost and those measured at fair value. This standard is a work in progress and will eventually replace IAS 39 in its entirety.

(b) Basis of consolidation

(i) Subsidiaries

The group uses the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets. Investments in subsidiaries are accounted for at cost less impairment. Cost is adjusted to reflect changes in consideration arising from contingent consideration amendments. Cost also includes direct attributable costs of investment. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the group's share of the identifiable net assets acquired is recorded as goodwill. If this is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the income statement. Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

(ii) Transactions and non-controlling interests

The group treats transactions with non-controlling interests as transactions with equity owners of the group. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity. When the group ceases to have control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss. If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to profit or loss where appropriate.

(iii) Associates

Associates are all entities over which the group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for by the equity method of accounting and are initially recognised at cost. The group's investment in associates includes goodwill (net of any accumulated impairment loss) identified on acquisition.

The group's share of its associates' post-acquisition profits or losses is recognised in the income statement, and its share of post-acquisition movements in reserves is recognised in other comprehensive income. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the group and its associates are eliminated to the extent of the group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. In the company's statement of financial position, investments in associates are shown at cost.

Dilution gains and losses in investments in associated companies are recognised in the income statement.

(expressed in Jamaican Dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(c) Revenue recognition

(i) Investment income

Interest income is recognised in the income statement for all interest bearing instruments on an accrual basis using the effective yield method based on the actual purchase price. Interest income includes coupons earned on fixed income investments and accrued discounts or premiums on treasury bills and other discounted instruments. When amounts receivable in connection with investments become doubtful of collection, they are written down to their recoverable amounts, and interest income is thereafter recognised based on the rate of interest that was used to discount the future cash flows for the purpose of measuring the recoverable amount.

(ii) Dividend income

Dividend income is recognised when the right to receive payment is established.

(iii) Property income

Revenue comprises the invoiced value of rental and maintenance charges, net of General Consumption Tax, and changes in fair values of investment properties. Rental income and maintenance charges are recognised on an accrual basis over the life of the building occupancy by tenants. Investment properties are valued on an annual basis by external professional valuers and the change in the fair value is recognised in the income statement.

(d) Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Jamaican dollars, which also the company's functional currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement.

Changes in the fair value of monetary assets denominated in foreign currencies and classified as available-for-sale are analysed between translation differences resulting from changes in the amortised cost of the asset and other changes. Translation differences resulting from the changes in amortised cost are recognised in the income statement, and other changes are recognised in other comprehensive income.

Translation differences on non-monetary items such as equities classified as available-for-sale are included in the fair value reserve.

(e) Taxation

Taxation expense in the income statement comprises current and deferred tax. Current and deferred taxes are recognised as income tax expense or benefit in the income statement except, where they relate to items recorded in other comprehensive income, in which case they are also charged or credited to other comprehensive income. Taxation is based on profit for the year adjusted for taxation purposes at 33 1/3%.

(i) Current taxation

Current tax is the expected taxation payable on the taxable income for the year, using tax rates enacted at the statement of financial position date, and any adjustment to tax payable and tax losses in respect of the previous years.

(ii) Deferred income taxes

Deferred tax liabilities are recognised for temporary differences between the carrying amounts of assets and liabilities and their amounts as measured for tax purposes, which will result in taxable amounts in future periods. Deferred tax is provided on temporary differences arising from investments in subsidiaries, except where the timing of reversal of the temporary difference can be controlled and it is probable that the difference will not reverse in the foreseeable future. Deferred tax assets are recognised for temporary differences which will result in deductible amounts in future periods, but only to the extent it is probable that sufficient taxable profits will be available against which these differences can be utilised.

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(e) Taxation (continued)

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the asset will be realised or the liability will be settled based on enacted rates.

Deferred tax is not recognised on changes in the fair values of investment properties in excess of cost, as it is management's intention to recover such surplus through sale, which would not attract any taxes.

Deferred tax assets and liabilities are offset when they arise from the same taxable entity, relate to the same tax authority and when the legal right of offset exists.

(f) Financial instruments

A financial instrument is any contract that gives rise to both a financial asset in one entity and a financial liability or equity of another entity.

Financial assets

The group's financial assets comprise cash and bank balances, deposits, investment securities, accounts receivable, including balances due from related parties. The particular recognition methods adopted are disclosed in the individual policy statements associated with each item.

Financial liabilities

The group's financial liabilities comprise bank overdraft, trade payables, loans, finance lease liabilities and other liabilities. They are initially measured at fair value, and are subsequently measured at amortised cost using the effective interest method.

The fair values of the group's and the company's financial instruments are discussed in Note 33.

(g) Investments

(i) Investment securities

The group classifies its investment securities as available-for-sale, fair value through profit and loss, and loans and receivables. The classification depends on the purpose for which the investments were acquired. Management determines the classification of its investments at initial recognition and re-evaluates this designation at every reporting date.

Purchases and sales of investments are recognised on settlement date – the date on which an asset is delivered to or by the group. Investments are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the group has transferred substantially all risks and rewards of ownership.

Investments are initially recognised at fair value which is the cash consideration including any transaction costs, for all financial assets not carried at fair value through profit and loss. For financial assets at fair value through profit or loss, transaction costs are expensed as incurred.

(a) Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. Available-for-sale financial assets are carried at fair value. Changes in the fair value for available for sale investments denominated in the functional currency of the reporting entity are recorded in other comprehensive income, and under investment and other reserves in equity. Changes in the fair value of foreign currency denominated available-for-sale financial assets are discussed in Note 2 (d) (ii).

When securities classified as available-for-sale are sold or impaired, the accumulated fair value adjustments previously recognised in other comprehensive income are included in the income statement as investment income.

The group assesses at each statement of financial position date whether there is objective evidence that a financial asset or a group of financial assets is impaired. For debt securities, objective evidence of impairment includes significant difficulty on the part of the borrower and attempts to restructure the contractual cash flows associated with the debt. In the case of equity securities classified as available for sale, a significant or prolonged decline in the fair value of the security below its cost is considered an indicator that the securities are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in the income statement – is removed from equity and recognised in the income statement. Impairment losses recognised in the income statement on equity instruments are not reversed through the income statement.

The determination of the fair values of financial assets is discussed in Note 33.

(expressed in Jamaican Dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(g) Investments (continued)

(b) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term. These assets are subsequently measured at fair value, with the fair value gains or losses being recognised in the income statement.

(c) Loans and receivables

Loans and receivables are carried at amortised cost.

Loans are recognised when cash is advanced to borrowers. They are carried at amortised cost using the effective interest rate method.

A provision for credit losses is established if there is objective evidence that a loan is impaired. A loan is considered impaired when, using the criteria for debt securities discussed under available for sale securities, management determines that it is probable that all amounts due according to the original contractual terms will not be collected. When a loan has been identified as impaired, the carrying amount of the loan is reduced by recording specific provisions for credit losses to its estimated recoverable amount, which is the present value of expected future cash flows including amounts recoverable from guarantees and collateral, discounted at the original effective interest rate of the loan.

For impaired loans and receivables, the accrual of interest income based on the original terms of the loan is discontinued. IFRS require the increase in the present value of impaired loans due to the passage of time to be reported as interest income.

Write-offs are made when all or part of a loan is deemed uncollectible or in the case of debt forgiveness. Write-offs are charged against previously established provisions for credit losses and reduce the principal amount of a loan. Recoveries in part or in full of amounts previously written-off are credited to the income statement.

(ii) Securities purchased under agreements to resell

Securities purchased under agreements to resell (reverse repurchase agreements) are treated as collateralised financing transactions. The difference between the purchase and resale price is treated as interest and accrued over the life of the agreements using the effective yield method.

(iii) Investment property

Investment property is held for rental yields and is not occupied by the group. Investment property is treated as a long-term investment and is carried at fair value, based on fair market valuation exercises conducted annually by independent qualified valuers. Changes in fair values are recorded in the income statement.

(h) Cash and cash equivalents

Cash and cash equivalents are carried on the statement of financial position at cost. For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise investment securities with less than 90 days maturity from the date of acquisition including cash and bank balances, deposits held on call with banks, securities purchased under agreements to resell, and bank overdrafts.

(i) Leases

As Lessee

Leases of property, plant and equipment where the group has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the inception of the lease at the lower of the fair value of the leased asset or the present value of minimum lease payments. Each lease payment is allocated between the liability and interest charges so as to produce a constant charge on the lease obligation. The interest element of the lease payments is charged to the income statement over the lease period.

Leases where a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments under operating leases are charged to the income statement on a straight-line basis over the period of the lease.

(j) Inventories

Inventories are valued on the first-in, first-out basis at the lower of cost and net realisable value.

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)**(k) Property, plant and equipment**

Property, plant and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. If such subsequent cost relates to a replaced part, the carrying amount of the replaced part is derecognised. All other repairs and maintenance costs are charged to the income statement during the financial period in which they are incurred.

Depreciation is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as below. No depreciation is charged in the year of acquisition.

Freehold premises	2½%
Furniture and fixtures	10% & 12½%
Equipment	10%
Motor vehicles capitalised under finance leases	over the period of the lease
Motor vehicles	15% & 20%

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each statement of financial position date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in the income statement.

(l) Employee benefits**(i) Pension obligations**

The company and its subsidiaries operate a number of defined benefit pension plans, the assets of which are generally held in separate trustee-administered funds. The pension plans are funded by payments from employees and by the relevant companies, taking into account the recommendations of independent qualified actuaries. A defined benefit plan is a pension plan that is not a defined contribution plan. Typically, defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The amount recognised in the statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the statement of financial position date less the fair value of plan assets, together with adjustments for unrecognised actuarial gains or losses and past service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality Government of Jamaica bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating to the terms of the related pension liability.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions in excess of the greater of 10% of the value of plan assets or 10% of the defined benefit obligation are charged or credited to income over the employees' expected average remaining working lives.

Past-service costs are recognised immediately in income, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past-service costs are amortised on a straight-line basis over the vesting period.

(ii) Other post-employment benefits

Some group companies provide post-employment healthcare benefits to their retirees. The entitlement to these benefits is usually conditional on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment using the same accounting methodology as used for defined benefit pension plans. Actuarial gains and losses arising from experience adjustments, and changes in actuarial assumptions in excess of the greater of 10% of the value of plan assets or 10% of the defined benefit obligation, are charged or credited to income over the expected average remaining working lives of the related employees. These obligations are valued annually by independent qualified actuaries.

(expressed in Jamaican Dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(l) Employee benefits (continued)

(iii) Annual leave entitlements

Employee entitlements to annual leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the statement of financial position date.

(iv) Equity compensation benefits

The ultimate parent company operates an equity-settled share-based compensation plan. The fair value of the employee services received in exchange for the grant of the options is recognised as an expense in the company which is the primary recipient of the employee's services. The total amount expensed over the vesting period is determined by reference to the fair value of the options granted, excluding the impact of any non-market vesting conditions (for example, net profit growth target). Non-market vesting conditions are included in assumptions about the number of options that are expected to become exercisable. At each statement of financial position date, the group reviews its estimates of the number of options that are expected to become exercisable. It recognises the impact of the revision of original estimates, if any, in the income statement, and a corresponding adjustment to equity over the remaining vesting period. The proceeds received net of any directly attributable transaction costs are credited to share capital when the options are exercised.

The cost of equity transactions is recognised, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant employee becomes fully entitled to the award (the vesting date).

The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the group's best estimate of the number of equity instruments that will ultimately vest. The charge or credit to the income statement for a period represents the movement in cumulative expense recognised as at the beginning and end of that period.

No expense is recognised for awards that do not ultimately vest, except for awards where vesting is conditional upon a market condition, which are treated as vested irrespective of whether or not the market condition is satisfied, provided that all other performance conditions are satisfied.

Where the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified. In addition, an expense is recognised for any modification which increases the total fair value of the share-based payment arrangement, or is otherwise beneficial to the employee as measured at the date of modification.

(v) Termination benefits

Termination benefits are payable when employment is terminated by the group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The group recognises termination benefits when it is demonstrably committed to either: terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal; or providing termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than twelve (12) months after the statement of financial position date are discounted to present value.

(m) Impairment of non-financial assets

Assets that have an indefinite useful life, for example land, are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(n) Intangible assets

Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the group's share of the net identifiable assets of the acquired subsidiary/associate at the acquisition date. Goodwill on the acquisition of a subsidiary is included in intangible assets. Goodwill on acquisition of associates is included in investments in associates.

At each statement of financial position date the group assesses whether there is any indication of impairment. If such indications exist, an analysis is performed to assess whether the carrying amount of goodwill is fully recoverable. A write down is made if the carrying amount exceeds the recoverable amount.

(o) Provisions

Provisions are recognised when the group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made. Where the group expects a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain.

(p) Dividends

Dividends are recorded as a deduction from stockholders' equity in the period in which they are approved.

(q) Share capital

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

(r) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the executive committee that makes strategic decisions.

3. Critical Accounting Judgements and Key Sources of Estimation Uncertainty

Judgements and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(i) Estimated impairment of goodwill

The group tests annually whether goodwill has suffered any impairment, in accordance with the accounting policy stated in Note 2(n).

(ii) Income taxes

The group is subject to income taxes. Significant judgement is required in determining the provision for income taxes. The group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

(iii) Fair value of financial instruments

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The group uses its judgement to select a variety of methods and valuation inputs, and make assumptions that are mainly based on market conditions existing at each statement of financial position date. The group uses discounted cash flow analyses and references to prices for other instruments that are substantially the same for various available-for-sale financial assets that are not traded in active markets. Details of investment securities valued using other than quoted prices in an active market are provided in Note 33 of the financial statements.

(expressed in Jamaican Dollars unless otherwise indicated)

3. Critical Accounting Judgements and Key Sources of Estimation Uncertainty (continued)

(iv) Impairment of investment securities and investment in associated companies

The group follows the guidance of IAS 39, IAS 28 and IAS 36 to determine when an investment security or an investment in an associated company is impaired. In making this determination for investment securities, the group evaluates, among other factors, financial difficulties on the part of the borrowers and variations to the contractual cash flows associated with the investment for debt instruments, and the duration for and extent to which the fair value of an available-for-sale equity investment is lower than its cost. For investments in associated companies, management determines the investment's recoverable amount, and compares this to the investment's carrying amount. Management's evaluation of the aforementioned factors for debt and equity securities, as well as the determination of the recoverable amount for its investment in associated companies requires the use of significant judgement. Except as otherwise disclosed in the notes to the financial statements, management is of the view that there is no impairment to investment securities or investment in associated companies.

(v) Pension plan assets and post-employment obligations

The cost of these benefits and the present value of the pension and the other post-employment liabilities depend on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net periodic cost (income) for pension and post-employment benefits include the expected long-term rate of return on the relevant plan assets, the discount rate and, in the case of the post-employment medical benefits, the expected rate of increase in medical costs. Any changes in these assumptions will impact the net periodic cost (income) recorded for pension and post-employment benefits and may affect planned funding of the pension plans. The expected return on plan assets assumption is determined on a uniform basis, considering long-term historical returns, asset allocation and future estimates of long-term investment returns. The group determines the appropriate discount rate at the end of each year, which represents the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension and post-employment benefit obligations. In determining the appropriate discount rate, the group considers the interest rates of high-quality bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability. The expected rate of increase of medical costs has been determined by comparing the historical relationship of the actual medical cost increases with the rate of inflation. Other key assumptions for the pension and post-employment benefits cost and credits are based in part on current market conditions. A change in any of the assumptions used could have a significant impact on the value of the related retirement benefit asset or liability.

(vi) Investment properties

Investment properties are carried in the statement of financial position at market value. The group uses independent qualified property appraisers to value its investment properties annually, generally using the income approach. This approach takes into consideration various assumptions and factors including; the level of current and future occupancy, the rate of annual rent increases, the rate of inflation of direct expenses, a discount rate, and the current condition of the properties. Reference is also made to recent comparable sales. A change in any of these assumptions and factors could have a significant impact on the valuation of investment properties.

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

4. Segmental Financial Information

The group is organised into two main business segments:

(a) Investments – This incorporates investment management and holding of securities; and

(b) Property management and rental – This incorporates the rental and management of commercial real estate.

The operating segments have been determined by management based on the reports reviewed by the board of directors, and are used to make strategic and operational decisions. The property management and investments segments derive their income from rental and property management fees, and interest and dividend income respectively.

	2010			
	Investments	Property Management And Rental	Eliminations	Group

	140,959	107,868	24,405	27,863

10. Taxation

(a) Composition of tax charge

The taxation charge/(credit) for the year is comprised of:

	The Group		The Company	
	2010	2009	2010	2009
	\$'000	\$'000	\$'000	\$'000
Current income tax at 33 $\frac{1}{3}$ %	144,701	173,841	69,742	71,554
Deferred income taxes (Note 17)	21,546	5,810	3,036	(3,959)
	166,247	179,651	72,778	67,595

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

10. Taxation (continued)

(b) Reconciliation of applicable tax charges to effective tax charge:

	The Group		The Company	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000
Current income tax				
Profit before tax	1,829,227	2,120,145	490,650	822,981
Tax at 33 $\frac{1}{3}$ %	609,742	706,715	163,550	274,327
Adjusted for the tax effects of:				
Income not subject to tax	(105,613)	(138,869)	(136,487)	(210,386)
Share of associates' profit included net of tax	(382,322)	(396,190)	-	-
Other charges and credits	44,440	7,995	45,715	3,654
Income tax expense	166,247	179,651	72,778	67,595

Income not subject to tax consists principally of property revaluation gains for the group and dividend income for the company.

(c) Tax (charge)/credit relating to components of other comprehensive income is as follows:

	The Group			The Company		
	Before tax \$'000	Tax (charge) credit \$'000	After tax \$'000	Before tax \$'000	Tax (charge) credit \$'000	After tax \$'000
2010						
Fair value gains on available-for-sale financial assets	90,852	(9,268)	81,584	35,980	-	35,980
Share of other comprehensive income of associated company	556,132	-	556,132	-	-	-

Current income tax

Deferred income tax (Note 17)

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

11. Earnings Per Stock Unit/Net Profit and Retained Earnings

Basic earnings per stock unit is calculated by dividing the net profit attributable to equity holders of the group by the weighted average number of ordinary stock units in issue during the year (303,500,000 – 2010 and 2009), excluding ordinary stock units purchased by the group through the Employee Share Ownership Scheme and held as treasury stock (1,220,000 – 2010 and 2009). Diluted earnings per stock unit is calculated by adjusting the weighted average number of ordinary stock units outstanding to assume conversion of all dilutive potential ordinary stock units. The group has no dilutive potential ordinary stock units.

	The Group	
	2010	2009
Net profit attributable to equity holders (\$'000)	1,642,133	1,917,969
Weighted average number of ordinary stock units (thousands)	302,280	302,280
Earnings per stock unit (\$)		
Basic and fully diluted	\$5.43	\$6.35

The net profit and retained earnings of the group are reflected in the records of the company, its subsidiaries and associated companies as follows:

	2010	2009
	\$'000	\$'000
Net Profit		
The company	417,872	755,386
Associated companies	749,939	664,609
Subsidiaries	495,169	520,679
	1,662,980	1,940,494
Retained Earnings		
The company	2,021,713	1,998,391
Associated companies	3,201,827	2,451,888
Subsidiaries	1,633,545	1,457,989
	6,857,085	5,908,268

Net profit and retained earnings attributable to associated companies and subsidiaries are shown net of dividends received by the company.

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

12. Cash and Cash Equivalents

For the purposes of the consolidated and company statements of cash flows, cash and cash equivalents comprise the following balances with original maturity dates not exceeding 90 days.

	The Group		The Company	
	2010	2009	2010	2009
	\$'000	\$'000	\$'000	\$'000
Cash and bank balances	18,805	12,259	8,783	7,705
Short term deposits	13,252	119,417	7,699	117,934
Securities purchased under agreements to resell (Note 14)	837,250	736,956	245,114	372,194

All of the group's financial assets at fair value through profit and loss are held for trading. Included in the available-for-sale debt securities above is interest receivable amounting to \$18,228,000 and \$17,768,000 (2009 - \$22,684,000 and \$17,379,000) for the group and the company respectively.

Certain of the group's corporate bonds were impaired as at 31 December. Impairment charges of \$24,322,000 (2009 - \$9,441,000) have been recorded in the income statement.

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

14. Securities Purchased under Agreements to Resell

The group and the company have acquired collateralised securities purchased under agreements to resell, which may result in credit exposure in the event that the counterparty to the transaction is unable to fulfill its contractual obligations.

Except for \$184,421,000 (2009 – Nil), pledged as collateral for a related party loan, securities purchased under agreements to resell, totaling \$837,250,000 and \$245,114,000 (2009 -\$736,956,000 and \$372,194,000) for the group and company respectively, are regarded as cash and cash equivalents for the purposes of the consolidated and company statements of cash flows (Note 12).

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

16. Investment in Subsidiaries and Associated Companies (Continued)

In 2009, Sagicor Life of Jamaica Limited (Sagicor) early adopted IFRS 3/IAS 27 Revised. These standards were not then early adopted by the group. As a consequence of Sagicor's early adoption of the standards, certain gains which were realised on the acquisition of non-controlling interests of a subsidiary, were recorded in equity in Sagicor's financial statements. Due to the fact that the group did not early adopt the aforementioned standards, the group's share of these gains should be recorded in net profit in the books of the group. These gains were therefore added to Sagicor's reported net profit for the purposes of determining the share of results of associated companies reported in the group's financial statement as follows:

	\$'000
Sagicor's reported net profit	4,390,112
Gains on acquisition of minority, recycled to income statement to make accounting consistent with the accounting policies of the group	467,954
Net profit used to determine share of associated company results	4,858,066

17. Deferred Income Taxes

Deferred income taxes are calculated on all temporary differences under the liability method using an effective tax rate of 33 1/3% for both 2010 and 2009.

Assets and liabilities recognised on the statement of financial position are as follows:

	The Group		The Company	
	2010	2009	2010	2009
	\$'000	\$'000	\$'000	\$'000
Deferred tax assets	1,982	8,473	-	-
Deferred tax liabilities	(128,822)	(104,499)	(25,475)	(22,439)
Net liability	(126,840)	(96,026)	(25,475)	(22,439)

The gross movement on the deferred income tax balance is as follows:

	The Group		The Company	
	2010	2009	2010	2009
	\$'000	\$'000	\$'000	\$'000
Balance as at 1 January	(96,026)	(86,289)	(22,439)	(26,398)
Tax (charged)/credited to income statement (Note 10)	(21,546)	(5,810)	(3,036)	3,959
Tax charged to components of comprehensive income (Note 10)	(9,268)	(3,927)	-	-
Balance as at 31 December	(126,840)	(96,026)	(25,475)	(22,439)

Notes to the Financial Statements

20. Retirement Benefits

The company and its subsidiaries have established a number of pension schemes covering all permanent employees. The assets of funded plans are held independently of the group's assets in separate funds administered by the company. Defined benefit plans are valued by independent actuaries annually, using the projected unit credit method.

The latest actuarial valuations were carried out as at 31 December 2010.

The (assets)/liabilities recognised in the statement of financial position comprise:

	The Group		The Company	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000
Pension schemes (Note 20(a))	(18,682)	(36,734)	(18,682)	(6,294)
Other post-employment obligations:				
Medical and life insurance (Note 20(b))	55,428	50,156	27,008	25,625
	36,746	13,422	8,326	19,331

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

20. Retirement Benefits (continued)

The expense/(income) recognised in the income statement comprises:

	The Group		The Company	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000
Pension schemes (Note 20(a))	26,908	9,964	(12,262)	(3,515)
Other post-employment obligations:				
Medical and life insurance (Note 20(b))	7,461	7,961	2,988	2,822
	34,369	17,925	(9,274)	(693)

(a) Pension schemes

The amounts recognised in the statement of financial position are determined as follows:

	The Group		The Company	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000
Present value of funded obligations	223,464	136,457	30,729	18,655
Fair value of plan assets	(262,000)	(226,719)	(90,907)	(78,477)
	(38,536)	(90,262)	(60,178)	(59,822)
Unrecognised actuarial (losses)/gains	(82,766)	(24,022)	5,886	10,455
Unrecognised asset due to restriction in IAS 19, Paragraph 58	102,620	77,550	35,610	43,073
Asset in the statement of financial position	(18,682)	(36,734)	(18,682)	(6,294)

Sagicor Life Jamaica Limited, an associated company which manages the group's pension fund assets in a pooled pension fund, has invested in ordinary stock units of the company with a fair value of \$62,000 (2009 - \$408,240,000).

The movement in the defined benefit obligation over the year is as follows:

	The Group		The Company	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000
Beginning of year	136,457	112,777	18,655	34,233
Current service cost	4,274	3,184	435	214
Interest cost	19,496	16,527	2,691	4,804
Contributions by plan participants	7,110	5,656	492	457
Actuarial losses/(gains)	69,560	3,696	9,933	(16,482)
Benefits paid	(13,433)	(5,383)	(1,477)	(4,571)
End of year	223,464	136,457	30,729	18,655

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

20. Retirement Benefits (Continued)**(a) Pension schemes (Continued)**

The movement in the fair value of plan assets over the year is as follows:

	The Group		The Company	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000
Beginning of year	226,719	187,801	78,477	69,669
Expected return on plan assets	22,796	26,725	7,806	10,653
Actuarial gains	9,952	4,848	5,483	2,152
Employer contributions	8,856	7,072	126	117
Employee contributions	7,110	5,656	492	457
Benefits paid	(13,433)	(5,383)	(1,477)	(4,571)
End of year	262,000	226,719	90,907	78,477

The expense recognised in the income statement is as follows:

	The Group		The Company	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000
Current service cost	4,274	3,184	435	214
Interest cost	19,496	16,527	2,691	4,804
Expected return on plan assets	(22,796)	(26,725)	(7,806)	(10,653)
Net actuarial (gain)/losses recognized during the year	864	328	(119)	55
Change in unrecognised asset	25,070	16,650	(7,463)	2,065
Total, included in staff costs (Note 9)	26,908	9,964	(12,262)	(3,515)

The actual return on plan assets was a gain of \$37,611,000 and \$14,509,000 (2009 – gain \$35,713,000 and \$13,879,000) for the group and the company, respectively.

The principal actuarial assumptions used were as follows:

	The Group		The Company	
	2010 %	2009 %	2010 %	2009 %
Discount rate	11.0	16.0	11.0	16.0
Expected return on plan assets	8.3	10.0	8.5	10.0
Future salary increases	9.0	12.0	9.0	12.0
Future pension increases	3.3	4.0	3.5	4.0

(b) Other post-employment benefits

In addition to pension benefits, the company and certain subsidiaries offer retirees medical and life insurance benefits that contribute to the health care and life insurance coverage of employees and beneficiaries during retirement. The method of accounting and frequency of valuations are similar to those used for defined benefit pension schemes.

The main actuarial assumption is a long-term increase in health costs of 10% per year (2009 – 13.75%).

Other assumptions were as for the pension plans set out above

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

20. Retirement Benefits (Continued)
(b) Other post-employment benefits (continued)

The amounts recognised in the statement of financial position are determined as follows:

	The Group		The Company	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000
Present value of unfunded obligations	57,366	38,995	18,405	19,074
Unrecognised actuarial (losses)/gains	(1,938)	11,161	8,603	6,551
Liability in the statement of financial position	55,428	50,156	27,008	25,625

The movement in the defined benefit obligation over the year is as follows:

	The Group		The Company	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000
Beginning of year	38,995	39,405	19,074	18,785
Current service cost	1,733	1,842	271	101
Interest cost	6,070	6,281	2,928	2,883
Benefits paid	(2,189)	(1,771)	(1,605)	(1,590)
Actuarial losses/(gains)	12,757	(6,762)	(2,263)	(1,105)
End of year	57,366	38,995	18,405	19,074

The expense recognised in the income statement is as follows:

	The Group		The Company	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000
Current service cost	1,733	1,842	271	101
Interest cost	6,070	6,281	2,928	2,883
Net actuarial gains recognised during the year	(342)	(162)	(211)	(162)
Total, included in staff costs (Note 9)	7,461	7,961	2,988	2,822

The effects of a 1% movement in the assumed medical cost trend rate were as follows:

	Increase	Decrease
Effect on the aggregate of the current service cost and interest cost	8,902	6,911
Effect on the defined benefit obligation	66,689	50,220

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

22. Share Options/Equity Compensation Reserve

In November 2006, the ultimate parent company established the 2006 Executive Share Option Scheme ("the option plan"). Under the terms of the option plan, 7.5% of the share capital of the ultimate parent company has been reserved for issue. Officers and other key employees of the group and its subsidiaries are eligible to receive options under the plan. The plan is administered by a committee of the Board of Directors of the ultimate parent company. The exercise price of the granted options is equal to the fair value of the ultimate parent company's shares at the date of the grant of the option, or the date on which the ultimate parent company has entered into a binding commitment to grant the options, whichever is the earlier. Shares issued when share options are exercised have the same rights as other issued common shares.

As at 31 December 2010 options over 2,500,000 common shares had been granted at an exercise price of \$45.00 to 1 executive of the group. These options vest in 5 annual equal amounts on the anniversary of the grant date. Vested options are exercisable for periods of time as determined by the committee of the Board of Directors of the ultimate parent company, but in no event shall exceed 10 years from the date of grant. Options over 2,000,000 shares were vested and exercisable at 31 December 2010 (2009 – 1,500,000)

The group has recognised share based compensation of \$4,605,000 (2009 - \$7,510,000) which represents the amount to be expensed in relation to options granted to persons employed to the group.

The ultimate parent company has used the Black-Scholes valuation model for determining the fair value of the share options. The range of fair values of share options granted during the year, determined using this model, was \$9.31 to \$23.35.

The significant inputs into the model were as follows:

	<u>Share Options</u>
Grant dates	2006
Share Price (range in \$)	45.00
Annual Risk Free Rate (%)	12.61 – 13.16
Expected Volatility (%)	35.00
Expected Dividend yield (%)	0.98

The annual risk free rate used is based on Government of Jamaica Treasury Bills with terms equal to the expected life of the options.

The expected volatility of the share price has been determined by reference to the historical volatility of comparable companies to Pan Jamaican Investment Trust Limited at each of the grant dates.

The expected dividend yield has been determined by reference to the historical dividends paid by the ultimate parent company.

2,500,000 share options were in existence at the end of and throughout the 2009 and 2010 financial years.

23. Property Revaluation Reserve

The balance represents the accumulated revaluation gains on investment properties, which have been transferred from retained earnings.

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

24. Investment and Other Reserves

These comprise:

	The Group		The Company	
	2010 \$'000	2009 \$'000	2010 \$'000	2009 \$'000
Fair value gains/(losses) on investments	94,899	13,377	926	(35,054)
Capital reserves	2,249,220	2,249,220	3,429,586	3,429,586
Capital redemption reserve	3,000	3,000	3,000	3,000
Other reserves	862,692	306,560	-	-
	<u>3,209,811</u>	<u>2,572,157</u>	<u>3,433,512</u>	<u>3,397,532</u>
Capital reserves comprise				
Realised gain on sale of ESOP shares	12,218	12,218	-	-
Realised gain on sale of insurance operations	1,591,881	1,591,881	3,429,586	3,429,586
Realised gain on dilution of holding in subsidiary and associate	390,849	390,849	-	-
Other	254,272	254,272	-	-
	<u>2,249,220</u>	<u>2,249,220</u>	<u>3,429,586</u>	<u>3,429,586</u>

Included in fair value gains for the group is a deferred tax charge of \$4,763,000 (2009 deferred tax credit -\$4,403,000) for unrealized gains/losses on investments.

				502,451	236,353
Interest payable				13,873	5,571
				516,324	241,924

** The First Caribbean International Bank Limited loan has a repayment schedule that would result in repayment by 2017. The terms of the loan agreement however allow the bank the option to call the loan at any time.

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

26. Loan Liabilities (continued)

	Currency	Rate %	Repayable	The Company	
				2010 \$'000	2009 \$'000
Secured -					
(i) Pan Caribbean Financial Services Limited	US\$	10.00	2010	-	66,792
(ii) Pan Caribbean Bank Limited	US\$	10.00	2010	-	76,409
				-	143,201
Interest payable				-	4,070
				-	147,271

- (i) This balance represented a US\$750,000 loan issued by Pan Caribbean Financial Services Limited. Interest was charged at a rate of 10% per annum. The loan was secured by a corporate bond, with face value of US\$1,500,000, and was repaid in 2010.
- (ii) This balance represented a US\$858,000 loan issued by Pan Caribbean Bank Limited. Interest was charged at a rate of 10% per annum. The loan was secured by a corporate bond with a face value of US\$1,716,000, and was repaid in 2010.
- (iii) This balance represented a US\$142,000 loan issued by Pan Caribbean Bank Limited. Interest was charged at a rate of 10% per annum. The loan was secured by a corporate bond with a face value of US\$284,000, and was repaid in 2010.
- (iv) This balance represents the first drawdown on the US\$17,500,000 loan facility from International Finance Corporation (IFC), in the amount of US\$5,000,000. Interest is charged at 6.59% per annum. The loan is secured by a first mortgage over the Jamaica Tourism Centre, Manor Park Plaza Phase 1, and the Scotia Centre properties. The loan is repayable over eight years, with the first of sixteen semiannual installments due January 2012. At 31 December 2010, the group was in breach of two covenants attached to this loan. Subsequent to the end of the financial year, management had entered into negotiations with the IFC and designed a plan to remedy the breaches.
- (v) This loan was issued by FirstCaribbean International Bank Limited to assist with the extension of the multi-storey parking garage, construction of a well and other building upgrades. Interest rate on this loan is computed on the basis of FCIB's base rate less 1.75%. The loan is secured by a first mortgage over commercial lots 195 – 198 (inclusive) Grenada Crescent, New Kingston. The loan is scheduled to be repaid by 2017, but is repayable on demand, should such a request be made by the bank. At 31 December 2010, the group was in breach of certain covenants attached to this loan.
- (vi) This represents a loan advanced by J.N. Properties Limited. The debt is unsecured, attracts interest at a variable rate and has no fixed repayment terms.

27. Finance Lease Liability

The group has entered into a finance lease arrangement with a related party. Future payments under this lease arrangement are as follows:

	The Group	
	2010 \$'000	2009 \$'000
Minimum lease payments under finance leases:		
Not later than 1 year	3,048	1,970
Later than 1 year and not later than 5 years	10,677	136
	13,725	2,106
Future finance charges	(4,061)	(207)
Present value of finance lease obligations	9,664	1,899

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

27. Finance Lease Liability (continued)

The present value of the lease obligations is as follows:

	The Group	
	2010	2009
	\$'000	\$'000
Not later than 1 year	1,627	1,766
Later than 1 year and not later than 5 years	8,037	133
	9,664	1,899

28. Other Liabilities

	The Group		The Company

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

31. Commitments

Operating lease commitments – where the group/company is the lessor:

The future aggregate minimum lease payments under non-cancellable operating leases are as follows:

	The Group		The Company	
	2010	2009	2010	2009
	\$'000	\$'000	\$'000	\$'000
Not later than 1 year	324,064	277,692	-	-
Later than 1 year and not later than 5 years	480,905	497,247	-	-
Later than 5 years	50,574	37,019	-	-
	<u>855,543</u>	<u>811,958</u>	<u>-</u>	<u>-</u>

32. Financial Risk Management

The group's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk. The group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the group's financial performance.

Risk management is carried out by the Investment Committee, which evaluates and manages financial risks in close co-operation with the group's operating business units. The Board of Directors sets guidelines for overall risk management including specific areas, such as foreign exchange risk, interest rate risk, credit risk, and investing excess liquidity.

In February 2010, the group and company participated in the Jamaica Debt Exchange (JDX) transaction under which the group and company exchanged their holdings of domestic debt instruments issued by the Government of Jamaica for new, longer-dated debt instruments available under the election options contained in the agreement. The JDX transaction resulted in a reduction in yields and an increase in the tenor of locally issued Government of Jamaica securities and, therefore, had a significant impact on financial risks.

(a) Market risk

The group takes on exposure to market risks, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks mainly arise from changes in foreign currency exchange rates and interest rates. Market risk is monitored by the group treasury function which carries out extensive research and monitors the price movement of financial assets on the local and international markets. Market risk exposures are measured using sensitivity analysis.

There has been no change to the group's exposure to market risks or the manner in which it manages and measures the risk.

(i) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The group is exposed to foreign exchange risk arising from various currency exposures, through its investment operations, primarily with respect to the US dollar. Foreign exchange risk arises from transactions for purchases of investments denominated in foreign currencies and from foreign currency denominated recognised assets and liabilities.

The group manages its foreign exchange risk by ensuring that the net exposure in foreign assets and liabilities is kept to an acceptable level by monitoring currency positions. The group further manages this risk by maximizing foreign currency earnings and holding foreign currency balances.

Foreign currency sensitivity

The following tables indicate the currencies to which the group and company had significant exposure on its monetary assets and liabilities and its forecast cash flows. The change in currency rate below represents management's assessment of the possible change in foreign exchange rates. The sensitivity analysis represents outstanding foreign currency denominated monetary items and adjusts their translation at the year end for a 5% increase and a 5% decrease (2009 – 5% increase and 1% decrease) in foreign currency rates. The sensitivity of the profit was as a result of foreign exchange gains/losses on translation of US dollar-denominated financial securities classified as available for sale and foreign exchange losses/gains on translation of US dollar-denominated borrowings.

(ii) Interest rate risk

Interest rate risk is the risk that the value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Floating rate instruments expose the group and company to cash flow interest risk, whereas fixed interest rate instruments expose the group to fair value interest risk.

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

32. Financial Risk Management (Continued)

(a) Market risk (continued)

(ii) Interest rate risk (continued)

The group's and company's interest rate risk policy requires it to manage interest rate risk by maintaining an appropriate mix of fixed and variable rate instruments. The policy also requires it to manage the maturities of interest bearing financial assets and interest bearing financial liabilities.

The following tables summarise the group's and the company's exposure to interest rate risk. It includes the group's and company's financial instruments at carrying amounts, categorised by the earlier of contractual repricing or maturity dates.

Interest rate sensitivity

The following tables indicate the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, on the group's and company's income statement and stockholders' equity.

The group's and company's interest rate risk arises from investment securities, securities purchased under agreements to resell and long term borrowings. The sensitivity of the income statement is the effect of the assumed changes in interest rates on net income based on floating rate financial assets and floating rate liabilities. The sensitivity of the other components of stockholders' equity is calculated by revaluing fixed rate available-for-sale financial assets for the effects of the assumed changes in interest rates. The correlation of variables will have a significant effect in determining the ultimate impact on market risk, but to demonstrate the impact due to changes in each variable, changes in assumptions have been determined on an individual basis.

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

32. Financial Risk Management (Continued)

(a) Market risk (continued)

(ii) Interest rate risk (continued)

Interest rate sensitivity (continued)

(iii) Price risk

Price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market. The group and company are exposed to equity price risk because of equity investments held by the group and company classified on the consolidated and company statements of financial position either as available-for-sale or at fair value through profit or loss. The group monitors the prices of these equities on an ongoing basis and implements strategies where necessary to protect against significant price fluctuation.

The impact of a 10% increase/decrease (2009 – 10%) in the quoted prices for these equities would be an increase/decrease in carrying value of \$90,417,000 and \$65,698,000 (2009 - \$76,596,000 and \$56,789,000) for the group and company respectively.

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

32. Financial Risk Management (Continued)**(b) Credit risk**

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The group and company have significant concentrations of credit risk in Government of Jamaica issued securities. The group has policies in place to ensure that property rentals and services are made to customers with an appropriate credit history. Cash transactions are limited to high credit quality financial institutions. The group manages its credit risk by screening its customers, establishing credit limits, obtaining bankers' guarantees, the rigorous follow-up of receivables and ensuring investments are low-risk or, are held with sound financial institutions.

(i) Trade receivables

Trade receivables relate mainly to tenants of the group's commercial properties. Receivables are monitored and followed up on a regular basis and provisions are made as deemed necessary based on an estimate of amounts that would be irrecoverable, determined by taking into consideration past default experience, current economic conditions and expected receipts and recoveries once impaired.

(ii) Investments

The group limits its exposure to credit risk by investing mainly in liquid securities with counterparties that have high credit quality and Government of Jamaica securities. Accordingly, management does not expect any counterparty to fail to meet its obligations.

(iii) Guarantees

The group's policy is not to provide financial guarantees to any other party than wholly-owned subsidiaries. At 31 December 2010, a subsidiary, Jamaica Property Company Limited, had issued a guarantee to a financial institution in respect of a loan owed by the ultimate parent company, Pan Jamaican Investments Limited.

Maximum exposure to credit risk

	Maximum exposure			
	The Group		The Company

32. Financial Risk Management (Continued)

(b) Credit risk (continued)

(i) Trade receivables

The following table summarises the group's and company's credit exposure for trade receivables at their carrying amounts, as categorised by the customer sector. At 31 December, the company had no trade receivables:

	The Group	
	2010	2009
	\$'000	\$'000
Commercial	10,780	31,880
Retail	11,560	10,600
Managed properties	27,081	32,940
	49,421	75,420
Less: Provision for credit losses	(3,701)	(11,923)
	45,720	63,497

Credit quality of trade receivables is summarized as follows:

	The Group	
	2010	2009
	\$'000	\$'000
Neither past due nor impaired -		
Standard	37,052	55,918
Past due but not impaired	8,668	7,579
Impaired	3,701	11,923
Gross	49,421	75,420
Less: Provision for credit losses	(3,701)	(11,923)
Net	45,720	63,497

All trade receivables are receivable from customers in Jamaica.

(ii) Aging analysis of past due but not impaired trade receivables:

	The Group	
	2010	2009
	\$'000	\$'000
31 to 60 days	470	2,824
61 to 90 days	695	52
Over 90 days	7,503	4,703
	8,668	7,579

The amounts above include managed properties fees receivables of \$27,081,000 (2009 - \$32,940,000) (Note 18). There are no financial assets other than trade receivables that are past due.

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

32. Financial Risk Management (Continued)**(b) Credit risk (continued)****(iii) Investments**

The following table summarises the credit exposure of the group to businesses and government by sectors in respect of investments (excluding equities, investments in subsidiaries and associated companies):

	The Group		The Company	
	2010	2009	2010	2009
	\$'000	\$'000	\$'000	\$'000
Government of Jamaica	451,416	483,206	265,063	288,292
Corporate entities	1,406,961	1,228,778	827,088	1,191,698
	<u>1,858,377</u>	<u>1,711,984</u>	<u>1,092,151</u>	<u>1,479,990</u>

(c) Liquidity risk

Liquidity risk is the risk that the group is unable to meet its payment obligations associated with its financial liabilities when they fall due. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions.

Liquidity risk management process

The group's liquidity management process, as carried out within the group and monitored by the Investment Committee includes:

- (i) Monitoring future cash flows and liquidity on a weekly basis. This incorporates an assessment of expected cash flows and the availability of high grade collateral which could be used to secure funding if required;
- (ii) Maintaining a portfolio of highly marketable and diverse assets that can easily be liquidated as protection against any unforeseen interruption to cash flow;
- (iii) Maintaining committed lines of credit;
- (iv) Optimising cash returns on investment; and
- (v) Managing the concentration and profile of debt maturities.

The matching and controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to the management of the group. It is unusual for companies ever to be completely matched since business transacted is often of uncertain term and of different types. An unmatched position potentially enhances profitability, but can also increase the risk of loss.

The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature, are important factors in assessing the liquidity of the group and its exposure to changes in interest rates and exchange rates.

(expressed in Jamaican Dollars unless otherwise indicated)

32. Financial Risk Management (Continued)

(c) Liquidity risk (continued)

Loan liabilities for the group and company have been classified as current, consequent on breaches of certain covenants. In the table above, the entire amount of the loans has therefore been shown as being repayable in one month. As management is currently in discussions with the banks regarding remediation of those breaches, management expects the loan to be settled as scheduled in the loan agreement.

(d) Capital management

The group's objectives when managing capital are to provide superior returns for stockholders and benefits for other stakeholders while maintaining a conservative capital structure. The Board of Directors monitors the return on capital, which the group defines as net profit attributable to equity holders divided by total stockholders' equity excluding non-controlling interests. The Board of Directors also monitors and approves the level of dividends to ordinary stockholders.

The group will from time to time purchase its own shares on the market for employees share option plans purposes, the timing of which depends on the prevailing market prices

There were no changes to the group's approach to capital management during the year.

The company and its subsidiaries have no externally imposed capital requirements.

Notes to the Financial Statements

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

33. Fair Value of Financial Instruments (Continued)

	The Company			
	2010	2010	2009	2009
	\$'000	\$'000	\$'000	\$'000
Loan liabilities	-	-	147,271	147,271

Balances for other financial assets and liabilities carried at amortised cost, approximates their fair value because of their short term nature.

Effective 1 January 2009, the group adopted the amendment to IFRS 7 for financial instruments that are measured in the statement of financial position at fair value. The amendment requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- (a) Quoted prices in active markets for identical assets or liabilities (level 1).
- (b) Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- (c) Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The following table presents the group's financial assets that are measured at fair value at 31 December, grouped into Levels 1 to 3 dependent on the degree to which fair values are observable.

	The Group			
	Level 1	Level 2	Level 3	Total
	\$'000	\$'000	\$'000	\$'000
As at 31 December 2010				
Financial assets				
Investment securities	904,175	613,912	207,723	1,725,810
As at 31 December 2009

Investment securities	765,956	518,669	334,215	1,618,840
	The Company			
	Level 1	Level 2	Level 3	Total
	\$'000	\$'000	\$'000	\$'000
As at 31 December 2010				
Financial assets				
Investment securities	656,977	331,232	195,060	1,183,269
As at 31 December 2009				
Financial assets				
Investment securities	567,888	322,919	308,712	1,199,519

31 December 2010

(expressed in Jamaican Dollars unless otherwise indicated)

33. Fair Value of Financial Instruments (Continued)

The quoted market price used for financial assets held by the group is current bid price. These instruments are included in level 1. Instruments included in level 1 comprise primarily equity investments classified as financial assets at fair value through profit and loss and available for sale.

The fair value of financial instruments that are not quoted on an exchange is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all inputs required to fair value an instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Specific valuation techniques used to value financial instruments include:

- (i) Quoted market prices or dealer quotes for similar instruments.
- (ii) Other techniques, such as discounted cash flow analysis used to determine fair value for the remaining financial instruments.

34. Litigation and Contingent Liabilities

The company and its subsidiaries are subject to various claims, disputes and legal proceedings, as part of the normal course of business. Provision is made for such matters, when, in the opinion of management, it is probable that a payment will be made by the group, and the amount can be reasonably estimated.

In respect of claims asserted against the group which, according to the principles outlined above have, not been provided for, management is of the opinion that such claims are either without merit, can be successfully defended or will result in exposure to the group which is immaterial to both financial position and results of operations.
