Directors' Statement

PERFORMANCE HIGHLIGHTS

Net Profit of J\$1.26 billion

Earnings per Stock Unit of J\$0.74, (2013 - \$0.89)

Net Interest Income up 12.0%

Operating Revenue of J\$4.98 billion, grew by 19.9%

Efficiency ratio 69.6% (2013 – 56.3%)

The Directors are pleased to announce that the JMMB Group has posted a net profit of J\$1.26 billion and earnings per share of J\$0.74 for the six month period ended 30 September 2014. Operating revenues grew to J\$4.98 billion reflecting a 19.9% increase over prior period, mainly driven by expansion of the Group through its acquisitions.

The Group's Net Interest Income (NII) showed positive growth year-over-year moving from J\$2.41 billion to J\$2.70 billion, an increase of J\$289.6 million or 12.0%, which was the result of expanded business lines through the acquisition of Intercommercial Bank Limited (IBL) in October 2013, coupled with effectively managing the Group's investment portfolio and cost of funds. Other operating revenues, namely, gains on securities trading, foreign exchange margins from cambio trading, and commission income also reflected increases of 17.5%, 112.8% and 34.8% respectively, these were driven largely by volume increases and taking advantage of market opportunities.

Our operations in the Dominican Republic continue to produce positive results contributing J\$274.9 million to the Group and in Trinidad & Tobago, Intercommercial Bank Limited (IBL) contributed J\$121.3 million to the Group's earnings.

Operating expenses increased from \$2.34 billion to \$3.48 billion. Expenses associated with the expansion of the Group through the acquisition of IBL accounted for \$715.1 million (63%) of this increase and the remaining \$420.9 (37%) is explained by costs associated with integration, growth in subsidiaries in the regional markets, increase in asset tax and normal inflationary increases.

One of the effects of the increase in operating costs was that the Group's efficiency ratio (administrative costs as a percentage of operating revenue) slipped from 53.6% in 2013 to 69.6%. This is expected to be temporary as Management is taking corrective measures.

Regulatory Capital Requirements

The Company continues to exceed its regulatory capital requirements. The Company's capital to risk weighted assets ratio stood at 14.4% whereas the Financial Services Commission (FSC) benchmark stipulates a minimum of 10%. The Company's capital to total assets ratio was 12.8% (2013 – 11.9%) whereas the FSC benchmark is 6%.

Corporate Social Responsibility

The JMMB Group continued to affirm its dedication to nation-building across the region in which it operates. During the second quarter of 2014/15, the primary focus was placed on educational, entrepreneurial, and community development initiatives.

In Jamaica, the Joan Duncan Foundation, the philanthropic arm of JMMB awarded over three million dollars (J\$3M) in scholarships for the new academic year; donated several blood pressure machines to the Kingston Public Hospital (KPH); provided financial support to childhood blindness research, in a bid to improve the care and treatment for the visually impaired; and made a financial contribution to the Junior Achievement Company of Entrepreneurs (JACE) programme.

JMMB's corporate social responsibility efforts in Trinidad & Tobago have been focused on youth development through community involvement, learning, health and wellness. Each JMMB branch continued to play a role through team members who lend their time and talent, supported by financial aid from the company, to respective children's homes.

In the Dominican Republic, JMMB Puesto de Bolsa continued to provide financial support to the Madelaes Foundation, in support of the welfare of orphaned girls; to FUNDARAS, an organization that provides training with assertive communication to schools and universities; and to UNPHU Emprende, the Entrepreneur division of the Universidad Nacional Pedro Henriquez Ureña. In addition, the La Chiva Gloria Program, an Urban Art project that builds public awareness about art, and supports the development of art programs for new artists and children, was sponsored by the company.

General

The JMMB Group continues to invest for the future with its key strategic imperative of building core revenues across diversified business lines locally and through our regional territories.

As the Group continues to focus on long term sustainable growth and on enhancing shareholder value, the Directors extend sincere appreciation to our clients, team members and shareholders who continue to support and contribute to its success.

Noel A. Lyon
Chairman

Keith P. Duncan
Group Chief Executive Officer

Notes to the Financial Statements

Period ended 30 September 2014

(Expressed in Jamaican dollars unless otherwise indicated)

1. Identification (Continued)

On 30 April 2014, JMMB Investments (Trinidad and Tobago) Limited, a 100% owned subsidiary, acquired 100% equity of AIC Securities Limited for TT\$5.36 million (J\$92.7 million) (Note 3).

2. Summary of Significant Accounting Policies

(a) Basis of preparation

The Group's consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS). These consolidated financial statements have been prepared under the historical cost convention as modified by the revaluation of available-for-sale financial assets and financial assets at fair value through profit or loss, as well as investment properties.

There have been no changes in accounting policies since the most recent audited accounts as at 31 March 2014.

All amounts are stated in Jamaican dollars unless otherwise indicated.

(b) Basis of consolidation

The consolidated financial statements include the assets, liabilities and results of operations of the company and its subsidiaries presented as a single economic entity.

Subsidiaries are all entities over which the company has the power to govern the financial and operating policies, generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the company controls another entity. Subsidiaries are consolidated from the date on which control is attained by the Group. They are no longer consolidated from the date that control ceases.

Intra-group transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred. Accounting policies of subsidiaries are consistent with those of the Group.

Jamaica Money Market Brokers Limited

Notes to the Financial Statements

Period ended 30 September 2014

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(b) Basis of consolidation (continued)

The Group uses the acquisition method of accounting for business combinations. The cost of acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the consolidated statement of revenue and expenses.

(i) Non-controlling interest

Non-controlling interest (NCI) are measured at their proportionate share of the acquiree's identifiable net assets at the acquisition date.

(ii) Loss of control

When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related non-controlling interest (NCI) and other components of equity. Any resulting gain or loss is recognised in profit or loss. Any interest retained in the former subsidiary is measured at fair value

(iii) Associates

Associates are all entities over which the Group has significant influence, but not control, over the financial and operating policies. The consolidated financial statements include the Group's share of the total recognised gains and losses of associates on the equity basis, from the date that significant influence commences until the date that influence ceases. When the Group's share of losses in an associate exceeds its interest in the associate, the Group's carrying amount is reduced to nil and recognition of further losses is discontinued except to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of an associate.

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(c) Segment reporting

A segment is a distinguishable component of the Group that is engaged either in providing related products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments. Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is the Board of Directors.

(d) Taxation

Income tax on the profit or loss for the year comprises current and deferred tax. Income tax is recognised in the income statement except to the extent that it relates to items recognised directly to equity, in which case it is recognised in other comprehensive income.

(i) Current taxation

Current income tax is the expected tax payable on the taxable income for the year, using tax rates enacted at the reporting date, and any adjustment to income tax payable in respect of previous years.

(ii) Deferred taxation

Deferred income tax is provided using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted at the reporting date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

2. Summary of Significant Accounting Policies (Continued)

(e) Cash and cash equivalents

Cash comprises cash in hand, demand and call deposits with banks and very short-term balances with other brokers/dealers. Cash equivalents are highly liquid financial assets that are readily convertible to known amounts of cash (that is, with original maturities of less than three months), which are subject to insignificant risk of changes in value, and are used for the purpose of meeting short-term commitments. Cash and cash equivalents are carried at cost.

Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

(f) Resale and repurchase agreements

Transactions involving purchases of securities under resale agreements ('resale agreements' or reverse repos) or sales of securities under repurchase agreements ('repurchase agreements' or 'repos) are accounted for as short-term collateralised lending and borrowing, respectively. Accordingly, securities sold under repurchase agreements remain on the statement of financial position and are measured in accordance with their original measurement principles. The proceeds of sale are reported as liabilities and are carried at amortised cost. Securities purchased under resale agreements are reported not as purchases of the securities, but as receivables and are carried in the statement of financial position at amortised cost. It is the policy of the Group to obtain possession of collateral with a market value in excess of the principal amount loaned under resale agreements.

Interest earned on resale agreements and interest incurred on repurchase agreements is recognised as interest income and interest expense, respectively, over the life of each agreement using the effective interest method.

(g) Financial assets

The Group classifies its financial assets into the following categories: financial assets at fair value through profit or loss, loans and receivables and available-for-sale financial assets. Management determines the classification of its financial assets at initial recognition.

Investments

Available-for-sale financial assets

The Group's investments in equity securities and certain debt securities are classified as available-for-sale and are carried at fair value except for unquoted equity securities whose fair value cannot be reliably measured, which are carried at cost. Changes therein, other than impairment losses, and foreign exchange gains and losses on available-for-sale monetary items, are recognised in other comprehensive income and reflected in investment revaluation reserve in equity. When an investment is derecognised, the cumulative gain or loss in equity is transferred to profit and loss account.

2. Summary of Significant Accounting Policies (Continued)

(g) Financial assets (continued)

Investments at fair value through profit or loss

The Group carries some investment securities at fair value through profit or loss if they are held for trading or designated as such upon initial recognition. Financial instruments are designated at fair value through profit or loss if the Group manages such investments and makes purchase and sale decisions based on their fair value. Upon initial recognition, attributable transaction costs are recognised in profit or loss when incurred. Financial instruments at fair value through profit or loss are measured at fair value and changes therein are recognised in profit or loss.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments, that are not quoted in an active market, and that the Group does not intend to sell immediately or in the near term.

Loans and receivables are measured at amortised cost using the effective interest method, except when the Group chooses to designate the loans and receivables at fair value through profit or loss.

Investment properties

Investment properties are held for rental yields and fair value gains and are not occupied by the Group. Investment properties are treated as a long-term investment and are carried at fair value, representing open market value determined annually by the directors or by independent valuers. Changes in fair values are recognised in the profit or loss. Rental income from investment properties is recognised in the profit and loss on a straight line basis over the tenor of the lease.

(h) Borrowings

Borrowings (other than repos) are recognised initially at fair value net of transaction costs incurred. Borrowings are subsequently stated at amortised cost with any difference between cost and redemption value being recognised in the profit and loss account over the period of the borrowings using the effective interest method.

(i) Earnings per stock unit

Earnings per stock unit ("EPS") is computed by dividing profit attributable to the equity holders of the parent of J\$1,208,831,000 (2013 – J\$1,450,406,000) by the weighted average number of stock units in issue during the period, numbering 1,630,552,530 (2013 – 1,630,552,530).

(j) Managed funds

The company acts as agent and earns fees for managing clients' funds on a non-recourse basis under a management agreement. At 30 September 2014, funds managed in this way amounted to J\$32,803,456,000 (2013 – J\$23,189,342,000).

(k) Comparative Information

Where necessary, comparative figures have been reclassified to conform with changes in presentation in the current period.

3. Business Combinations

Acquisition of AIC Securities Limited (AIC)

On 30 April 2014, JMMB Investments (Trinidad and Tobago) Limited, a 100% owned subsidiary, acquired 100% equity of AIC Securities Limited for TT\$5.36 million (J\$92.7 million).

Valuations of acquired tangible and intangible assets are not finalised. Management has utilised provisions under IFRS 3 which allows the acquirer reasonable time to obtain information necessary to identify and measure identifiable assets acquired and liabilities assumed. Management expects that this assessment will be concluded by the financial year end. Details of the provisional purchase price allocation among net assets acquired and goodwill are as follows:

	\$'000
Purchase consideration – cash paid	92,708
Fair value of net assets acquired	<u>(102,387)</u>
Negative goodwill	<u>(9,679)</u>

The assets and liabilities arising from the acquisition are as follows:

	Fair Value
	\$'000
Cash and cash equivalents	77,846
Investment and resale agreements	97,478
Property, plant and equipment and intangible assets	7,796
Income tax recoverable	23
Accounts receivable	33,811
Taxation payable	(17)
Accounts payable	<u>(114,550)</u>
Net assets	<u>102,387</u>
Cash consideration	(92,708)
Cash and cash equivalents acquired	<u>77,846</u>
Net cash outflow on acquisition	<u>(14,862)</u>

Since the acquisition, the acquired business has contributed J\$11,463,000 in revenues and incurred operating expenses of J\$18,865,000 for the Group.
