These financial statements have been prepared in accordance with the International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"). The financial statements are expressed in USD (United States Dollars) which is the functional currency of the Company.

2.2 Use of accounting estimates

Summary of Significant Accounting Policies (Continued)

2.3 Foreign currency translation (continued)

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Foreign exchange gains and losses that relate to cash and cash equivalents are presented in profit or loss within 'Foreign exchange loss'. All other foreign exchange gains or losses are presented in profit or loss within 'other (losses)/gains- net'.

Trade payables are recognized initially at the transaction price and subsequently measured at amortised cost using the effective interest method.

2.6 Investments in joint ventures

Joint venture investments are recognized in accordance with 'IAS 28 Investments in Associates and Joint Ventures' using the equity method of accounting. Under the equity method of accounting the investment is initially recognised at cost, and subsequently adjusted thereafter for the post-acquisition change in the investor's share of the investee's net assets. The investor's profit or loss includes its share of the investee's profit or loss and the investor's other comprehensive income includes its share of the investee's other comprehensive income. Equity method investments are assessed for impairment in accordance with 'IAS 36- Impairment of Assets' and when identified are charged against the carrying value of the investment in the joint venture.

2.7 Share capital

Ordinary shares are classified as equity. Equity instruments are measured at the fair value of the cash or other resources received or receivable, net of the direct costs of issuing the equity instruments. If payment is deferred and the time value of money is material, the initial measurement is on a present value basis.

2.10 Related parties

Transactions between the Company and related parties are accounted for as related party transactions if one of the parties has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. 2.12 Underwriting costs

Cost incurred in connection with stock exchange listings may include registration and other regulatory fees, amounts paid in legal, accounting and other professional advisers, printing costs and stamp duties.
