

SCOTIA GROUP JAMAICA REPORTS THIRD QUARTER OF FISCAL 2021 RESULTS

Scotia Group reports net income of \$7.28 billion representing an increase of 31% for the nine months ended July 31, 2021, compared to \$5.56 billion as at the corresponding period last year.

The improved performance was underpinned by strong collaboration across all business lines which has enabled the Group to continue to execute well on our Customer First strategy.

Today, the Board of Directors approved an interim dividend of 35 cents per stock unit in respect of the third quarter, which is payable on October 20, 2021 to stockholders on record as at September 28, 2021.

Commenting on the Group’s performance, Scotia Group President and CEO, Audrey Tugwell Henry said, “We are proud to deliver another quarter of strong results for our shareholders. Our clearly defined strategy of investing in our people, processes, products and technology continue to drive the business forward despite the very real obstacles present in the current business landscape. Notwithstanding the challenges, the Group continues to perform well as we focus on the needs of our customers. Our deposits continue to grow, with an increase of 11% versus prior year as customers consistently choose Scotiabank as their financial partner. Our mortgage book also showed solid performance, recording growth of 11% year over year. Scotia Insurance had a commendable quarter with the number of policies sold increasing by 2% when compared to the corresponding period last year. This is an area that we will continue to prioritize, as we ensure that our customers have adequate protection for all eventualities. Scotia Investments delivered a solid contribution to the Group’s results and we expect further improvements as the economy recovers.

During the quarter, the Group continued to advance our Customer First strategy which ultimately seeks to help customers achieve their financial goals. A critical component of this strategy is the optimization of our business through continued investment in digital technology to make everyday banking easier. In July we made further enhancements to our mobile banking app including the ability to transfer funds to pay personal or third-party loans, easier payment of credit cards, and upgrades to our data encryption to further improve security. Our efforts in the digital banking space were recently recognized as the Most Innovative in Data by *The Banker’s* Global Innovation in Digital Banking Awards 2021. Significant advances were made in the area of service delivery as we aim to offer customers a best-in-class experience. Our Customer Experience Unit was recently expanded to support our branches and call centre to ensure that all customer concerns are addressed and resolved in the shortest possible time. Several new promotions were launched for personal banking products including mortgages, credit cards and personal loans, which were well received by the market.

Our SME customers remain a key segment for us and we are committed to offering the best financial advice and solutions to support them to be successful. In June, the Bank boldly introduced a special, market leading rate of 6.5% for secured loans to the industry. The response from the market has been very positive and is demonstrative of the recovery taking place.

While the overall growth outlook for 2021 has been dampened by the recent resurgence in COVID-19 cases commencing the country's third wave and resulting in a retightening of containment measures, we remain optimistic. We know that as a country and a people we are very resilient. As we look towards the final quarter of the year, we will continue to execute on our digital transformation initiatives, upgrade and expand our ABM network, provide relevant financial solutions to meet our customers' needs and focus on enhancing customer experience right across the Scotia Group. We will continue to focus on delivering high quality financial services through our team of dedicated staff members, with the clear objective of making it easier to do business with us.

I would like to thank our dedicated team of Scotiabankers for delivering another quarter of strong results, our Board of Directors who continue to offer invaluable support and guidance to the leadership team and our shareholders for continuing to place their trust in us. Finally, I would like to thank our customers for choosing Scotiabank every day."

GROUP FINANCIAL PERFORMANCE

TOTAL REVENUES

Total revenues excluding expected credit losses for the nine months ended July 31, 2021 was \$31.7 billion and reflected a reduction of \$350 million or 1.1% over the corresponding prior period.

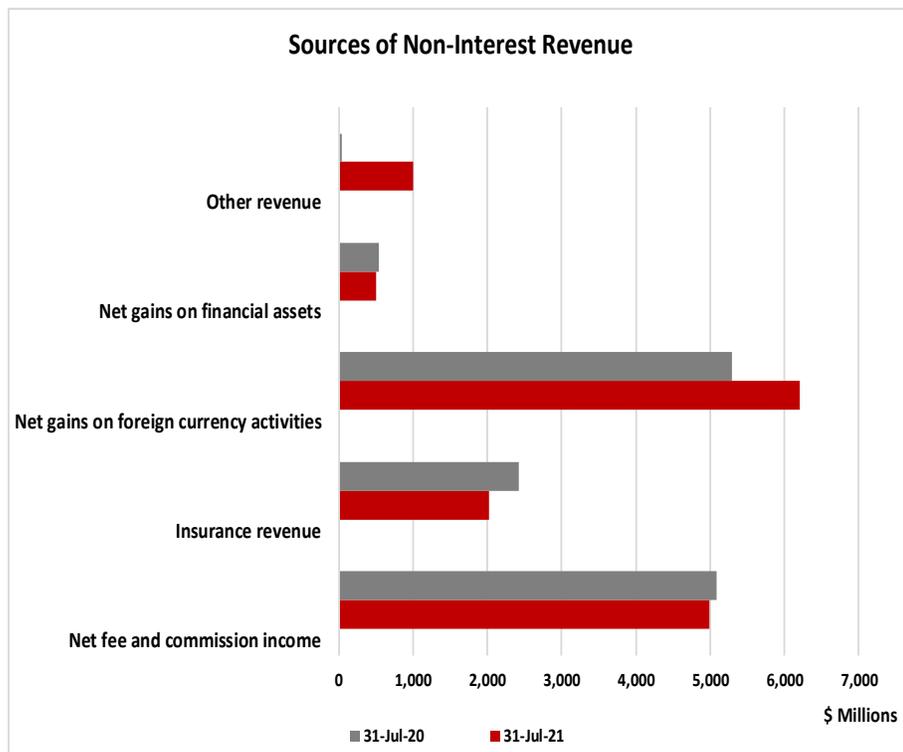

Total revenues continue to be heavily impacted by the COVID-19 pandemic as evidenced by the ongoing reduction in interest rates offered in the market and lower transaction volumes, which have contributed to a reduction in the Group's net interest income, lower net fee and commissions as well as insurance revenues.

Net interest income after expected credit losses for the nine month period was \$15.0 billion up \$1.6 billion or 11.6% when compared to the corresponding period last year and was primarily attributable to the reduction in expected credit losses of \$3.3 billion. Prior period results included higher provisioning given the revised assumptions incorporated in the impairment methodology, in conjunction with the adoption of a more prudent approach in determining credit loss provisions.

OTHER REVENUE

Other income, defined as all income other than interest income increased by \$1.4 billion or 10.1%.

- Net fee and commission income amounted to \$5.0 billion and showed a reduction of \$94 million or 1.9%. The year over year decline noted in fee and commission revenues was primarily attributable to lower transaction volumes stemming from the COVID-19 pandemic in conjunction with the continued execution of the Group's digital adoption strategy geared towards educating customers about our various electronic channels which attract lower fees.
- Insurance revenues decreased by \$397 million or 16.4% to \$2.0 billion due to the reduction in premium income stemming from the pandemic as well as lower actuarial reserve releases.

- Net gains on foreign currency activities and financial assets amounted to \$6.7 billion, representing an increase of \$877 million or 15%.
- Other revenue increased by \$965 million (over 100%) when compared to the prior period and was attributable to gains realized on the extinguishment of debt facilities.

CREDIT QUALITY

Expected credit losses for the year showed a reduction of \$3.3 billion when compared to 2020. The higher credit losses reflected in the prior period was mainly driven by additional provisions recorded on account of the revised assumptions incorporated in the Group's impairment methodology stemming from the COVID-19 pandemic.

The Group's credit quality remains strong and we are well provisioned with accumulated credit losses (ACLs) for both our performing and non-performing loans, ensuring adequate coverage for possible future net write offs.

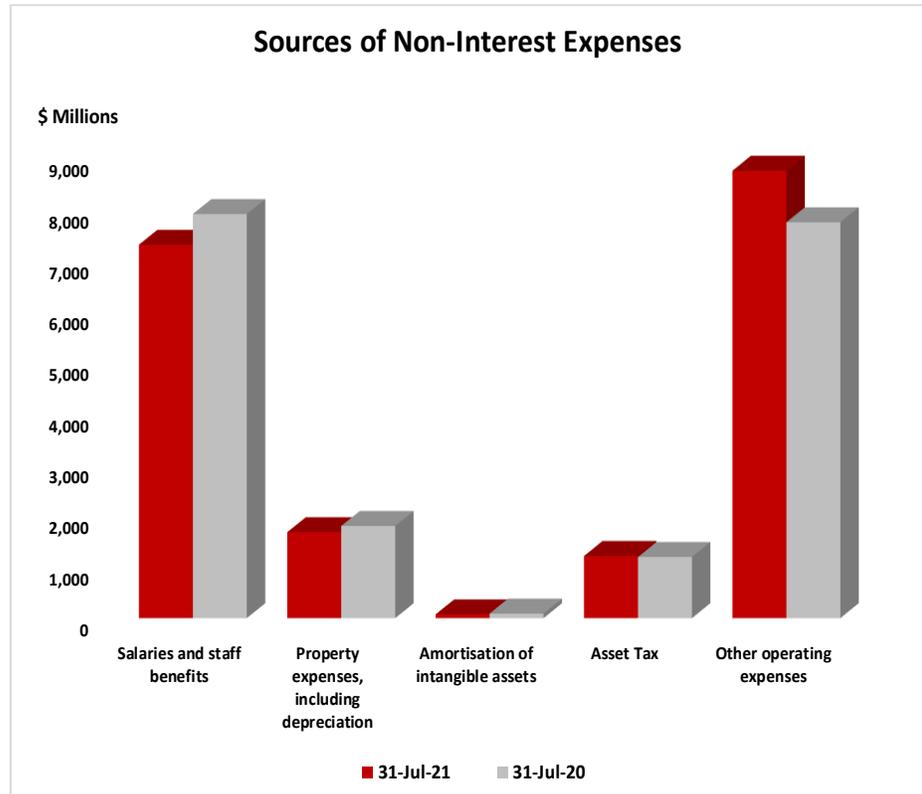

Non-accrual loans (NALs) as at July 31, 2021 totaled \$6.1 billion compared to \$4.9 billion for the corresponding period. The Group's NALs represent 2.7% of gross loans up from 2.1% as at July 2020 and 1.1% of total assets (July 2020 – 0.9%). Of note, the Group's NALs as a percentage of gross loans continue to be below the industry average. The Group's aggregate expected credit losses for loans as at July 31, 2021 was \$6.2 billion, representing 101.1% coverage of total non-performing loans.

OPERATING EXPENSES AND PRODUCTIVITY

Operating expenses amounted to \$19 billion for the period and reflected an increase of \$292 million or 1.6% over the corresponding prior year period. This was primarily attributable to an increase in other operating expenses of \$1 billion which was partially offset by the reduction in salaries and staff benefit costs of \$602 million (due to continued expense management initiatives despite restructuring provisions recorded). The increase noted in other operating expenses was due to restructuring costs and technology expenses. Excluding restructuring and other one-off expenses, operating expenses would be \$263 million or 1.4% lower than the prior comparative period.

Asset tax expenses, increased year over year by \$20 million or 1.7% to \$1.2 billion given an increase in the Group's assets.

Our productivity ratio for the period was 60% compared to 58.5% recorded for the prior comparative period.

GROUP FINANCIAL CONDITION

ASSETS

The Group's asset base increased over the prior period by \$34.2 billion to \$578.3 billion as at July 31, 2021. This was predominantly as a result of the growth in our cash resources of \$30.5 billion (26.3%), investment securities of \$1.5 billion (0.9%) and other assets of \$7.5 billion (17%) which was partially offset by the reduction in our loan portfolio of \$5.3 billion (2.4%).

Cash Resources

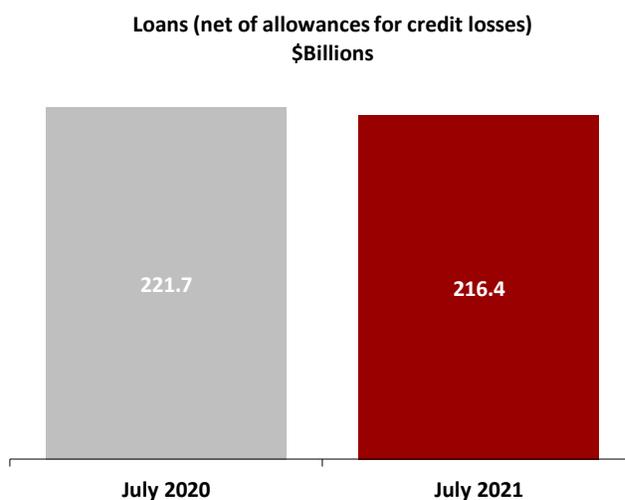

Our cash resources held to meet statutory reserves and the Group's prudential liquidity targets stood at \$146.7 billion, increasing over the comparative period by \$30.5 billion or 26.3%. The increase noted was directly attributable to the growth in our core deposits in conjunction with loan repayments. The Group continues to maintain adequate liquidity levels to enable us to respond effectively to changes in our cash flow requirements.

Securities

Total investment securities including pledged assets, increased by \$1.5 billion or 0.91% to \$163.3 billion when compared to the corresponding period (July 2020 - \$161.9 billion). The increase noted was due to the purchase of additional securities.

Loans

Our loan portfolio showed a reduction by \$5.3 billion or 2.4% over the prior year period, with loans after allowances for credit losses reducing to \$216.4 billion. Loan repayments coupled with lower loan demand in light of the global pandemic accounted for the year over year movement.

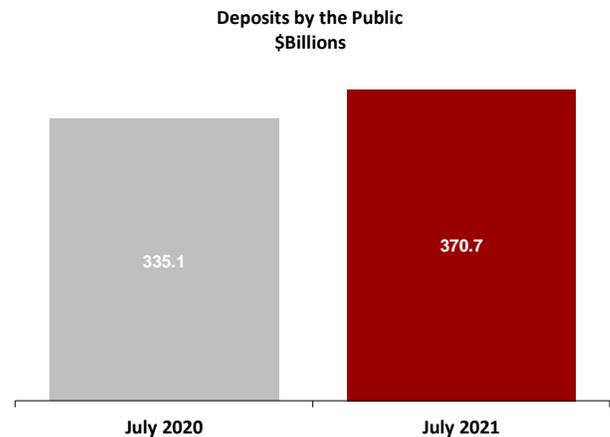

LIABILITIES

Total liabilities were \$462.1 billion as at July 31, 2021 and showed an increase over the comparative period of \$28.1 billion or 6.5%. The increase noted was driven mainly by increased customer deposits, other liabilities, deferred taxation as well as a higher retirement benefit obligation which was partially offset by the reduction in capital management fund balances.

Deposits

Deposits by the public increased to \$370.7 billion, up from \$335.1 billion when compared to the corresponding period. The \$35.6 billion or 10.6% growth in core deposits was reflected in higher inflows from our retail and commercial customers, signaling continued confidence in the strength of the Group.

Obligations related to repurchase agreements, capital management and government securities funds

Net obligations decreased by \$3.1 billion or 15.7% over the prior period. Our strategic focus continues to be geared towards growing our off-balance sheet business, namely, mutual funds and unit trusts. As at July 2021 our asset management portfolios grew by \$14 billion or 7.9% given the performance of the portfolios and the stock market.

Policyholders' Fund

The Policyholders' Fund reflects the insurance contract liabilities held at Scotia Insurance for our flagship product ScotiaMINT. The Fund stood at \$45.6 billion as at July 2021 compared to \$45.2 billion as at July 2020. Our Scotia Affirm product continues to perform well, growing 29% year over year with a current net asset value of \$1.1 billion. The increase noted was attributable to our strong sales effort coupled with the improved performance of the stock market.

Other Liabilities

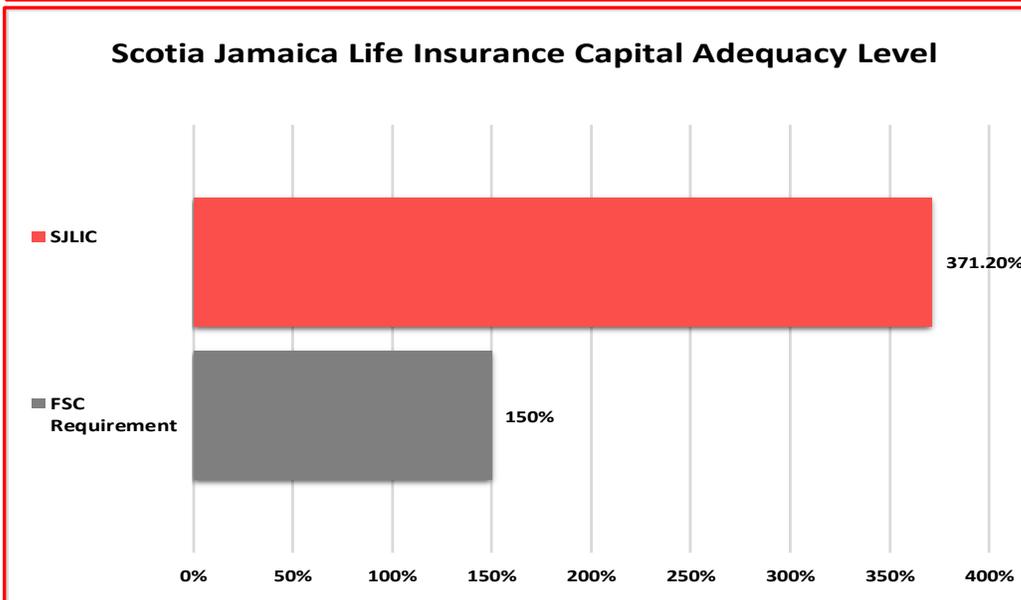

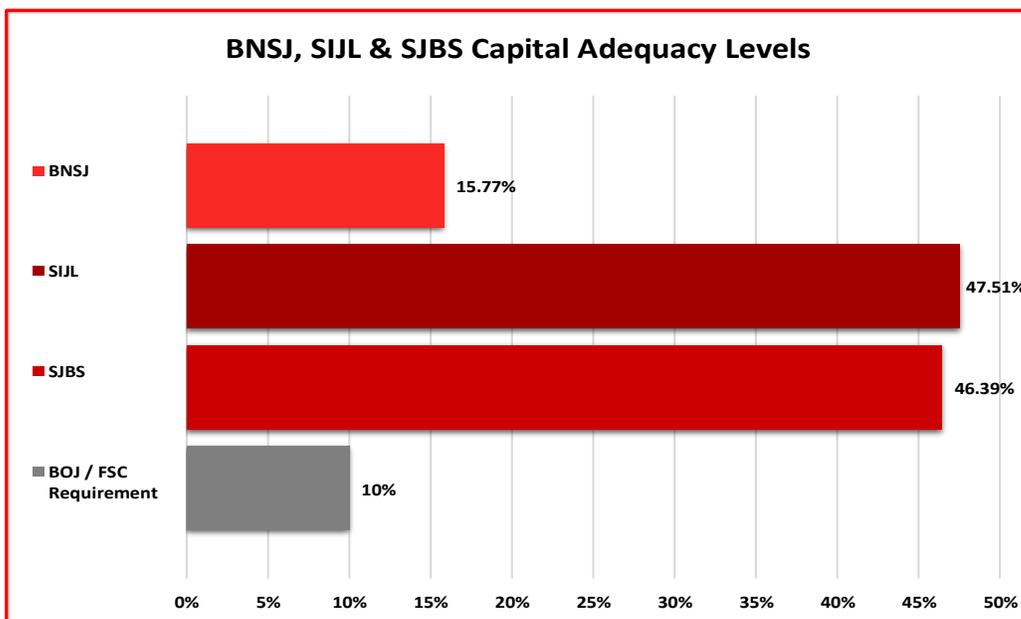

Other liabilities showed an increase of \$2.7 billion or 10.7% over the comparative period and totaled \$27.5 billion as at July 2021. This was attributable to an increase in other liabilities of \$982 million or 8% from the timing of accrued operating expenses, increase in deferred taxation of \$903 million or 11.2% due to the change in the retirement benefit asset, as well as an increase in the retirement benefit obligation of \$765 million or 17% resulting from the revised assumptions used in the actuarial valuation.

CAPITAL

Shareholders' equity available to common shareholders increased by \$6.1 billion or 5.5% over the comparative period to \$116.2 billion. This was due primarily to the re-measurement of the defined benefit pension plan assets coupled with internally generated profits which was partially offset by dividends paid.

We continue to exceed regulatory capital requirements in all our business lines, and our strong capital position also enables us to manage increased capital adequacy requirements in the future and take advantage of growth opportunities.

Our regulatory capital adequacy levels versus the minimum requirement is shown below:

SCOTIABANK COMMITMENT TO THE COMMUNITY

Social Impact

Over the past quarter the Bank continued to deepen its involvement with the community through various projects.

Labour Day 2021

In May, donations totaling \$1 million were provided for two local organizations that spearheaded Labour Day 2021 projects in Central and Western Jamaica. In partnership with the South St. Catherine Chamber of Commerce and The United Way of Jamaica, refurbishment, sanitation and beautification works were carried out at the Old Harbour Market, the Catadupa Health Clinic in St. James, The Green Island High School, and the Lucea Infant School located in Westmoreland.

COVID-19

In July, the Bank also continued to bolster the island's response to the COVID-19 pandemic with an additional donation of \$2.5 million to the University Hospital of the West Indies (UHWI) for the purchase of five Bi-level Positive Airway Pressure (BiPAP) machines. These provide non-invasive ventilation used to facilitate breathing and are a favoured option in the treatment of patients battling COVID-19.

Dr. Kevin Metalor (centre), Head of Department of Anaesthesia and Intensive Care at UHWI and Dr. Carl Bruce (right), Medical Chief of Staff at the UHWI accept a donation of \$2.5 million from Yanique Forbes-Patrick (left), VP Public Affairs and Communications — Scotiabank Jamaica,

SCOTIA Rise

In line with the Bank's new philanthropic focus of fostering economic resilience within the communities that we serve, a partnership with One on One Educational Services Ltd. was created to provide exam preparation assistance for students preparing to sit the upcoming CSEC exams. Approximately 1,000 students will benefit from the initiative.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**July 31, 2021****1. Identification**

Scotia Group Jamaica Limited (the Company) is a 71.78% subsidiary of Scotiabank Caribbean Holdings Limited, which is incorporated and domiciled in Barbados. The Bank of Nova Scotia, which is incorporated and domiciled in Canada, is the ultimate parent.

The Company is the parent of The Bank of Nova Scotia Jamaica Limited (100%) and Scotia Investments Jamaica Limited (100%). All subsidiaries are incorporated in Jamaica, except for Scotia Asset Management (Barbados) Inc.

2. Significant accounting policies**(a) Basis of presentation*****Statement of compliance***

The condensed interim consolidated financial statements have been prepared in accordance with IAS 34, 'Interim financial reporting'. The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those applied in the preparation of the Group's annual audited consolidated financial statements for the year ended October 31, 2020, which was prepared in accordance with International Financial Reporting Standards (IFRS).

Functional and presentation currency

The condensed interim consolidated financial statements are presented in Jamaican dollars, which is the Group's functional currency. All financial information has been expressed in thousands of Jamaican dollars unless otherwise stated.

Basis of consolidation

The consolidated financial statements include the assets, liabilities, and results of operations of the Company and its subsidiaries presented as a single economic entity. Intra-group transactions, balances, and unrealized gains and losses are eliminated in preparing the consolidated financial statements.

3. Critical accounting estimates and judgements

The preparation of financial statements, in conformity with IFRS requires management to make estimates, apply judgements and make assumptions that affect the reported amount of and disclosures relating to assets, liabilities, income and expenses at the date of the condensed interim consolidated financial statements. Estimates and judgements are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances, and are continually evaluated.

4. Financial Assets

Financial assets include both debt and equity instruments.

Classification and measurement

Debt instruments

Debt instruments, including loans and debt securities, are classified into one of the following measurement categories:

- Amortized cost;
- Fair value through other comprehensive income (FVOCI); or
- Fair value through profit or loss (FVTPL).

Classification of debt instruments is determined based on the business model under which the asset is held and the contractual cash flow characteristics of the instrument.

Equity instruments

Equity instruments are measured at FVTPL, unless an election is made to designate them at FVOCI upon purchase.

Allowance for expected credit losses

The group applies a three-stage approach to measure allowance for credit losses, using an expected credit loss approach as required under IFRS 9. Financial assets migrate through three stages based on the change in credit risk since initial recognition.

The Group's allowance for credit loss calculations are outputs of models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. This impairment model uses a three-stage approach based on the extent of credit deterioration since origination:

- Stage 1 – Where there has not been a significant increase in credit risk (SIR) since initial recognition of a financial instrument, an amount equal to 12 months expected credit loss is recorded. The expected credit loss is computed using a probability of default occurring over the next 12 months.
- Stage 2 – When a financial instrument experiences a SIR subsequent to origination but is not considered to be in default, it is included in Stage 2. This requires the computation of expected credit loss based on the probability of default over the remaining estimated life of the financial instrument.
- Stage 3 – Financial instruments that are considered to be in default are included in this stage. Similar to Stage 2, the allowance for credit losses captures the lifetime expected credit losses.

The Bank revised its allowance for credit losses (ACL) methodology in Q1 2020, by adding an additional, pessimistic forward-looking scenario. Previously, the Bank determined its ACL using three probability-weighted forward-looking scenarios. The base case represents the most likely outcome and the other scenarios represent more optimistic and pessimistic outcomes, to which probabilities are assigned. The addition of this scenario resulted in an increase in ACL of \$408 million (one-time impact) in Q1 2020.

5. Pledged Assets

Assets are pledged to other financial institutions, regulators, and the clearing house as collateral under repurchase agreements with counterparties.

(\$ Millions)	2021	2020
Capital Management and Government Securities funds	10,211	15,539
Securities with regulators, clearing houses and other financial institutions	1,830	1,832
	12,041	17,371

6. Insurance and investment contracts

Insurance contracts are those contracts that transfer significant insurance risks. Such contracts may also transfer financial risk. As a general guideline, the Group defines as significant insurance risk, the possibility of having to pay benefits at the occurrence of an insured event that is at least 10% more than the benefits payable if the insured event did not occur.

7. Property, plant and equipment including right of use assets

All property, plant and equipment are stated at cost less accumulated depreciation.

The Group recognizes a right of use asset and a lease liability at the commencement of the lease. The right of use asset is initially measured based on the present value of the lease payments.

8. Cash and cash equivalents

For the purpose of the cash flow statement, cash and cash equivalents include notes and coins on hand, unrestricted balances held with Bank of Jamaica, amounts due from other banks, and highly liquid financial assets with original maturities of less than ninety days, which are readily convertible to known amounts of cash, and are subject to insignificant risk of changes in their fair value.

9. Employee benefits

The Group operates both defined benefit and defined contribution pension plans. The assets of the plans are held in separate trustee-administered funds. The pension plans are funded by contributions from employees and by the relevant group companies, taking into account the recommendations of qualified actuaries.

(i) Defined Benefit Plan

The asset or liability in respect of the defined benefit plan is the difference between the present value of the defined benefit obligation at the reporting date and the fair value of plan assets.

Where a pension asset arises, the amount recognized is limited to the present value of any economic benefits available in the form of refunds from the plan or reduction in future contributions to the plan. The pension costs are assessed using the Projected Unit Credit Method.

9. Employee benefits (cont.)

(i) Defined Benefit Plan (cont.)

Under this method, the cost of providing pensions is charged as an expense in such a manner as to spread the regular cost over the service lives of the employees in accordance with the advice of the actuaries, who carry out a full valuation of the plan every year in accordance with IAS 19. Re-measurements comprising actuarial gains and losses, return on plan assets and change in the effect of asset ceiling are reported in other comprehensive income. The pension obligation is measured as the present value of the estimated future benefits of employees, in return for service in the current and prior periods, using estimated discount rates based on market yields on Government securities which have terms to maturity approximating the terms of the related liability.

(ii) Other post-retirement obligations

The Group also provides supplementary health care and insurance benefits to qualifying employees upon retirement. The entitlement to these benefits is usually based on the completion of a minimum service period and the employee remaining in service up to retirement age. The expected costs of these benefits are accrued over the period of employment, using an accounting methodology similar to that for defined benefit pension plans. These obligations are valued annually by qualified independent actuaries.

(iii) Defined contribution plan

Contributions to this plan are charged to the statement of revenue and expenses in the period to which they relate.

10. Segment reporting

The Group is organized into six main business segments:

- Retail Banking – this incorporates personal banking services, personal deposit accounts, credit and debit cards, customer loans and mortgages;
- Corporate and Commercial Banking – this incorporates non-personal direct debit facilities, current accounts, deposits, overdrafts, loans and other credit facilities;
- Treasury – this incorporates the Group’s liquidity and investment management function, management of correspondent bank relationships, as well as foreign currency trading activities;
- Investment Management Services – this incorporates investments, unit trusts, pension and other fund management, brokerage and advisory services, and the administration of trust accounts.
- Insurance Services – this incorporates the provision of life and medical insurance, individual pension administration and annuities;
- Other operations of the Group comprise the parent company.

Segment assets and liabilities comprise operating assets and liabilities, being the majority of items on the statement of financial position, but exclude items such as taxation, retirement benefits asset and obligation and borrowings. Eliminations comprise intercompany transactions and balances. The Group’s operations are located mainly in Jamaica. The operations of subsidiaries located overseas represent less than 10% of the Group’s operating revenue and assets.

11. Prior year adjustment

The Group has determined that acceptances, guarantees and letters of credit have not met the requirement for recognition as an asset or as a liability. This has been corrected by restating each of the affected financial statement line items for prior periods. The expected credit losses on acceptances, guarantees and letters of credit are included in other liabilities as a provision. This prior period adjustment does not have an impact on the group's and company's statements of revenue and expenses, comprehensive income, changes in shareholders' equity and cash flows for the year ended October 31, 2020. The following table summarizes the impact on the Group's and the Company's financial statements.

Statement of financial position

	October 2020			July 2020		
	As previously reported	Adjustments	As Restated	As previously reported	Adjustments	As Restated
