Chairman's Report to the Shareholders Third Quarter Ended September 30, 2021

Dear Shareholders,

On behalf of the board of directors, I am pleased to present the unaudited financial results of MPC Caribbean Clean Energy Limited (**Company or MPCCEL**) for the third quarter ended September 30th, 2021.

Third Quarter 2021 Activities

The Company is pleased to inform the Shareholders that the obligatory clearance of the capital raised via convertible note was finalized and the board of directors of MPCCEL approved the third subscription to the Investment Company for the drawdown of USD 10,000,000. Subsequently, on September 21st 2021, MPCCEL made an additional subscription of the funds to MPC Caribbean Clean Energy Fund LLC.

During the third quarter of the year, the commercial and technical performance of the underlying assets of the Company's investment in the Investment Company was lower than anticipated, impacted by unfortunate weather conditions and operational challenges. Fortunately, the tropical storms 'Elsa', 'Ida' and 'Grace' did not cause any damage to the underlying assets or had any negative impact on their performance.

Portfolio Highlights

KPI	Q3 2021
EBITDA	USD 644,594.18
Energy Output Variation ¹	-11.10%
Weighted Average Availability	97.58%

The asset performance for Q3 2021 was as follows:

Paradise Park

The technical performance of the solar park in Jamaica was slightly below the energy generation projections during the third quarter of 2021. The replacement of the defective DC cables was successfully completed at the end of July 2021. Performance ratios stabilized towards the end of the quarter, but the production target was slightly below expectations. The main reasons for this were technical problems caused by inverters that were replaced, however, have led to production constraints as well as an oil leak on an MV Transformer, which will be changed by the manufacturer in Q4 2021. This also affected the overall plant availability, which was below the expected targets. All

¹ Note: The Energy Output Variation is calculated as an accumulated difference of the actual generated energy (kWh) and the forecast (P50) energy output for the relevant period. P50 is essentially a statistical level of confidence and basis for our predicted energy generation.

Availability is defined as the percentage of time during a month that the wind turbine is operations-ready and available to produce power. This is independent of whether or not enough wind is available for the wind turbine to produce power. In regards to solar parks, it is the proportion of time that the is operations-ready and usable to produce power over a specified time period.

Please note that the productive irradiation hours and wind speeds are depending on short (daily), mid (monthly) and long-term (annual and multi-year) weather patterns. Therefore, the high degree of variability of revenue and cost patterns are shown and revenue and costs are not equally distributed throughout the year. Subsequently, the KPI are most meaningful in an annual comparison or with previous years' quarter (meaning comparing for instance Q3 of year (t) with Q3 of year (t-1) rather than with previous quarter.

things considered, this means that the good external influences, especially the high level of solar irradiation, could not be fully exploited in Q3.

Tilawind

The wind farm in Costa Rica continued to experience low levels of wind during the third quarter of this year. Tilawind carried out the annual maintenance work as planned as well as some of the planned blade repairs, which means that reliable operation can be expected. Due to a delivery disruptions for necessary chemicals to seal the blades, the entire scope could not be carried out. The remaining, but not critical repairs were planned with the O&M contractor during the low wind phase of the coming year.

From the commercial perspective and with regards to the tariff reductions mentioned in the last quarterly report, the Investment Company with its legal advisor have made their position clear by participating in ARESEP and the Company is confident that the tariff band will be adjusted and raised. Positive feedback has been received, however, the official timing of the tariff adjustment has not yet been communicated.

San Isidro

The solar park in El Salvador stabilized its performance with high plant availability and production output to the end of the quarter. The previously identified measures have been implemented and have led to the expected improvements. The remaining actions were agreed with the O&M contractor and will be carried out during a suitable period of time, when production is low in order to minimize any losses.

Outlook

We look forward to the last quarter of 2021, as all possible and necessary maintenance measures were carried out at the underlying assets and therefore is expected to show better performance. Also, this period is the end of the regional hurricane season, indicating positive solar radiation and the start of the high wind season. Therefore, the outlook remains positive for the remainder of 2021.

In addition, the acquisition of the Monte Plata solar park in the Dominican Republic will make the future portfolio for the Company's shareholders more robust and diversified.

Moreover, in view of the ongoing pandemic, the Company continues to believe that it is well equipped for future challenges due to tried and tested measures.

I thank our shareholders and my fellow directors for their support and trust during this precedent period.

Respectfully Yours,
For and on behalf of the Company

A handwritten signature in blue ink that reads "José Fernando Zúñiga G." with a stylized flourish at the end.

Fernando Zuniga

MPC CARIBBEAN CLEAN ENERGY LIMITED

Notes to the Financial Statements

For the period ended September 30, 2021

(Expressed in United States dollars)

1. General Information

MPC Caribbean Clean Energy Limited (the "Company") was incorporated on November 8, 2017, under the laws of Barbados as an International Business Company as defined by the International Business Companies Act 1991 - 24. With effect from January 1, 2019, the International Business Companies Act 1991-24 was repealed. The Company continues as a Regular Business Company under the Companies Act Cap. 308. The Company principally engages in investment holding.

The Company's registered number is:- 42056

The Company's registered office address is:-

Suite 1, Ground Floor
The Financial Services Centre
Bishop's Court Hill
St. Michael, Barbados, BB 140004

The Company's shares were listed on the Main Market of the Jamaican Stock Exchange and Trinidad Stock Exchange in January 2019.

2. Summary of Significant Accounting Policies

The principal accounting policies applied in the preparation of these interim financial statements are as compared with the most recent annual audited financial statements.

3. Basis of Preparation

The unaudited interim financial statements have been prepared in accordance with International Accounting Standards 34 - Interim Financial Statements. The interim financial statements should be read in conjunction with the annual financial statements for the year ended December 31, 2020, which have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

The unaudited interim financial statements are prepared under the historical cost convention and are expressed in United States Dollars (USD) which is the functional currency of the Company.

4. Loss per share

Earnings per share is calculated by dividing the profit or loss for the period by the weighted average number of ordinary shares in issue over that period.

	Period ended 30-Sep-21	Period ended 30-Sep-20
Net loss attributable to ordinary shareholders	(156,073)	(136,452)
Weighted average number of shares	21,666,542	21,666,542
Loss per share	(0.01)	(0.01)

MPC CARIBBEAN CLEAN ENERGY LIMITED

Notes to the Financial Statements

For the period ended September 30, 2021

(Expressed in United States dollars)

4. Loss per share (Continued)

On November 8, 2019, the company opened a Rights Issuance where existing shareholders were given the option to acquire two new shares for every share that they originally owned. All the non-exercised rights were made available to new investors to purchase.

The issuance period closed on January 10, 2020. All applications were satisfied in full and 10,242,382 new Class B shares were issued and allotted to applicants in both the markets of Jamaica and Trinidad and Tobago, increasing the total Class B shares issued to 21,666,542. On July 7, 2020, the corporate and AML requirements were completed and on July 13, 2020, the raised funds of USD 9,292,378.58, net of underwriting costs and administrative expenses, were invested into MPC Caribbean Clean Energy Fund LLC.

5. Investment

On September 21, 2021, the company transfer funds of USD 10,000,000.00 as the third subscription to MPC Caribbean Clean Energy Fund LLC.

The movements in the investments for the month ended September 30, 2021 and December 31, 2020 were as follows:

	Nine months ended 30-Sep-21	Audited Year ended
At January 1	19,226,718	9,907,530
Acquisition cost of investment	10,000,000	9,292,373
Valuation gain on investment	-	26,815
At September 30	<u>29,226,718</u>	<u>19,226,718</u>

6. Related Party Balances and Transactions

The following transactions were carried out with related parties:

Due to related party

The loan from the related party is unsecured, interest free, has no stated terms of repayment and includes: (i) Payments of fees by MPC Renewable Energies GmbH on behalf of the Company during the period ended December 31, 2020 and the related balances payable by the Company to MPC Renewable Energies GmbH as at December 31, 2020, and (ii) Directors fees (per agreements with Directors).

The carrying value of the 'Due to related party' is as follows:

	Nine months ended 30-Sep-21	Audited Year ended
At January 1	21,654	55,059
Related party payments of expenses	-	12,624
Reimbursement payments to related party	-	(46,029)
At September 30	<u>21,654</u>	<u>21,654</u>

MPC CARIBBEAN CLEAN ENERGY LIMITED

Notes to the Financial Statements

For the period ended September 30, 2021

(Expressed in United States dollars)

7. Long-term convertible promissory note payable

On November 6, 2020, MPC Caribbean Clean Energy Limited issued a convertible promissory note to RBC Trust (Trinidad & Tobago) Limited, (the 'Holder'), in the amount of USD 10,000,000. This convertible promissory note is non-interest bearing but entitles the Holder to distributions of profits of the Company, from and including the issuance date. The Holder of the note will be entitled to receive distributions of profits when dividends are declared, as if it were the holder of one Class B share for every USD 1 of the principal sum of the note held but limited to a maximum return of eight percent (8%) per annum. All payments of distributions in respect of this note shall be payable in same day funds to the Holder on the dates and times upon which dividends are declared and payable in respect of the Class B shares of the Company by the Directors of the Company.

At maturity, March 31, 2023, if the principal sum of the note is unpaid in cash on that date or earlier, the note will be converted into Class B shares of the Company at the rate of one Class B share for every one United States dollar (USD1) of the principal sum of the note held by the Holder. Such conversion will be subject to approval by a majority of the shareholders of the Company at a general meeting of the shareholders.
