GUARDIAN HOLDINGS LIMITED AND ITS SUBSIDIARIES
STATEMENT OF MANAGEMENT'S RESPONSIBILITIES

Management is responsible for the following:

- Preparing and fairly presenting the accompanying consolidated financial statements of GUARDIAN HOLDINGS LIMITED (the Company) and its subsidiaries (the Group) and which comprise the consolidated statement of financial position as at 31 December 2021, the consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information;
- Ensuring that the Group keeps proper accounting records;
- Selecting appropriate accounting policies and applying them in a consistent manner;
- Implementing, monitoring and evaluating the system of internal control that assures security of the Group's assets, detection/prevention of fraud;
- Ensuring that the system of internal control operated effectively during the reporting period;
- Producing reliable financial reporting that complies with laws and regulations, including the Companies Act and Insurance Act; and
- Using reasonable and prudent judgment in the determination of estimates.

In preparing these audited consolidated financial statements, management utilised the International Financial Reporting Standards, as issued by the International Accounting Standards Board and adopted by the Institute of Chartered Accountants of Trinidad and Tobago. Where International Financial Reporting Standards presented alternative accounting treatments, management chose those considered most appropriate in the circumstances.

Nothing has come to the attention of management to indicate that the Group will not remain a going concern for the next twelve months from the reporting date.

Management affirms that it has carried out its responsibilities as outlined above.

Ravi Tewari
Group Chief Executive Officer

Independent auditor's report

To the Shareholders of Guardian Holdings Limited

Report on the audit of the consolidated financial statements

Our opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Guardian Holdings Limited (the Company) and its subsidiaries (together 'the Group') as at 31 December 2021, and their consolidated financial performance and their consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards.

What we have audited

The Group's consolidated financial statements comprise:

- the consolidated statement of financial position as at 31 December 2021;
- the consolidated statement of income for the year then ended;
- the consolidated statement of comprehensive income for the year then ended;
- the consolidated statement of changes in equity for the year then ended;
- the consolidated statement of cash flows for the year then ended; and
- the notes to the consolidated financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code). We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

Our audit approach

Overview

	<ul style="list-style-type: none">• Overall group materiality: TT\$50 million, which represents 5% of profit before taxation.
	<ul style="list-style-type: none">• We performed full scope audits for 6 components and audits of certain financial statement line items for 5 components.• Our group audit covered 93% of profit before taxation and 97% of total assets.
	<ul style="list-style-type: none">• Methodologies and assumptions used for determining insurance contract liabilities for life and annuity insurance contracts.• Valuation of unquoted corporate debt and government securities accounted for at fair value through profit and loss and fair value through other comprehensive income.• IFRS 9 'Financial Instruments' - Forward looking information.

Audit scope

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the consolidated financial statements. In particular, we considered where management made subjective judgments; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including, among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

How we tailored our group audit scope

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industries in which the Group operates.

Our group scoping was performed at the legal entity level. The following components were considered individually financially significant and were subject to full scope audits for group audit purposes:

- Fatum Holdings N.V.
- Guardian General Insurance Limited
- Guardian General Insurance Jamaica Limited
- Guardian Life of the Caribbean Limited
- Guardian Life Limited
- Guardian Re (SAC) Limited

For five other components, we identified account balances which were considered to be significant in size or audit risk at the financial statement line item level and performed audits over the specified balances. The Group engagement team performed analytical procedures over the remaining components that were not inconsequential. Our group scoping provided coverage of approximately 93% of profit before taxation and 97% of total assets of the Group.

In establishing the overall group audit strategy and plan, we determined the type of work that is needed to be performed at the components by the Group engagement team and by component auditors. Where the work was performed by either PwC or non-PwC network firm component auditors, we determined the level of involvement we needed to have in the audit work at those components to be able to conclude whether sufficient appropriate audit evidence had been obtained. The Group engagement team had regular interaction with the component teams during the audit process.

Materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

Based on our professional judgment, we determined certain quantitative thresholds for materiality, including the overall group materiality for the consolidated financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate, on the consolidated financial statements as a whole.

Overall Group materiality	TT\$50 million
How we determined it	5% of profit before taxation
Rationale for the materiality benchmark applied	We chose profit before taxation as the benchmark because, in our view, it is the benchmark against which the performance of the Group is most commonly measured by users, and is a generally accepted benchmark. We chose 5% which is within a range of acceptable benchmark thresholds.

We agreed with the Audit Committee that we would report to them misstatements identified during our audit above TT\$2 million, as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter	How our audit addressed the key audit matter
<p><i>Methodologies and assumptions used for determining insurance contract liabilities for life and annuity insurance contracts</i></p> <p><i>Refer to notes 2.15, 3(b), 4.1 and 21 to the consolidated financial statements for disclosures of related accounting policies and balances.</i></p> <p>As at 31 December 2021, actuarial reserves for life and annuity contracts accounted for TT\$17 billion or 60% of total liabilities of the Group.</p> <p>Economic assumptions such as investment return, associated discount rates and borrowing rates, policy expenses and assumptions such as mortality and persistency are key inputs used to estimate these long term liabilities. Management used internal actuarial experts along with external independent experts to assist in determining these assumptions and in valuing these long term liabilities.</p> <p>We focused on this area because the valuation of the provisions for the settlement of future claims involves complex and subjective judgments about future events, both internal and external to the business, for which small changes in assumptions may result in significant impacts to the valuation of these liabilities.</p>	<p>The approach to addressing the matter, with the assistance of our actuarial specialists, involved the following procedures, amongst others:</p> <ul style="list-style-type: none"> ● Tested the completeness, accuracy and reliability of the underlying data used by management to support the actuarial valuation. We tested a sample of contracts to assess whether contract features and demographic data corresponded to the data file provided by management to its external actuary. ● Evaluated the methodologies and assumptions used by management's actuarial experts considering industry and component specific facts and circumstances. Specific areas of focus were economic assumptions such as investment return, associated discount rates and borrowing rates, policy expenses and assumptions such as mortality and persistency, all of which are based on entity experience or publicly available information. <p>The results of our procedures indicated that significant estimates and assumptions used by management were not unreasonable, and that the methodologies used were actuarially established, accepted and appropriate in the circumstances.</p>

Key audit matter	How our audit addressed the key audit matter
<p data-bbox="296 383 807 501"><i>Valuation of unquoted corporate debt and government securities accounted for at fair value through profit and loss and fair value through other comprehensive income</i></p> <p data-bbox="296 535 839 654"><i>Refer to notes 2.9, 2.11 and 10 to the consolidated financial statements for disclosures of related accounting policies and balances.</i></p> <p data-bbox="296 696 869 999">As at 31 December 2021, unquoted corporate debt and government securities classified as fair value through profit or loss and fair value through other comprehensive income accounted for TT\$11 billion or 32% of total assets of the Group. To value these securities, management uses valuation techniques which require the application of a market yield curve adjusted by a risk premium to discount the contractual cash flows of the instruments.</p> <p data-bbox="296 1048 869 1167">We focused on this area as the yield curve is an unobservable input requiring management's judgment and estimation, which is subject to high estimation uncertainty.</p>	<p data-bbox="898 696 1471 790">Our approach to addressing the matter, with the assistance of our valuation expert, involved the following procedures, amongst others:</p> <ul data-bbox="898 797 1471 1473" style="list-style-type: none"> <li data-bbox="898 797 1471 891">● Updated our understanding of management's approach to performing the fair value assessment. <li data-bbox="898 902 1471 1055">This included updating our understanding of the process by which management's key assumptions and methodologies were developed and assessing their appropriateness. <li data-bbox="898 1066 1471 1245">● Tested key data inputs used in the valuation model, including issuance date, maturity date, coupon rate and risk premium at issuance, by performing confirmation procedures and comparison to source documents on a sample basis. <li data-bbox="898 1256 1471 1350">● Independently developed territory specific yield curves and compared them to management's yield curves. <li data-bbox="898 1361 1471 1473">● Tested on a sample basis, the contractual cash flows of the underlying securities by comparing to source documentation and evaluated the impact of variations. <p data-bbox="898 1518 1471 1657">The results of our procedures indicated that the key assumptions used by management for determining the fair value of unquoted corporate debt and government securities were not unreasonable.</p>

Key audit matter	How our audit addressed the key audit matter
<p><i>IFRS 9 'Financial Instruments' - Forward looking information</i></p> <p><i>Refer to notes 2.10, 3(e), 10 and 11 to the consolidated financial statements for disclosures of related accounting policies and balances.</i></p> <p>As at 31 December 2021, the Group's investment securities and loans and receivables subject to expected credit losses (ECL) were TT\$14 billion and TT\$2 billion respectively, gross of ECL. The total associated expected credit losses amounted to TT\$49 million and TT\$352 million respectively.</p> <p>In assessing impairment, IFRS 9 prescribes a forward looking ECL impairment model which takes into account reasonable and supportable forward looking information.</p> <p>Management applies an internally developed credit loss model. The estimation and application of forward looking information requires significant judgment. Stage 1 and Stage 2 credit loss allowances are modelled based on the macroeconomic variables (or changes in macroeconomic variables) which most closely correlate with credit losses in the relevant portfolio. Each macroeconomic scenario used in the ECL calculation incorporates forecasts of the relevant macroeconomic variables.</p> <p>For both investment securities and loans and receivables, management considered forward looking macroeconomic data by examining the future economic outlook of the countries where the instruments originate and adjusting the probability of defaults if necessary.</p> <p>We focused on this area due the complexity of the credit model used and the significant management judgment required in arriving at key assumptions such as those in relation to the forward looking macroeconomic information impacting management's model.</p>	<p>Our approach to addressing the matter, with the assistance of our valuation specialist, involved the following procedures, amongst others:</p> <ul style="list-style-type: none"> • Updated our understanding of management's ECL model including any changes to source data and assumptions. • Assessed the reasonableness of the Group's methodology for determining macroeconomic scenarios and the probability weightings applied. • Tested the critical data fields used in the expected credit loss model, such as the maturity date, amortised cost, accrued interest, credit rating and interest rate by tracing data back to source documents. • Sensitised the probability weightings used in the ECL calculation. • Tested, on a sample basis, the staging of the instruments by evaluating the accuracy of the initial credit risk and the credit risk at the reporting date. <p>The results of our procedures indicated that the assumptions used by management for determining the forward looking information in the ECL model were not unreasonable.</p>

Other information

Management is responsible for the other information. The other information comprises the supplemental information showing the USD translation of the primary statements appended to the consolidated financial statements (but does not include the consolidated financial statements and our auditor's report thereon), which we obtained prior to the date of this auditor's report, and the annual report, which is expected to be made available to us after that date.

Our opinion on the consolidated financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

Auditor's responsibilities for the audit of the consolidated financial statements (continued)

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

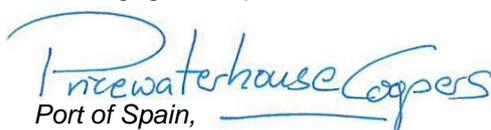

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Sean Ramirez.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

1. Incorporation and principal activities of the Group

Guardian Holdings Limited (the 'Company' and 'GHL') is a public limited liability holding company, which was incorporated in Trinidad and Tobago on 8 November 1982. The address of its registered office is 1 Guardian Drive, Westmoorings S.E., Trinidad and Tobago. Guardian Holdings Limited and its subsidiaries (the 'Group') constitute a diversified financial services group engaged in underwriting all classes of long-term and short-term insurance business, insurance brokerage operations, the provision of pension and asset management services and property development.

The Company is 61.77% (2020: 61.967%) owned by NCB Global Holdings Limited ('NCBGH' and the 'Parent'), a limited liability holding company, which was incorporated in Trinidad and Tobago in December 2017. NCBGH is 100% owned by NCB Financial Group Limited ('NCBFG'). NCBFG was incorporated in Jamaica in April 2016 and is the financial holding company for the NCB Group. NCBFG is 52.67% (2020: 51.75%) owned by AIC (Barbados) Limited and the ultimate parent company is Portland Holdings Inc., incorporated in Canada. Portland Holdings Inc. is controlled by Hon. Michael A. Lee-Chin, O.J., a director of the Company. The NCB Financial Group provides a diversified range of financial services through its subsidiaries and associates.

The ordinary shares of GHL and NCBFG are listed on the Trinidad and Tobago Stock Exchange and the Jamaica Stock Exchange.

2. Significant accounting policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied in all the years presented, unless otherwise stated.

2.1 Basis of preparation

These consolidated financial statements are prepared in accordance with International Financial Reporting Standards ('IFRS'). They have been prepared under the historical cost convention, except for the following classes of assets which are stated at fair value in compliance with the relevant IFRS: land and buildings, investment properties and financial assets at fair value through profit or loss or other comprehensive income.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies. Areas involving a higher degree of judgment or complexity or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 3.

(a) New standards and amendments/revisions to published standards and interpretations effective in 2021

The following amendment to published standards took effect for the Group's accounting periods beginning on or after 1 January 2021:

IFRS 16 Leases - Amendments - COVID-19-Related Rent Concessions

The amendment provides an optional practical expedient allowing lessees to elect not to assess whether a rent concession related to COVID-19 is a lease modification. Lessees adopting this election may account for qualifying rent concessions in the same way as they would if they were not lease modifications.

The practical expedient only applies to rent concessions occurring as a direct consequence of the COVID-19 pandemic and only if all of the conditions are met:

- a. the change in lease payments results in revised consideration for the lease that is substantially the same as, or less than the consideration for the lease immediately preceding the change;
- b. any reduction in lease payments affects only payments originally due on or before 30 June 2021; and
- c. there is no substantive change to the other terms and conditions of the lease.

The amendment had no material impact on the consolidated financial statements of the Group.

(b) New standards and amendments/revisions to published standards and interpretations effective in 2021 but not applicable to the Group

The following new IFRS amendments that have been issued do not apply to the activities of the Group:

- ▶ IFRS 9 Financial Instruments, IAS 39 Financial Instruments: Recognition and Measurement, IFRS 4 Insurance Contracts
IFRS 7 Financial Instruments: Disclosures and IFRS 16 Leases - Amendments - Interest Rate Benchmark Reform Phase 2

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.1 Basis of preparation (continued)

(c) New standards, interpretations and revised or amended standards that are not yet effective and have not been early adopted by the Group

The following is a list of new IFRS standards, interpretations and amendments issued that are not yet effective as at 31 December 2021 and have not been early adopted by the Group. The Group expects to implement these standards when they become effective.

Effective 1 January 2022:

- ▶ IFRS 3 Business Combinations - Amendments - Reference to the Conceptual Framework
- ▶ IFRS 16 Leases - Amendments - COVID-19-Related Rent Concessions beyond 30 June 2021
- ▶ IAS 16 Property, Plant and Equipment - Amendments - Proceeds before intended use
- ▶ IAS 37 Provisions, Contingent Liabilities and Contingent Assets - Amendments - Onerous contract - Cost of fulfilling a contract
- ▶ Annual Improvements to IFRSs 2018 - 2020 Cycle:
 - ▶ IFRS 1 First-time Adoption of International Financial Reporting Standards - Amendments - Subsidiary as a first-time adopter
 - ▶ IFRS 9 Financial Instruments - Amendments - Fees in the '10 per cent' test for derecognition of financial liabilities
 - ▶ IAS 41 Agriculture - Amendments - Taxation in fair value measurements

These amendments are not expected to have a material impact on the Group's financial statements.

Effective 1 January 2023:

- ▶ IAS 1 Presentation of Financial Statements - Amendments - Classification of liabilities as current or non-current
- ▶ IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 - Amendments - Disclosure of accounting policies
- ▶ IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors - Amendments - Definition of accounting estimates
- ▶ IAS 12 Income Taxes - Amendments - Deferred tax related to assets and liabilities arising from a single transaction
- ▶ IFRS 17 Insurance Contracts

IFRS 17 will replace IFRS 4 Insurance Contracts and will materially change the recognition and measurement of insurance contracts and the corresponding presentation and disclosures in the Group's financial statements. In June 2020, the IASB released amendments which, among other things, addressed concerns raised on the initial release of the standard, dealt with some implementation challenges and confirmed the deferral of the standard's effective date as 1 January 2023.

IFRS 17 must be applied retrospectively. However if full retrospective application to a group of contracts is impractical, the modified retrospective or fair value methods may be used. The standard requires entities to measure insurance contract liabilities in the statement of financial position as the total of (a) the fulfilment cash flows – the current estimates of amounts that the Group expects to collect from premiums and pay out for claims, benefits and expenses, including an adjustment for the timing and risk for those amounts and (b) the contractual service margin – the future profit for providing insurance coverage.

IFRS 17 will have a significant impact on the Group's consolidated financial statements, tax and regulatory capital positions and other financial metrics that are dependent upon IFRS accounting values. The Group's assessment of the impact of IFRS 17, including work to ensure implementation by the effective date, is ongoing.

Amendments Postponed:

- ▶ IFRS 10 and IAS 28 - Amendments - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture - In December 2015, the IASB deferred the effective date of the amendments until such time it has finalised any amendments that result from its research project on the equity method of accounting.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.2 Consolidation

(a) Subsidiaries

Subsidiaries are all entities over which the Group has control. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- ▶ Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- ▶ Exposure, or rights, to variable returns from its involvement with the investee; and
- ▶ The ability to use its power over the investee to affect its returns.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- ▶ The contractual arrangement with the other vote holders of the investee
- ▶ Rights arising from other contractual arrangements
- ▶ The Group's voting rights and potential voting rights

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of income and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the equity holders of the company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

The Group uses the purchase method of accounting for the acquisition of subsidiaries. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any non-controlling interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill (see Note 2.7). If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised in the consolidated statement of income.

All intra-group transactions and balances are eliminated on consolidation. Subsidiaries' accounting policies have been changed where necessary to ensure consistency with the policies adopted by the Group.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- ▶ Derecognises the assets (including goodwill) and liabilities of the subsidiary
- ▶ Derecognises the carrying amount of any non-controlling interests
- ▶ Derecognises the cumulative translation differences recorded in equity
- ▶ Recognises the fair value of the consideration received
- ▶ Recognises the fair value of any investment retained
- ▶ Recognises any surplus or deficit in profit or loss
- ▶ Reclassifies the Company's share of components previously recognised in other comprehensive income to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities

A listing of the Group's principal subsidiaries is set out in Note 47.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.2 Consolidation (continued)

(b) Associated companies

The Group's investment in associated companies is accounted for using the equity method of accounting. An associate is an entity in which the Group has significant influence and which is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

Under the equity method, the investment in associates is carried in the consolidated statement of financial position at cost plus post-acquisition changes in the Group's share of net assets of the associates. Goodwill relating to associates is included in the carrying amount of the investment and is not amortised. The consolidated statement of income reflects the share of the results of operations of the associates. When there has been a change recognised directly in the equity of the associates, the Group recognises its share of any changes and discloses this, when applicable, in the statement of changes in equity.

The financial statements of the associates are prepared for the same reporting period as the Company. Where necessary, adjustments are made to bring their accounting policies in line with the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an additional impairment loss on the Group's investment in associates. The Group determines at each consolidated statement of financial position date whether there is any objective evidence that the investment in associates is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associates and its carrying value and recognises the amount in the consolidated statement of income.

The Group discontinues the use of the equity method from the date when the investment ceases to be an associate or when the investment is classified as held for sale.

A listing of the Group's associates is set out in Note 47.

(c) Mutual funds

The Group manages a series of mutual funds through its trust and asset management subsidiaries, Guardian Group Trust Limited and Guardian Asset Management and Investment Services Limited. These funds invest mainly in equity securities, debt securities and cash and cash equivalents.

As at the consolidated statement of financial position date, the Group has determined that it controls, as defined in note 2.2 (a), specific funds. Similar to the Group's consolidation of its subsidiaries, the assets and liabilities of these funds have been consolidated in the financial statements on a line-by-line basis. The carrying value of the total investments and cash held by the funds are recorded as investment securities of mutual fund unit holders and cash and cash equivalents of mutual fund unit holders respectively on the consolidated statement of financial position. Interests held by external parties in the funds that are consolidated are recorded as third party interest in mutual funds on the consolidated statement of financial position.

2.3 Segment reporting

A business segment is a group of assets and operations engaged in providing products and services that are subject to risks and returns that are different from those of other business segments. For management purposes, the Group is organised into business units based on their products and services and has three main reportable operating segments:

- (i) Life, health and pension;
- (ii) Property and casualty (including insurance brokerage); and
- (iii) Asset management.

All other activities of the Group that do not fall into the segments above are aggregated and reported under 'Other including consolidation adjustments'. These activities include the following: the Group's property development in Martinique, the Group's investments in RGM Limited and EIKM Holdings Limited, the Group's shared services subsidiary and the activities of the Company.

Transfer prices between operating segments are set on an arm's length basis in a manner similar to those with third parties. Segment income, expenses and results include those transfers between segments and are eliminated on consolidation.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.4 Foreign currency translation

(a) Translation of transactions in foreign currencies

The financial results of Group companies are prepared in the currency in which they conduct their ordinary course of business, which is referred to as functional currency.

Transactions occurring in currencies other than the functional currency are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated statement of income.

(b) Translation to the presentation currency

In preparing the consolidated financial statements, the results and financial position of all the Group entities are translated from their respective functional currencies to Trinidad and Tobago dollars, the presentation currency, as follows:

- (i) Assets and liabilities for each consolidated statement of financial position presented are translated at the closing rate at the end of the reporting period;
- (ii) Income and expenses for each consolidated statement of income are translated at average exchange rates; and
- (iii) All resulting exchange differences are recognised as a separate component of equity.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities are taken to the consolidated statement of comprehensive income. When a foreign operation is sold, liquidated or wound up, such exchange differences are recognised in the consolidated statement of income as part of the gain or loss on sale.

2.5 Property, plant and equipment

Freehold properties comprise mainly offices occupied by the Group and are shown at fair value, based on periodic, but at least triennial, valuations by external independent appraisers, less subsequent depreciation for buildings. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset. All other property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the consolidated statement of income during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of land and buildings are recognised in the consolidated statement of comprehensive income. Decreases that offset previous increases of the same asset are charged to the consolidated statement of comprehensive income. All other decreases are charged to the consolidated statement of income.

Land is not depreciated. Depreciation is charged over the estimated useful lives of the assets using the following rates and methods:

Freehold building	-	straight-line method, 2% per annum
Leasehold property	-	over the period of the lease
Air-conditioning equipment	-	straight-line method, 10 - 20% per annum
Motor vehicles	-	straight-line method, 20% per annum
Other plant, machinery, office furniture & equipment	-	straight-line method, 10 - 40% per annum

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.5 Property, plant and equipment (continued)

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 2.10).

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the consolidated statement of income. When revalued assets are sold, the amounts included in the revaluation surplus account are transferred to retained earnings.

2.6 Investment properties

Freehold or leasehold properties held for long-term rental yields that are not occupied by the Group are classified as investment properties. Investment properties comprise freehold land and buildings. They are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value. Fair value is based on active market prices, adjusted as necessary, for any difference in the nature, location or condition of the specified asset. Fair value is determined annually by external independent appraisers. Investment properties are not subject to depreciation. Any appreciation or diminution in value is recognised in the consolidated statement of income.

If investment properties become owner-occupied, they are reclassified as property, plant and equipment, and their fair value at the date of reclassification becomes its cost for subsequent accounting periods. Alternatively, where properties classified as held for use become investment properties because of a change in use, these properties are accounted for as investment properties and any differences arising between the carrying amount and the fair value of these items at the date of transfer are recognised in the consolidated statement of comprehensive income. However, if a fair value gain reverses a previous impairment loss, the gain is recognised in the consolidated statement of income.

Investment properties are derecognised when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposal. Upon disposal, any surplus previously recorded in the property revaluation reserve in equity is transferred to retained earnings.

Properties under construction that are intended for sale, are classified as properties for development and sale. These balances are carried at the lower of cost and net realisable values (Note 2.8).

2.7 Intangible assets

(a) Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share of the net identifiable assets of the acquired subsidiary/associate at the acquisition date. Goodwill on acquisition of subsidiaries is reported in the consolidated statement of financial position. Goodwill on acquisition of associates is included in investments in associates. Goodwill has an indefinite useful life and is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose.

(b) Customer-related intangibles

Customer-related intangibles comprise renewal rights and relationships when a business is acquired. They are recognised separately from goodwill and are initially recognised at their fair value at the acquisition date.

Subsequent to initial recognition, customer-related intangibles are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is calculated using the straight line method to allocate the intangibles over their useful lives. The remaining useful lives of customer-related intangibles range from 1 to 16.5 years.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.7 Intangible assets (continued)

(c) Brands

Brands acquired through direct purchase are carried at cost less accumulated amortisation. Amortisation is calculated using the straight-line method to allocate the cost of brands over their estimated useful lives. The remaining useful life of brands is 4.5 years.

(d) Computer software and website development costs

Acquired computer software licenses and website development costs are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. Costs that are directly associated with the development of identifiable and unique software products controlled by the Group, and which will probably generate economic benefits exceeding costs beyond one year, are also recognised as intangible assets. These costs are amortised over their estimated useful lives. The remaining useful lives of computer software and website development costs range from 1 to 7 years.

Costs associated with developing or maintaining computer software programmes are recognised as an expense as incurred.

2.8 Properties for development and sale

Properties for sale or under construction that are intended for sale, are classified as properties for development and sale. These balances are carried at the lower of cost and net realisable values. These properties include offices, retail shops and residential units.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated selling expenses. An external valuation specialist was engaged in determining the net realisable value for the office and retail shops, and a discounted cash flow model was used as there is a lack of comparable data because of the nature of the properties. For the residential units, data from binding sales transactions are used to assess the net realisable value.

Impairment losses on properties for development and sale are recognised in the consolidated statement of income when the net realisable value is lower than cost. Subsequently, where cost is lower than the net realisable value, a reversal of any prior impairment losses is recognised in the consolidated statement of income.

Reclassification to investment properties is made when the Group enters into an operating lease with a third party. Transfers are done at fair value.

2.9 Financial assets

(a) Initial recognition and measurement

Financial assets are recognised when Group entities become a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised on settlement date, the date on which the Group commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

At initial recognition, the Group measures financial assets at its fair value plus, in the case of financial assets not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of financial assets. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the consolidated statement of income.

The Group's financial assets include cash and short-term deposits, investment in debt and equity securities, interest receivable, receivables arising from insurance contracts and reinsurance contracts and other loans and receivables.

2. Significant accounting policies (continued)

2.9 Financial assets (continued)

(b) Classification and subsequent measurement

Debt instruments

Subsequent to initial recognition, the Group's debt instruments are measured in accordance with the business models determined by the Group's respective business units for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classified its debt instruments:

(i) Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. The carrying amounts of these assets are adjusted by any expected credit loss allowance recognised. In addition to certain debt securities, the Group's loans and receivables are carried at amortised cost.

(ii) Fair value through other comprehensive income: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income. Movements in the carrying amount are taken through other comprehensive income except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit or loss.

(iii) Fair value through profit or loss: Assets that do not meet the criteria for amortised cost or fair value through other comprehensive income are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss is recognised in the consolidated statement of income in the period in which it arises. The Group may, on initial recognition, irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or fair value through other comprehensive income as fair value through profit or loss, if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise. Financial assets held for trading, or are managed and whose performance is evaluated on a fair value basis, are measured at fair value through profit or loss.

The Group reclassifies debt instruments when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be infrequent.

Business model assessment

The Group's business units determine their business models at the level that best reflects how it manages groups of financial assets to achieve its business objective. Factors considered by the business units in determining the business model for a group of assets include:

- ▶ the stated policies and objectives for the group of assets and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets with the duration of any related liabilities or expected cash outflows or realising cash flows through sale of the assets;
- ▶ how performance of the group of assets is evaluated and reported to management;
- ▶ the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- ▶ how managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected);
- ▶ the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

If cash flows after initial recognition are realised in a way that is different from original expectations, the business units do not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.9 Financial assets (continued)

(b) Classification and subsequent measurement (continued)

Debt instruments (continued)

The Solely Payment of Principal and Interest (SPPI) test

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount). 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and other basic lending risks and costs, as well as a profit margin.

Where the business model is to hold assets and collect contractual cash flows or to collect contractual cash flows and sell, the Group's business units assesses whether the financial assets' cash flows represent solely payments of principal and interest. In making this assessment, the business units considers whether the contractual cash flows are consistent with a basic lending arrangement i.e. the definition of interest. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

Equity instruments

Subsequent to initial recognition, the Group measures all equity investments at fair value, and changes in the fair value of equity instruments are recognised in the consolidated statement of income.

(c) Derecognition of financial assets

A financial asset (or when applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- ▶ The rights to receive cash flows from the asset have expired.
- ▶ The Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement.
- ▶ The Group has transferred its rights to receive cash flows from the asset and either:
 - ▶ has transferred substantially all the risk and rewards of the asset, or
 - ▶ has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its right to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Group's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received is recognised in the consolidated statement of income. In addition, on derecognition of an investment in a debt instrument classified as at fair value through other comprehensive income, the cumulative gain or loss previously accumulated in the fair value reserve is reclassified to the consolidated statement of income.

(d) Modifications of financial assets

If the terms of a financial asset are modified, the Group evaluates whether the cash flows of the modified asset are substantially different from that of the original asset. If the terms are substantially different, the Group derecognises the original financial asset and recognises a new financial asset at fair value. The date of modification is consequently considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk has occurred. The Group also assesses whether the new financial asset recognised is deemed to be credit-impaired at initial recognition, especially in circumstances where the modification was driven by the debtor being unable to make the originally agreed payments.

If the cash flows of the modified asset are not substantially different, the modification does not result in derecognition of the financial asset. The Group recalculates the gross carrying amount of the financial asset based on revised cash flows, discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets), and recognises the amount arising from adjusting the gross carrying amount as a modification gain or loss in the consolidated statement of income.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.10 Impairment of assets

(a) Financial assets

At each reporting date, the Group assesses, on a forward-looking basis, the Expected Credit Losses (ECL) associated with its financial assets measured at amortised cost and fair value through other comprehensive income (excluding equity instruments).

The Group measures loss allowances on its debt instruments at an amount equal to lifetime ECL, except in the following cases, for which the amount recognised is 12-month ECL:

- ▶ Debt securities that are determined to have low credit risk at the reporting date; and
- ▶ Other financial instruments for which credit risk has not increased significantly since initial recognition.

Lifetime ECL are the ECL that result from all possible default events over the expected life of a financial asset, whereas 12-month ECL are the portion of ECL that results from default events that are possible within the 12 months after the reporting date.

For receivables, the Group applies the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

Loss allowances for ECL are presented in the consolidated financial statements as follows:

- ▶ Financial assets measured at amortised cost: the loss allowance is deducted from the gross carrying amount of the assets in the statement of financial position. Movement in ECL is recognised in the consolidated statement of income.
- ▶ Debt instruments measured at fair value through other comprehensive income: the loss allowance is recognised in the consolidated statement of income with the corresponding entry recognised in other comprehensive income.

Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring as at the reporting date with the risk of default occurring as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Group's debtors operate, obtained from economic expert reports, financial analysts, governmental bodies and other similar organisations, as well as consideration of various external sources of actual and forecast economic information that relate to the Group's core operations.

The quantitative assessment to identify whether a significant increase in credit risk has occurred for an exposure is performed by comparing:

- ▶ the remaining lifetime probability of default as at the reporting date; with
- ▶ the remaining lifetime probability of default for this point in time that was estimated at the time of initial recognition of the exposure.

The qualitative assessment to identify whether credit risk has increased significantly since initial recognition takes into account the following:

- ▶ Actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- ▶ Actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the debtor's ability to meet its obligations;
- ▶ Actual or expected significant changes in the operating results of the debtor;
- ▶ Significant increases in credit risk on other financial instruments of the debtor;
- ▶ Significant changes in the expected performance and behaviour of the debtor, including changes in the payment status of debtor;
- ▶ Actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant change in the debtor's ability to meet its debt obligation.

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrated otherwise. In the prior year, several of the Group's insurance subsidiaries offered a deferral in premium payments to support customers during the COVID-19 pandemic. Many of these deferrals have since expired, and customers have been required to either resume monthly payments or fully bring their accounts back up to date.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.10 Impairment of assets (continued)

(a) Financial assets (continued)

Significant increase in credit risk (continued)

Despite the aforementioned, the Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date. A financial instrument is determined to have low credit risk if the financial instrument has a low risk of default, the debtor has a strong capacity to meet its contractual cash flow obligations in the near term and adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the debtor to fulfil its contractual cash flow obligations. The Group considers a debt instrument to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'.

Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortised cost and debt instruments carried at fair value through comprehensive income are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- ▶ Significant financial difficulty of the debtor or issuer;
- ▶ A breach of contract, such as a default or past due event;
- ▶ The disappearance of an active market for a financial asset because of financial difficulties;
- ▶ It is becoming probable that the debtor will enter bankruptcy or other financial reorganisation; or
- ▶ Rating agencies' assessments of creditworthiness.

Definition of default

The Group considers a financial asset to be in default when:

- ▶ the debtor is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- ▶ the debtor is past due more than 90 days unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

In assessing whether a debtor is in default, the Group considers indicators that are qualitative, quantitative and based on data developed internally and obtained from external sources.

Write-off

The Group writes off financial assets, either partially or in full, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include ceasing enforcement activity and where the Group's recovery method is foreclosing on collateral and the value of the collateral is such that there is no reasonable expectation of recovering in full.

If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount.

Measurement of expected credit losses

The measurement of expected credit losses is a function of:

- (i) Probability of default (PD) - an estimate of the likelihood of default over a given time horizon;
- (ii) Loss given default (LGD) - an estimate of the loss arising in the case where a default occurs at a given time; and
- (iii) Exposure at default (EAD) - an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise.

The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Forward-looking information considered by the Group includes economic data and forecasts published by governmental bodies and monetary authorities, supranational organisations such as the Organization for Economic Cooperation and Development and the International Monetary Fund, and selected private-sector and academic forecasters.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.10 Impairment of assets (continued)

(a) Financial assets (continued)

Measurement of expected credit losses (continued)

Expected credit losses are measured as the present value of all cash shortfalls i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive, discounted at the original effective interest rate.

The mechanics of the expected credit losses method are summarised below:

- ▶ A financial instrument that is not credit-impaired on initial recognition, a 12-month ECL allowance is calculated. The Group calculates the 12-month ECL allowance based on the expectation of a default occurring in the twelve months following the reporting date. The expected 12-month default probability is applied to a forecast exposure at default and multiplied by the expected loss given default, and discounted by the original effective interest rate.
- ▶ When a financial instrument has shown a significant increase in credit risk since initial recognition, the Group records an allowance for life-time ECL. The mechanics are similar to 12-month ECL calculation on a financial instrument that is not credit-impaired on initial recognition, but default probability and loss given default are estimated over the life of the instrument.
- ▶ A financial instrument that is credit-impaired, but is not a purchased or originated credit-impaired financial instrument, the Group records an allowance for lifetime ECL calculated similar to lifetime ECL on a financial instrument that has shown a significant increase in credit risk since initial recognition.
- ▶ Purchased or credit-impaired financial assets are assets that are credit-impaired on initial recognition. ECL on these assets are always measured on a lifetime basis, discounted by a credit adjusted effective interest rate.

Where lifetime ECL is measured on a collective basis to cater for cases where evidence of significant increases in credit risk at the individual instrument level may not yet be available, the financial instruments are grouped on the basis of shared risk characteristics that include: instrument type; credit risk ratings; nature, size and industry of debtors; collateral type; and geographic location of the debtor.

If the Group has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the Group measures the loss allowance at an amount equal to 12-month ECL at the current reporting date.

(b) Non-financial assets

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use. The recoverable amount is determined on an individual asset basis, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset or CGU is considered impaired and written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculations on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of three years. For longer periods, a long-term growth rate is applied to project future cash flows after the third year.

Impairment losses of continuing operations are recognised in the consolidated statement of income in those expense categories consistent with the function of the impaired asset.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.10 Impairment of assets (continued)

(b) Non-financial assets (continued)

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the Group makes an estimate of the recoverable amount. A previous impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation or amortisation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the consolidated statement of income unless the asset is carried at the revalued amount, in which case the reversal is treated as a revaluation increase.

Goodwill and intangible assets are tested for impairment annually as at 31 December and when circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

2.11 Fair value measurement

The Group measures financial instruments and non-financial assets at fair value at each statement of financial position date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- ▶ In the principal market for the asset or liability, or
- ▶ In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in either its highest and best use, or by selling it to another market participant that would use the asset in its highest and best use.

When one is available, the Group measures the fair value of an instrument using the quoted price in an active market. If there is no quoted price in an active market, the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same and discounted cash flow analysis making maximum use of market inputs and relying as little as possible on entity-specific inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- ▶ Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- ▶ Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- ▶ Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable. This level consists mainly of various freehold and investment properties, various unquoted equity securities, and the unquoted, illiquid Series G Government of Barbados debt securities. Freehold and investment properties are fair valued by professional external valuers. Unquoted equity securities are held either at cost, being the fair value of the consideration paid on acquisition, or at fair value based on valuation ratios such as book value per share, or based on indicative prices provided by external investment managers. The Series G debt securities are valued using a discounted cash flow model that incorporates expected cash flows and a risk adjusted yield curve issued by the Central Bank of Barbados.

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.11 Fair value measurement (continued)

External valuers are involved for valuation of certain assets such as investment properties, freehold and leasehold properties and properties for development and sale. Involvement of external valuers is decided annually and selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

2.12 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the assets and settle the liabilities simultaneously.

2.13 Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, money market placements and other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts, when they arise, are shown within borrowings in current financial liabilities on the consolidated statement of financial position.

2.14 Share capital

Shares are classified as equity when there is no obligation to transfer cash or other assets. Incremental costs directly attributable to the issue of equity instruments are shown in equity as a deduction from the proceeds.

2.15 Insurance and investment contracts

(a) Classification

The Group issues contracts that transfer insurance risk or financial risk or both. Insurance contracts are those contracts that transfer significant insurance risk. Such contracts may also transfer financial risk. As a general guideline, the Group defines as significant insurance risk the possibility of having to pay benefits on the occurrence of an insured event that are at least 10% more than the benefits payable if the insured event did not occur.

Investment contracts are those contracts that transfer financial risk with no significant insurance risk.

A number of insurance contracts contain a Discretionary Participation Feature (DPF), which entitles the holder to receive, as a supplement to guaranteed benefits, additional benefits or bonuses:

- a) That are likely to be a significant portion of the total contractual benefits;
- b) Whose amount or timing is contractually at the discretion of the Group; and
- c) That are contractually based on:
 - (i) the performance of a specified pool of contracts or a specified type of contract;
 - (ii) realised and/or unrealised investment returns on a specified pool of assets held by the Group; or
 - (iii) the profit or loss of the Group, fund or other entity that issues the contract.

The terms and conditions of these contracts set out the basis for the determination of the amounts on which discretionary benefits are based and within which the Group may exercise its discretion as to the quantum and timing of their payments to contract holders, which will be subject to the advice of the Group's actuary or a locally appointed actuary.

(b) Recognition and measurement

Insurance contracts are classified into four main categories, depending on the duration of risk and whether or not the terms and conditions are fixed.

(i) Short-term insurance contracts

These contracts are principally property, motor, casualty (employers' liability, public liability), marine, group life and health insurance contracts. Health insurance contracts include both group and individual health insurance.

Property insurance contracts indemnify the Group's customers in the event of a loss from a specified insured peril such as fire, windstorm or earthquake up to the insured amount and within the terms of the policy conditions. These contracts are issued for both private and commercial risks.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(b) Recognition and measurement (continued)

(i) Short-term insurance contracts (continued)

Motor insurance contracts indemnify the Group's customers for their legal requirement under the respective country's road traffic legislation, which in certain instances stipulate unlimited coverage for third party liability. These contracts may be extended for additional coverage such as physical damage, theft and personal accident.

Casualty insurance contracts provide coverage for liability exposures that indemnify the Group's customers against actions from third parties, which are subject to the policy limits and conditions. The typical protection offered is designed for employers who become legally liable to pay compensation to injured employees (employers' liability) and employers who become liable to pay compensation to third parties for bodily harm or property damage (public liability).

Marine insurance contracts indemnify the Group's customers for loss or damage to their insured cargo, commercial hull and pleasure craft vessels. Third party coverage is also provided.

Group life contracts protect the Group's customers from the consequences of events (such as death or critical illness) that would affect the ability of the customer or his/her dependants to maintain their current level of income. Health insurance contracts provide for both unexpected and preventative medical treatment and drugs. On these contracts, the benefits paid on occurrence of the specified insurance event are either fixed or linked to the extent of the economic loss suffered by the policyholder. There are no maturity or surrender benefits.

For all these contracts, premiums are recognised as revenue (earned premiums) proportionally over the period of coverage. The portion of premiums received on in-force contracts that relate to unexpired risks at the consolidated statement of financial position date is reported as an unearned premium liability. Premiums are shown before deduction of commissions payable to agents and brokers and exclude any taxes or duties levied on such premiums. Premium income includes premiums collected by agents and brokers not yet received by the Group.

Unearned premiums represent the portion of premiums written in the current year that relate to periods of insurance subsequent to the consolidated statement of financial position date, calculated using either the three hundred and sixty-fifths method or the twenty-fourths method. Unearned premiums relating to marine cargo are calculated using 180 days after the first date of sailing.

Claims and loss adjustment expenses are charged to income as incurred based on the estimated liability for compensation owed to contract holders. They arise from events that have occurred up to the consolidated statement of financial position date, even if they have not yet been reported to the Group. The Group does not discount its liabilities for unpaid claims other than for disability claims. Liabilities for unpaid claims are estimated using techniques such as the input of assessments for individual cases reported to the Group and statistical analyses for the claims Incurred But Not Reported (IBNR), and to estimate the expected ultimate cost of more complex claims that may be affected by external factors such as court decisions. Estimates are continually revised as more information becomes available and for the effects of anticipated inflation. Adjustments arising on these revisions are recognised within claims expense in the current year.

(ii) Long-term insurance contracts with fixed and guaranteed terms and without DPF

These contracts insure events associated with mortality and longevity risk over a long duration. Premiums are recognised as revenue when they become payable by the policyholder. Premiums are shown before deduction of commission. Benefits are recorded as an expense when incurred.

A liability for policyholders' benefits that are expected to be incurred in the future is established on acceptance of the insurance risk. The liability is based on the present value of estimated amounts for projected future premiums, claims, benefits, investment income and policy maintenance expenses. The liability is based on key assumptions made with respect to variables such as mortality, persistency, investment returns, expenses and expense inflation.

The liabilities are actuarially recalculated at each consolidated statement of financial position date and the change in the liability is recognised as an expense in the consolidated statement of income.

2. Significant accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(b) Recognition and measurement (continued)

(ii) Long-term insurance contracts with fixed and guaranteed terms and without DPF (continued)

For the Trinidad and Tobago life insurance subsidiaries, actuarial liabilities are calculated using the Caribbean Policy Premium Method (CPPM) outlined in regulations issued by the Central Bank of Trinidad and Tobago. The Jamaican life insurance subsidiary uses a very similar Policy Premium Method as required under the Insurance Act 2001 of Jamaica. The calculations use current best estimates of future cash flows arising from the insurance contracts in force, with additional margins for adverse deviation for each material assumption. As experience unfolds, the resulting provisions for adverse deviations will be included in future income to the extent they are no longer required to cover adverse experience.

Effective 1 January 2021, the actuarial liabilities of the Group's Dutch Caribbean life insurance subsidiaries were calculated using the Policy Premium Method whereas in the prior year the Modified Net Premium Method was used to calculate the actuarial liabilities. As the Policy Premium Method is very similar to that used by the Trinidad and Tobago life insurance subsidiaries, this change aligns the different valuation methods previously used by the Group in determining long-term insurance reserves. Further, the Group believes this change will also improve its comparability with industry peers.

Unit-linked and interest-sensitive insurance contracts

The premiums paid for these contracts contain an element that covers the insured event and another which is used to accumulate cash values available for withdrawal at the option of the policyholder. These cash values earn interest.

Unit-linked insurance contracts

For the Jamaican life insurance subsidiary, where the insurance contracts prescribe fixed and guaranteed terms and without DPF, the portion of the premium covering the insured risk is recorded as premium income. The portion of the premium that accumulates a cash value for the policyholder is recorded as a liability and is credited to the account of the policyholder in the respective unit-linked fund to which the contract is linked.

The liabilities arising from the unit-linked contracts comprise the liability for the insured risk and the accumulated cash value. The liability for the insured risk is determined in a manner identical to the liability for contracts with fixed and guaranteed terms and is included in the policyholders' liability balance, while the liability for the accumulated cash value is carried at fair value of the assets which fund the liabilities. The liabilities for the accumulated cash values are included in the investment contract liabilities balance. All risk and rewards accrue to the policy-holders who are invested in the unit-linked funds.

The change in the liability arising from the insurance risk is recognised as an expense in the consolidated statement of income.

Interest-sensitive insurance contracts

The Jamaican life insurance subsidiary issues interest-sensitive policies for which the entire premium is recorded as premium income and there is no unbundling of the premium receipt between the insurance and investment components. The liability for the interest-sensitive policies is determined as the sum of the liability for the insured risk (as determined above for unit-linked policies) and the liability for the accumulated cash values. The entire liability for the interest-sensitive policies is recorded in insurance contracts.

The change in the overall liability for the interest-sensitive policies is recognised as an expense in the consolidated statement of income.

(iii) Long-term insurance contracts without fixed terms

Unit-linked insurance contracts

For the Trinidad and Tobago life insurance subsidiary, where the insurance contracts prescribe no fixed terms, the entire premium on these contracts is recorded as premium income. The liabilities held for these contracts are actuarially calculated using the CPPM based on the expected future cash flows from these contracts. Some of the unit-linked annuity contracts contain guarantees that entitle the holders to a minimum guaranteed crediting rate over the life of the policy and provide for minimum annuity purchase rates. These guarantees are allowed for in the liability calculations.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(b) Recognition and measurement (continued)

(iv) Long-term insurance contracts with fixed and guaranteed terms and with DPF

In addition to death or life benefits, these contracts contain a DPF that entitles the holders to a bonus or dividend declared from time to time. The discretionary element of the benefits payable under these policies, as well as the guaranteed elements are treated as liabilities. The actuarial calculations make allowance for future expected policyholder bonuses and dividends. Any changes in the total benefits due are recognised as charges in the consolidated statement of income and form part of increases in reserves for future benefits of policyholders.

(v) Investment contracts

The Group issues investment contracts including deposit administration contracts and individual deferred annuity contracts. Insurance premiums are recognised directly as liabilities. These liabilities are increased by credited interest or change in the unit prices and are decreased by policy administration fees, mortality and surrender charges and any withdrawals. Revenue consists of investment income and interest credited is treated as an expense.

(c) Outstanding claims

Provision for outstanding claims and the related costs of settlement are based on incidents reported before the end of the financial year and include appropriate provisions for claims incurred but not yet reported. Estimates are continually revised as more information becomes available and for the effects of anticipated inflation. Adjustments arising on these revisions are included with claims expense in the current year.

(d) Policyholders' benefits

Maturities and annuities are accounted for when due.

Death and disability claims and surrenders are recognised in the consolidated financial statements in the year in which they have been notified.

Differences between the estimated claims and subsequent settlements are recognised in the consolidated statement of income in year of settlement.

(e) Deferred acquisition costs

Commissions paid to agents and brokers for property, casualty and short-duration life insurance contracts that are related to securing new contracts and renewing existing contracts are expensed over the terms of the policies as premium is earned. All other costs are recognised as expenses when incurred.

(f) Liability adequacy test

At each consolidated statement of financial position date, the Group assesses whether its recognised insurance liabilities are adequate, using current estimates of future cash flows under its insurance contracts. If that assessment shows that the carrying amount of its insurance liabilities is inadequate, the deficiency is recognised in the consolidated statement of income and the amount of the relevant insurance liabilities is increased.

(g) Reinsurance contracts held

Contracts entered into by the Group with reinsurers under which the Group is compensated for losses on one or more contracts issued by the Group and that meet the classification requirements for insurance contracts are classified as reinsurance contracts held.

Contracts that do not meet these classification requirements are classified as financial assets. Insurance contracts entered into by the Group under which the contract holder is another insurer (inward reinsurance) are included with insurance contracts.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(g) Reinsurance contracts held (continued)

The benefits to which the Group is entitled under its reinsurance contracts held are recognised as reinsurance assets. These assets consist of short-term balances due from reinsurers, as well as longer term receivables that are dependent on the expected claims and benefits arising under the related reinsured insurance contracts. Amounts recoverable from or due to reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities are primarily premiums payable for reinsurance contracts and amounts advanced by reinsurers to settle claims arising from catastrophic events.

The Group assesses its reinsurance assets for impairment on a quarterly basis. If there is objective evidence that the reinsurance asset is impaired, the Group reduces the carrying amount of the reinsurance asset to its recoverable amount and recognises that impairment loss in the consolidated statement of income.

(h) Receivables and payables related to insurance contracts and investment contracts

Receivables and payables are recognised when due. These include amounts due to and from agents, brokers and insurance contract holders. If there is objective evidence that the insurance receivable is impaired, the Group reduces the carrying amount of the insurance receivable accordingly and recognises that impairment loss in the consolidated statement of income.

(i) Salvage and subrogation reimbursements

Some insurance contracts permit the Group to sell (usually damaged) property acquired in settling a claim (salvage). The Group may also have the right to pursue third parties for payment of some or all costs (subrogation). The estimated cost of claims includes a deduction for the expected value of salvage and other recoveries.

2.16 Financial liabilities

Financial liabilities in the consolidated statement of financial position comprise borrowings and repurchase agreements.

(a) Borrowings

Borrowings are recognised initially at fair value, plus directly attributable transaction costs. After initial recognition, interest-bearing loans are subsequently measured at amortised cost using the effective interest rate (EIR) method. Gains and losses are recognised in the consolidated statement of income when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance costs in the consolidated statement of income.

The Group derecognises a loan when its contractual obligations are discharged, cancelled or have expired. The Group also derecognises a loan when its terms are modified and the cash flows of the modified borrowing is substantially different, in which case a new loan based on the modified terms is recognised at fair value. On derecognition of the loan, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in the consolidated statement of income.

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset (i.e. an asset that necessarily takes a substantial period of time to get ready for its intended use or sale) are capitalised.

(b) Repurchase agreements

Securities sold under agreements to repurchase (repurchase agreements) are treated as collateralised financing transactions. The difference between the sale and repurchase price is treated as interest and accrued over the life of the agreements using the EIR method.

2.17 Taxation

Taxation in the consolidated statement of income comprises current and deferred income tax.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.17 Taxation (continued)

Current income tax charges are based on taxable profits for the year, which differ from the profit before tax reported because it excludes items that are taxable or deductible in other years, and items that are never taxable or deductible. The Group's liability for current tax is calculated at tax rates that have been enacted or substantively enacted at the date of the consolidated statement of financial position.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Currently enacted or substantively enacted tax rates are used in the determination of deferred income tax.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax is charged or credited to the consolidated statement of income, except where it relates to items charged or credited to the consolidated statement of comprehensive income, in which case, deferred tax is also dealt with in the consolidated statement of comprehensive income.

2.18 Employee benefits

(a) Pension plans

The Group operates a number of defined benefit and defined contribution plans, the assets of which are held in separate trustee-administered funds. The plans are generally funded by payments from employees and by the relevant Group companies after taking account of the recommendations of the external qualified actuaries.

The plans are governed by trust/fund deeds and rules and are administered in accordance with the laws of the jurisdiction in which the plan resides. Responsibility for the governance of the plans, including investment strategies, lies with the Board of Trustees/Foundation.

A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. The Group has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current or prior periods.

The asset or liability recognised in the consolidated statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the consolidated statement of financial position date less the fair value of plan assets. Plan assets exclude any insurance contracts issued by the Group.

For defined benefit plans, the pension accounting costs are assessed using the projected unit credit method. Under this method, the cost of providing pensions is charged to the consolidated statement of income so as to spread the regular cost over the service lives of employees in accordance with the advice of a qualified actuary, who carries out full valuations of the plans every three years. The pension obligation is measured as the present value of the estimated future cash outflows using interest rates of government securities which have terms to maturity approximating the terms of the related liability. Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses and the return on plan assets (excluding interest), are recognised immediately through other comprehensive income in the consolidated statement of comprehensive income.

The defined benefit plans mainly expose the Group to actuarial risks such as investment risk, interest rate risk and longevity risk.

The Group's contributions to the defined contribution pension plans are charged to the consolidated statement of income in the year to which they relate.

(b) Post-retirement medical benefit obligations

The Group's subsidiaries in Trinidad and Tobago and the Dutch Caribbean provide post-retirement medical benefits to its permanent employees who retire from active service, their spouses and their dependents. The entitlement to these benefits is based on the employee remaining in service up to retirement age or leaving service due to ill health. The expected costs of these benefits are accrued over the period of employment, using a methodology similar to that for defined benefit plans. All actuarial gains and losses are recognised immediately through other comprehensive income in the consolidated statement of comprehensive income. External qualified actuaries carry out a valuation of these obligations.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.18 Employee benefits (continued)

(c) Cash-based long-term performance incentive plan

The Group operates a cash-based long-term performance incentive plan for eligible executives. Accruals are made annually based on the ultimate expected payments to eligible executives.

(d) Employee share ownership plan (ESOP)

The employees of subsidiaries incorporated in Trinidad and Tobago have the option to receive their bonuses in cash and/or ordinary shares of the company purchased on the open market, in accordance with the terms outlined in the Trust Deed governing an approved ESOP. The Group recognises an expense within staff costs when bonuses are awarded.

(e) Bonus plans

The Group recognises a liability and an expense for bonuses based on a formula that takes into consideration the profit attributable to the Group's shareholders after certain adjustments. The Group recognises a provision where contractually obligated or where there is a past practice that has created a constructive obligation.

2.19 Provisions

Provisions are made when the Group has a present legal or constructive obligation as a result of past events, for which it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount has been reliably estimated. Provisions are not recognised for future operating losses. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations is small.

2.20 Revenue recognition

Revenue comprises the fair value for services rendered after eliminating revenue within the Group. Revenue is recognised as follows:

(a) Premium income

Premium income is recognised on the accrual basis in accordance with the terms of the underlying contracts as outlined in Note 2.15.

(b) Investment income

Interest income is recognised using the effective interest method. Interest income is calculated by applying the effective interest rate method to the gross carrying amount of financial assets, except for:

- ▶ Purchased or originated credit-impaired financial assets, for which the credit-adjusted effective interest rate is applied to the amortised cost of the financial asset.
- ▶ Financial assets that are not purchased or originated credit-impaired but have subsequently become credit-impaired, for which interest revenue is calculated by applying the effective interest rate to their amortised cost i.e. net of the expected credit loss provision.

Dividend income is recognised when the right to receive payment is established.

(c) Rental Income

Rental income is recognised on an accrual basis.

(d) Realised and unrealised investment gains and losses

Realised and unrealised gains and losses on investments measured at amortised cost or fair value through profit or loss are recognised in the consolidated statement of income in the period in which they arise.

Unrealised gains and losses on investment securities measured at fair value through other comprehensive income are recognised in other comprehensive income. On derecognition, debt securities gains and losses accumulated in other comprehensive income are reclassified to the consolidated statement of income.

(e) Commission income

Commissions are recognised on the accrual basis.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.20 Revenue recognition (continued)

(f) Fee income

Fees are earned from the management of the assets of the segregated funds and deposit administration funds and from general policy administration and surrenders. Fees are recognised in the period in which the services are rendered.

For the asset management companies in the Group, portfolio, asset management fees and other management advisory and service fees are recognised based on the applicable service contracts over the period in which the service is provided. Management fees and commissions arising from negotiating, or participating in the negotiation of a transaction for a third party are recognised on completion of the underlying transaction.

2.21 Leases

At inception of a contract, the Group assesses whether a contract is, or contains a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- ▶ the contract involves the use of an identified asset. This may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified;
- ▶ the Group has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- ▶ the Group has the right to direct the use of the asset. The Group has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used.

The Group as a lessee

The Group mainly leases various office space, motor vehicles and equipment used in its operations. Rental contracts for these leases are typically made for fixed periods but may have extension options, which is described below. Some contracts contain lease and non-lease components, which are accounted for as separate components based on the stand-alone prices stated in the contracts.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants and the leased assets may not be used as security for borrowing purposes.

The Group applies a single recognition and measurement approach to all leases, except for short-term leases and leases of low-value assets. At lease commencement date, the Group recognises a right-of-use asset and a lease liability in the consolidated statement of financial position.

The right-of-use asset is initially measured at cost, which comprises the initial measurement of the lease liability, any initial direct costs incurred by the Group, an estimate of any costs to dismantle and remove the asset at the end of the lease, and any lease payments made in advance of the lease commencement date (net of any incentives received). Subsequent to initial measurement, the right-of-use asset is depreciated on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. If the group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life. The Group also assesses the right-of-use asset for impairment when such indicators exist. The Group does not revalue any of its right-of-use assets.

The lease liability is initially measured at the present value of the lease payments that are not paid at the lease commencement date, discounted using the interest rate implicit in the lease. If the interest rate implicit in the lease cannot be readily determined, the lessee's incremental borrowing rate is used, being the rate the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions. Lease payments included in the measurement of the lease liability comprise the following:

- ▶ fixed lease payments (including in-substance fixed payments), less any lease incentives;
- ▶ variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- ▶ lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option; and
- ▶ penalty payments for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect lease payments made.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Significant accounting policies (continued)

2.21 Leases (continued)

The Group remeasures the lease liability when there is a change in future lease payments arising from a change in an index or rate, or if the Group changes its assessment of whether it will exercise an extension or termination option. Extension and termination options are included in a number of leases across the Group. These are used to maximise operational flexibility in terms of managing the assets used in the Group's operations. The majority of extension and termination options held are exercisable only by the Group and not by the respective lessor. When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in the consolidated statement of income if the carrying amount of the right-of-use asset has been reduced to zero.

Variable lease payments that do not depend on an index or a rate are not included in the measurement of the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments. The Group did not have any variable lease payments that do not depend on an index or a rate for the period ended 31 December 2021 (2020: nil).

The Group applies the short-term lease recognition exemption to its short-term leases i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. The Group recognises the lease payments associated with these leases as an operating expense on a straight line basis over the lease term.

The Group as a lessor

The Group leases out its investment properties. The Group has classified these leases as operating leases, because they do not transfer substantially all of the risks and rewards incidental to the ownership of the assets. Rental income arising is accounted for on a straight-line basis over the lease term and is included in other income in the consolidated statement of income.

2.22 Dividend distributions

Dividend distributions to the Company's shareholders are recognised as an appropriation in the Group's consolidated financial statements in the period in which the dividends are approved by the Group's Board of Directors.

2.23 Finance charges

Finance charges are recognised as an expense in the period in which they are incurred except to the extent that they are capitalised when directly attributable to the acquisition, construction or production of an investment property or in developing properties for sale.

2.24 Earnings per share

Basic earnings per share is calculated by dividing profit or loss attributable to ordinary equity holders of the company by the weighted average number of ordinary shares outstanding during the period.

2.25 Assets under management

The Group provides custody and trustee discretionary investment management services to third parties. Such assets under management represent the managed funds administered by several of the Group's subsidiaries.

2.26 Subscriptions and redemptions on mutual funds portfolio

(a) Subscriptions - Units relating to the various pools of mutual funds consolidated in the Group's financial statements could be subscribed based on the net asset value per unit of the underlying funds determined on each business day.

(b) Distributions - The net income and net realised capital gains of the various pools of mutual funds are calculated and accrued to the investor daily and distributed monthly. Investors have the option either to receive a cash distribution or to reinvest income distributions into units at the prevailing subscription price as at the date of distribution.

(c) Redemptions - Units relating to the various pools of mutual funds consolidated in the Group's financial statements are redeemed at a price per unit based on the net asset value of the underlying funds published on the date that the request is made.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

3. Critical accounting estimates and judgments in applying accounting policies

The Group makes estimates and assumptions that may affect the reported amounts of assets and liabilities during the succeeding financial year. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

COVID-19 Pandemic

A source of estimation uncertainty that originated in 2020 and continues to affect the Group into 2021 is the ongoing COVID-19 pandemic. While uncertainty remains about the speed of the economic recovery, the trajectory has undoubtedly been positive, with the development and distribution of vaccines and the gradual reopening of economies worldwide. Further positive developments include higher energy prices for Trinidad & Tobago, increased tourism for Jamaica and the Dutch Caribbean, and the strong growth of the international equity markets in 2021. The Group has made forward-looking projections using the macroeconomic indicators, such as real GDP, unemployment, and inflation, which were available as at the end of the reporting period. The ongoing uncertainty means an increased likelihood that actual economic outcomes will vary from estimates used, resulting in differences between the current accounting estimates and the actual future results of the Group. These uncertainties predominantly affected the valuation of investment properties (see Note 7) and measurement of expected credit losses on financial assets (see Note 3(e)).

(a) The ultimate liability arising from claims made under insurance contracts

The estimation of the ultimate liability arising from claims made under insurance contracts is an important accounting estimate. There are several sources of uncertainty that need to be considered in the estimate of the liability that the Group will ultimately pay for such claims, in particular, for claims arising from motor, casualty, health and group life insurance contracts. At 31 December 2021, the carrying amount of short-term insurance claims was \$1.3 billion (2020: \$1.3 billion). See Note 4.1 for a detailed understanding of this estimate.

(b) Estimate of future benefit payments and premiums arising from long-term insurance contracts

The determination of the liabilities under long-term insurance contracts is dependent on estimates made by the Group. Uncertainty in the estimation of future benefit payments and premium receipts for long-term insurance contracts arises from the unpredictability of long-term changes in overall levels of future mortality, morbidity, administrative expenses, investment income and the variability in contract holder behaviour. Estimates are made as to the expected number of deaths, terminations and other events giving rise to cash flows for each of the years in which the Group is exposed to risk. The Group bases these estimates on standard actuarial tables adjusted where appropriate to reflect the Group's own experience and expectations. Although the pattern of future cash flows may be close to that indicated by past experience, some deviation in that pattern is probable.

The estimated number of deaths determines the value of the benefit payments. The main source of uncertainty is that epidemics and wide-ranging lifestyle changes, such as in eating, smoking and exercise habits, could result in future mortality being significantly different from the past for the age groups in which the Group has significant exposure to mortality risk. However, continuing improvements in medical care and social conditions may result in improvements in longevity in excess of those allowed for in the estimates used to determine the liability for contracts where the Group is exposed to longevity risk.

Estimates are also made as to future investment income arising from the assets backing long-term insurance contracts. These estimates are based on historic yield patterns and current market returns as well as expectations about future economic and financial developments. See Note 4.1.4(d) for the sensitivity of the value of insurance liabilities to changes in assumptions used to value these liabilities.

The carrying amount of long-term insurance contracts as at 31 December 2021 was \$17.1 billion (2020: \$16.5 billion).

(c) Business model assessment

Classification and measurement of financial assets depends on the results of the SPPI and the business model test. The Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgment reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

3. Critical accounting estimates and judgments in applying accounting policies (continued)

(c) Business model assessment (continued)

The Group monitors financial assets measured at amortised cost or fair value through other comprehensive income that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Group's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets. Factors considered by the Group's business units in determining the business model for a group of assets are disclosed in Note 2.9(b).

(d) Fair valuation of debt securities

The fair value of debt securities that are not traded in an active market is determined by using an internally developed bond valuation model. Assumptions used in this model are validated and periodically reviewed internally by qualified personnel. Where applicable, data is calibrated to ensure that outputs reflect actual data and comparative market prices. Changes in assumptions used in valuations could affect reported fair value of financial assets. Key assumptions are based on current market yields. At 31 December 2021, the carrying amount of debt securities that were fair valued using an internally developed bond valuation model was \$10.3 billion (2020: \$9.9 billion). The following table shows the effect on the profit or loss and fair value reserve to changes in the market yields.

	Effect on fair value reserve		Effect on consolidated income	
	2021 \$'000	2020 \$'000	2021 \$'000	2020 \$'000
For the Trinidadian subsidiaries:				
1% increase in market yields	(38,291)	(27,499)	(16,230)	(12,362)
1% decrease in market yields	42,524	30,268	17,678	13,608
For the Jamaican subsidiaries:				
2% increase in market yields	(286,108)	(312,064)	(52,775)	(45,771)
2% decrease in market yields	385,777	357,627	73,732	41,521
For the Dutch Caribbean subsidiaries:				
1% increase in market yields	(125,100)	(115,685)	(514)	(8,038)
1% decrease in market yields	144,914	126,973	539	8,515

(e) Impairment losses on financial assets

The measurement of ECL allowance for financial assets measured at amortised cost and fair value through other comprehensive income requires judgment, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's expected credit loss calculations are outputs of models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the expected credit loss models that are considered accounting judgments and estimates include:

- ▶ The Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a lifetime expected credit loss basis and the qualitative assessment
- ▶ The segmentation of financial assets when their ECL is assessed on a collective basis
- ▶ Development of ECL models, including the various formulas and the choice of inputs
- ▶ Use of macroeconomic data for internal credit ratings and outlooks, to derive associated probabilities of default as prescribed by external rating agencies such as Standard & Poor's and Moody's
- ▶ Development of forward-looking scenarios probability weighted based on macroeconomic trends and expectations
- ▶ Determination of associations between macroeconomic scenarios and, economic inputs and the effect on probabilities of default, exposure at default and loss given default

The Group regularly reviews its internal models in the context of actual loss experience and adjusts when necessary.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

3. Critical accounting estimates and judgments in applying accounting policies (continued)

(e) Impairment losses on financial assets (continued)

Forward-looking macroeconomic variables

The estimation and application of forward-looking information requires significant judgment. PD, LGD and EAD inputs used to estimate Stage 1 and Stage 2 credit loss allowances are modelled based on the macroeconomic variables (or changes in macroeconomic variables) that are most closely correlated with credit losses in the relevant portfolio. The estimation of ECL on 12-month ECL and Lifetime ECL is a discounted probability-weighted estimate that considers three future macroeconomic scenarios, with macroeconomic projections varying by territory. The base case scenario assumes that a stable economic environment where current conditions, based on available macroeconomic data, will largely continue. Upside and downside scenarios are set relative to the base case scenario based on reasonably possible alternative macroeconomic conditions, considering macroeconomic forecasts and trends.

Scenarios are reassessed on at least an annual basis and more frequently if conditions warrant. Scenarios are probability-weighted separately for each territory modelled according to the best estimate of their relative likelihood based on historical frequency and current trends and conditions. Probability weights are updated on an annual basis or more frequently as warranted.

COVID-19 Pandemic

In the prior year, to incorporate the economic impact of the COVID-19 pandemic, the Group made adjustments to its ECL models such as increasing the likelihood of pessimistic scenarios and overlaying a further pessimistic scenario that explicitly accounts for acute negative economic fallout. For the year ended 31 December 2021, the overlay for the acute negative scenario remains; however, the likelihood attributed to this and other pessimistic scenarios have been reduced given the improvements in the current and expected economic environment. The resulting probability of default and losses given default were applied to all financial assets with credit risk.

Management also maintains the position that the lifetime default risk of assets with several years remaining to maturity has not significantly changed since the onset of the COVID-19 pandemic, an important factor given that IFRS 9 requires that entities assess the risk of default over the life of expected assets. Such assets account for a significant portion of the Group's investment portfolio.

The carrying amounts of expected credit loss allowance on financial assets are disclosed in Note 4.2.3(d).

(f) Taxation

The Group is subject to income taxes in numerous jurisdictions. Estimates are required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

For uncertain tax positions where there is uncertainty over the tax treatment in the financial statements, management considered whether it is probable that the tax authority will accept the uncertain tax treatment. The Group measured the tax balance that is applicable for the uncertain tax position using an expected value basis.

(g) Impairment of non-financial assets

An impairment exists when the carrying value of an asset or cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from approved budgets and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the cash-generating unit being tested. The recoverable amount is sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. The carrying amount of impairment provisions on non-financial assets as at 31 December 2021 was \$115 million (2020: \$116 million).

The fair value of the Group's investment properties are determined annually by external valuers. Refer to note 7 for the valuation methodologies and assumptions applied.

(h) Determining the lease term of contracts with extension and termination options – Group as lessee

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

3. Critical accounting estimates and judgments in applying accounting policies (continued)

(h) Determining the lease term of contracts with extension and termination options – Group as lessee (continued)

The Group has several lease contracts that include extension and termination options. In determining the lease term, the Group considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. The Group considers factors such as penalties to terminate, historical lease durations and the costs and business disruption required to replace leased assets. Extension options in most office space leases have been included in the lease liability.

As at 31 December 2021, potential future cash outflows of \$28,748,000 (undiscounted) (2020: \$29,202,000) have not been included in the lease liability because it is not reasonably certain that the leases will be extended.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee.

(i) Post-employment benefits

In conducting valuation exercises to measure the effect of all post-employment benefit plans throughout the Group, the Group's external actuaries use judgment and assumptions in determining discount rates, salary increases, pension increases and health care costs. These assumptions are detailed in Note 13 and Note 25.

4. Management of Insurance and Financial Risk

The Group issues contracts that transfer insurance risk or financial risk or both. This section summarises these risks and the way the Group manages them.

4.1 Insurance risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Group faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insurance events are random and the actual number and amount of claims and benefits will vary from year to year from the level established using statistical techniques.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Group has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

Factors that aggravate insurance risk include lack of risk diversification in terms of type and amount of risk, geographical location and type of industry covered.

4.1.1 Casualty insurance risks

(a) Frequency and severity of claims

The frequency and severity of claims can be affected by several factors. The Group manages these risks through its underwriting strategy, adequate reinsurance arrangements and proactive claims handling.

The underwriting strategy attempts to ensure that the underwritten risks are well diversified in terms of type and amount of risk, industry and geography.

Underwriting limits are in place to enforce appropriate risk selection criteria. For example, the Group has the right not to renew individual policies, it can impose deductibles and it has the right to reject the payment of a fraudulent claim. Insurance contracts also entitle the Group to pursue third parties for payment of some or all costs (subrogation).

The Group's reinsurance arrangements include non-proportional excess of loss placements on a per claimant and a per occurrence basis.

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.1 Insurance risk (continued)

4.1.1 Casualty insurance risks (continued)

(b) Sources of uncertainty in the estimation of future claim payments (continued)

Claims on casualty contracts are payable on a claims-occurrence basis. The Group is liable for all insured events that occurred during the term of the contract, even if the loss is discovered after the end of the contract term. As a result, liability claims are settled over a long period of time and a large element of the claims provision relates to IBNR. There are several variables that affect the amount and timing of cash flows from these contracts. These mainly relate to the inherent risks of the business activities carried out by individual contract holders and the risk management procedures they adopted. The compensation paid on these contracts is the monetary awards granted for bodily injury suffered by employees (for employer's liability cover) or members of the public (for public liability cover). Such awards are lump-sum payments that are calculated as the present value of the lost earnings and rehabilitation expenses that the injured party will incur as a result of the accident.

The estimated cost of claims includes direct expenses to be incurred in settling claims. The Group takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original liability established. The liability for these contracts comprises a provision for IBNR and a provision for reported claims not yet paid at the consolidated statement of financial position date.

In calculating the estimated cost of unpaid claims (both reported and IBNR), the Group's estimation techniques are a combination of loss-ratio-based estimates (where the loss ratio is defined as the ratio between the ultimate cost of insurance claims and insurance premiums earned in a particular financial year in relation to such claims) and an estimate based upon actual claims experience using predetermined formulae where greater weight is given to actual claims experience as time passes.

The initial loss-ratio estimate is an important assumption in the estimation technique and is based on previous years' experience, adjusted for factors such as premium rate changes, anticipated market experience and historical claims inflation.

The estimation of IBNR is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the Group, where information about the claim event is available. IBNR claims may not be apparent to the insurer until many years after the event that gave rise to the claims has happened. For casualty contracts, the IBNR proportion of the total liability is high and will typically display greater variability between initial estimates and final outcomes because of the greater degree of difficulty of estimating these liabilities.

In estimating the liability for the cost of reported claims not yet paid, the Group considers any information available from loss adjusters and information on the cost of settling claims with similar characteristics in previous periods. Large claims are assessed on a case-by-case basis or projected separately in order to allow for the possible distortive effect of their development and incidence on the rest of the portfolio.

Where possible, the Group adopts multiple techniques to estimate the required level of provisions. This provides a greater understanding of the trends inherent in the experience being projected. The projections given by the various methodologies also assist in estimating the range of possible outcomes. The most appropriate estimation technique is selected taking into account the characteristics of the business class and the extent of the development of each accident year.

Note 21.2 presents the development of the estimate of ultimate claim cost for claims incurred in a given year. This gives an indication of the accuracy of the Group's estimation technique for claims payments.

4.1.2 Short duration life insurance contracts

(a) Frequency and severity of claims

Short-duration life insurance contracts are contracts that are typically of a short tenure, with the tenure being often determined by the length of an individual's time in employment. These contracts are mainly issued to employers to insure their commitments to their employees. The risk is affected by the nature of the industry in which the employer operates. The risk of death and disability will vary by industry.

The Group attempts to manage this risk through its underwriting and claims handling. Additionally, there is reinsurance on short-duration life insurance contracts.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.1 Insurance risk (continued)

4.1.2 Short duration life insurance contracts (continued)

(b) Sources of uncertainty in the estimation of future claim payments

There is no need to estimate mortality rates or morbidity rates for future years because these contracts have short duration. However, for incurred disability income claims, it is necessary to estimate the rates of recovery from disability for future years. The Group currently does so using reasonable assumptions.

(c) Changes in assumptions

The Group's assumptions in respect of short duration life insurance contracts have not significantly changed from the prior year.

4.1.3 Property insurance contracts

(a) Frequency and severity of claims

For property insurance contracts, climatic changes give rise to more frequent and severe extreme weather events (for example, flooding and hurricanes) and their consequences (for example, subsidence claims). For certain contracts, the Group has also limited the number of claims that can be paid in any policy year or introduced a maximum amount payable for claims in any policy year.

The Group has the right to re-price the risk on renewal. It also has the ability to impose deductibles and reject fraudulent claims. These contracts are underwritten by reference to the commercial replacement value of the properties and contents insured, and claims payment limits are always included to cap the amount payable on occurrence of the insured event. The cost of rebuilding properties, of replacement or indemnity for contents and the time taken to restart operations for business interruption are the key factors that influence the level of claims under these policies. The greatest likelihood of significant losses on these contracts arises from storm or flood damage. The Group analyses the property exposures using in-house and external modelling tools and purchases sufficient reinsurance protection to cover its perceived liabilities.

The Group's reinsurance arrangements include proportional quota share and surplus arrangements and non-proportional excess of loss placements on a per claimant and a per occurrence basis.

(b) Sources of uncertainty in the estimation of future claim payments

Property claims are analysed separately for subsidence and non-subsidence claims. The development of large losses/catastrophes is analysed separately. Non-subsidence claims can be estimated with greater reliability, and the Group's estimation processes reflect all the factors that influence the amount and timing of cash flows from these contracts. The shorter settlement period for these claims allows the Group to achieve a higher degree of certainty about the estimated cost of claims and relatively little IBNR is held at year end. The longer time needed to assess the emergence of a subsidence claim makes the estimation process more uncertain.

4.1.4 Long-term insurance contracts

(a) Frequency and severity of claims

For contracts where death is the insured risk, the most significant factors that could increase the overall frequency of claims are epidemics or widespread changes in lifestyle, such as in eating, smoking and exercise habits, resulting in earlier or more claims than expected. For contracts where survival is the insured risk, the most significant factor is continued improvement in medical science and social conditions that would increase longevity.

At present, these risks do not vary significantly in relation to the location of the risk insured by the Group. However, undue concentration could have an impact on the severity of benefit payments on a portfolio basis.

For contracts with fixed and guaranteed terms, there are no mitigating terms and conditions that reduce the insurance risk accepted. For contracts without fixed terms, a significant portion of the insurance risk is shared with the insured party. The Group charges for mortality risk on a monthly basis for most life and critical illness insurance contracts without fixed terms. It has the right to alter these charges based on its mortality experience and hence minimise its exposure to mortality risk.

Total	10,981,527	100.0%	9,950,367	100.0%

Insurance risk for contracts disclosed in this note is also affected by the contract holders' right to pay reduced or no future premiums, to terminate the contract completely, or to exercise a guaranteed annuity option. As a result, the amount of insurance risk is also subject to contract holder behaviour.

The following tables for annuity insurance contracts illustrate the concentration of risk based on five bands that group these contracts in relation to the amount payable per annum, as if the annuity were in payment at the year end. The Group does not hold any reinsurance contracts against the liabilities carried for these contracts.

The risk is spread over all bands, which is consistent with the prior year.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.1 Insurance risk (continued)

4.1.4 Long-term insurance contracts (continued)

(b) Process used to decide on assumptions

For long-term insurance contracts, the Group determines assumptions in relation to future mortality, morbidity and other contingencies, terminations, investment returns, administrative expenses and other items that are appropriate to the policies, their location and the local statutory reserving requirements. The assumptions are best estimate assumptions with appropriate provisions for adverse deviations, consistent with the use of a Policy Premium Method valuation.

The nature and method of determining the significant assumptions made by the Group in the computation of policyholders' liabilities are described in the following paragraphs.

- **Mortality & morbidity**

An appropriate base table of standard mortality or morbidity is chosen depending on the type of contract. Supplemental information, such as reinsurance rates, is used where standard tables are not available. An investigation into the Group's experience in recent years is performed, and the standard actuarial tables are adjusted where appropriate to reflect the Group's own experience and expectations. For contracts that insure the risk of longevity, appropriate future mortality improvement rates are assumed based on industry standards.

- **Terminations**

Estimates of the amounts and timings of future benefit and premium payments are based on Group experience over extended periods. Terminations (lapses and surrenders) and variable premium assumptions vary by product type and policy duration.

- **Investment returns**

The computation of policyholders' liabilities takes into account projected net investment income on assets supporting policyholders' liabilities and income expected to be earned or foregone on reinvestment or financing of mismatched cash flows. In the absence of robust market information, long-term yields are determined using recent asset returns, current market expectations and relevant regulatory guidelines. Other information, such as macro-economic data and projections, is considered where available.

The following table summarises the rates of return used for the valuation of policyholders' liabilities.

	2021	2020
Trinidad and Tobago	3.3% - 7.7%	3.3% - 9.4%
Jamaica	7.0% - 11.2%	6.7%-11.1%
Dutch Caribbean	4.3% - 4.6%	3.0% - 4.0%

- **Policy maintenance expense and inflation**

Amounts are included in policyholders' liabilities to provide for the future costs of administering policies in force. The expense base is determined from a review of current, recent and expected Group expense levels and allowance is made for future expense inflation.

The inflation rates assumed are summarised in the following table.

	2021	2020
Trinidad and Tobago	3.5%	3.5%
Jamaica	4.0% - 4.5%	5.0%
Dutch Caribbean	1.0%	0%

- **Tax**

It has been assumed that current tax legislation and rates for long-term insurance companies continue unaltered.

Worsening of base renewal expense level	+ 10.0%	36,194	28,454

The above analyses are based on a change in assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated.

4.2 Financial risk

The Group is exposed to financial risk through its financial assets, financial liabilities (investment contracts and borrowings), reinsurance assets and insurance liabilities. In particular, the key financial risk is that the proceeds from its financial assets are not sufficient to fund the obligations arising from its insurance and investment contracts. The components of this financial risk are interest rate risk, equity price risk, foreign currency risk, liquidity risk and credit risk. These risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements.

Risk management is carried out by Executive Investment Committees and Actuarial departments of operating units under policies approved by the Group's Board of Directors. The Group identifies, evaluates and hedges financial risks in close co-operation with the Group's operating units. The Board provides principles for overall risk management as well as policies covering specific areas such as foreign exchange risk, interest rate risk, credit risk and investment of excess liquidity.

4.2.1 Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk - currency risk, interest rate risk and other price risk, each of which is considered below.

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.2 Financial risk (continued)

4.2.1 Market risk (continued)

(a) Currency risk

The Group takes on exposure to effects of fluctuations in the prevailing foreign currency rates on its financial position and cash flows. The Group's main operations are in the Caribbean and in the Netherlands. The main exposure to risks are in respect to the US dollar, Antillean guilder, Jamaican dollar, Euro and the British pound. The Group's strategy for dealing with foreign exchange risk is to offset, as far as possible, foreign currency liabilities with assets denominated in the same currency.

Each subsidiary has an Executive Investment Committee, which has oversight for the management of currency risk. The Trinidad and Tobago insurance subsidiaries' exposure to currency risk is also mitigated by the requirements of the Insurance Act 2018, which does not allow more than 30% of the assets supporting policyholder liabilities to be held in currencies other than the currency of the liability.

The tables below summarises the Group's exposure to foreign currency exchange rate risk as at 31 December. The Group's assets and liabilities at carrying amounts are included in the table categorised by currency positions expressed in TT\$ equivalents.

	TT \$'000	US \$'000	NAF \$'000	JMD \$'000	GBP \$'000	Euro \$'000	Other \$'000	Total \$'000
As at 31 December 2021								
Total assets	11,228,731	8,950,507	5,151,236	6,024,296	190,785	1,514,735	1,517,391	34,577,681
Total liabilities	14,213,679	2,339,741	6,860,506	4,353,763	180,900	707,226	938,488	29,594,303

The analysis below is performed for reasonable possible movements in foreign currency exchange rates with all other variables held constant, showing the impact on the statement of income and translation reserve at the reporting date.

Change in variables	US	NAF	JMD	GBP	Euro	Other	Total
2021	0.6%	0.6%	-4.2%	7.3%	-3.2%	-1.8% to 3.5%	
2020	2.1%	2.1%	-2.8%	0.3%	-7.0%	-3.9% to 10.3%	
	US \$'000	NAF \$'000	JMD \$'000	GBP \$'000	Euro \$'000	Other \$'000	Total \$'000
Impact on statement of income							
2021	56,034	–	22,441	345	180	(1,570)	77,430
2020	73,498	–	15,958	(130)	(1,378)	(7,651)	80,297
Impact on translation reserve							
2021	13,364	5,839	(134,357)	404	(22,310)	2,247	(134,813)
2020	43,044	19,709	(86,865)	14	(57,298)	16,535	(64,861)

(b) Interest rate risk

The Group is exposed to various risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The major element of interest rate risk within the Group is the risk that the interest earned on the Group's investments is insufficient to meet the interest rates credited or guaranteed to policyholders. This applies to traditional life insurance policies and the deposit administration plans.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.2 Financial risk (continued)

4.2.1 Market risk (continued)

(b) Interest rate risk (continued)

Exposure is managed largely by the use of natural hedges that arise by matching interest-sensitive assets with liabilities of a similar nature. The Group also mitigates the effect of interest rate risk of the investment portfolio through the functioning of an Executive Investment Committee and the pricing of products by the actuarial function. The investment portfolio return is continually monitored by the Investment Committees. The results of these reviews inform the pricing of products and interest rates to be credited to the respective policies and plans.

The sensitivity analysis for interest rate risk illustrates how changes in the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates at the reporting date. For the sensitivity analysis, a 1% movement in interest rates was used for 2021 for the Trinidadian market (2020 - 1%), a 2% movement was used for 2021 for the Jamaican market (2020 - 2%) and a 1% movement for 2021 was used for the Dutch Caribbean (2020 - 1%). The following table shows the estimated effect of an increase or decrease in the above rates on the profit or loss and fair value reserve.

	Effect on fair value reserve		Effect on consolidated income	
	2021	2020	2021	2020
	\$'000	\$'000	\$'000	\$'000
Increase in interest rates	(468,827)	(466,368)	(55,463)	(57,304)
Decrease in interest rates	597,711	542,958	76,667	53,570

(c) Other price risk

Price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market. The Group is exposed to equity securities price risk because of investments held by the Group and classified on the consolidated statement of financial position as fair value through profit or loss. The Group manages its price risk by limiting the amount of its investments in equities and by monitoring movements in equity prices.

The sensitivity analysis for equity price risk illustrates how changes in the fair value of equity securities will fluctuate because of changes in market prices at the reporting date. The following table shows the estimated effect of reasonably possible changes in equity prices on the consolidated statement of income and equity.

	Change in equity prices		Effect on consolidated income	
	2021	2020	2021	2020
	%	%	\$'000	\$'000
Stock exchanges and markets				
Trinidad and Tobago	5.0%	2.5%	84,315	35,255
Jamaica	10.0%	15.0%	91,922	129,301
Dutch Caribbean	1.0%	1.0%	3,428	2,110
Other	1% - 9.3%	1% - 6.0%	47,354	30,266
			<u>227,019</u>	<u>196,932</u>

4.2.2 Liquidity risk

Liquidity risk is the risk that cash may not be available to pay obligations when due, at a reasonable cost. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities, and the ability to close out market positions.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.2 Financial risk (continued)

4.2.2 Liquidity risk (continued)

Certain of the Group's contracts have features that allow them to be terminated at short notice creating a potential liquidity exposure. The Group monitors liquidity on a regular basis. An internally constituted Executive Investment Committee set limits on the minimum proportion of maturing funds available to meet such calls and on the minimum level of borrowing facilities that should be in place to cover claims.

There are no individual contracts or policyholders who have the potential to influence the withdrawal of a significant amount of liabilities.

The following tables analyse the insurance and financial liabilities of the Group into relevant maturity groupings based on the remaining period to the contractual or expected maturity date. Financial liabilities are at contractual undiscounted cash flows, and insurance contracts and investment contracts are at expected undiscounted cash flows.

	Carrying amount \$'000	Contractual/Expected Undiscounted Cash Flows		
		Less than one year \$'000	One - five years \$'000	Over five years \$'000

Total	27,556,090	6,253,633	7,145,158	39,179,478

4.2.3 Credit risk

Credit risk is defined as the potential for loss that can occur as a result of an individual, counterparty or issuer being unable or unwilling to honour its contractual obligations to the Group. Each subsidiary in the various jurisdictions has an Executive Investment Committee (EIC) that sets credit limits and monitors exposure by constraining the magnitude and tenor of the exposure to counterparties and issuers. Some of the credit risk mitigation techniques include, where appropriate, the right to require initial collateral or margin, the right to terminate transactions, and the right to obtain collateral (including guarantees) should unfavourable events occur.

Collateral held as security for mortgage loans and other loans includes physical or tangible residential and commercial edifices as well as legal rights to insurance portfolio and other assets of the respective borrowers. The EIC initiates regular portfolio reviews, monitors counterparty creditworthiness and evaluates potential transaction risks with a view towards early problem identification and protection against unacceptable credit-related losses.

4. Management of Insurance and Financial Risk (continued)

4.2 Financial risk (continued)

4.2.3 Credit risk (continued)

(a) Assets bearing credit risk

The Group actively monitors the financial status of its reinsurers both by reference to publicly available information and the Financial Strength Ratings of A.M. Best. All of the Group's reinsurers are rated superior by A.M. Best. A rating of superior is assigned to reinsurance companies that have, in the opinion of A.M. Best, a superior ability to meet their ongoing obligations to the primary insurer.

Below is an analysis of assets bearing credit risk.

	Gross exposure		Net carrying amount	
	2021 \$'000	2020 \$'000	2021 \$'000	2020 \$'000
Investment securities measured at fair value through profit or loss (excluding equity instruments)	5,468,729	5,566,861	5,468,729	5,566,861
Investment securities measured at fair value through other comprehensive income	6,162,848	5,544,108	6,162,848	5,544,108
Investment securities measured at amortised cost	8,153,630	7,916,687	8,104,368	7,866,873
Loans and receivables	2,293,618	2,254,269	1,941,965	2,015,967
Reinsurance assets	1,100,732	1,071,541	1,100,732	1,071,541
Cash and cash equivalents	3,800,445	3,742,976	3,784,574	3,721,405
	<u>26,980,002</u>	<u>26,096,442</u>	<u>26,563,216</u>	<u>25,786,755</u>

(b) Credit quality of reinsurance and financial assets

The credit quality of financial assets can be assessed by reference to external credit ratings, if available, or to a rating assigned by the investment manager using an approach consistent with that used by Standard and Poor's.

AAA

An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Below BBB

Obligations rated 'Below BBB' are regarded as having significant speculative characteristics. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

Not Rated

This indicates that there is insufficient information on which to base a rating. These balances are current and are monitored regularly for impairment. This classification mainly includes obligations due from individuals and short-term securities.

(d) Loss allowance

The following tables show reconciliations from the opening to the closing balance of the loss allowance by class of financial asset. Reconciling items include the following:

- ▶ New assets originated or purchased, which reflect the allowance related to assets newly recognized during the period.
- ▶ Assets derecognised, which reflect the allowance related to assets derecognized during the period without a credit loss being incurred, including those assets that were derecognized following a modification of terms.
- ▶ Net transfer to/(from) 12-month ECL and lifetime ECL, which are presumed to occur before any corresponding remeasurement of the allowance.
- ▶ Remeasurements, which comprise the impact of changes in model inputs or assumptions, including changes in forward-looking macroeconomic conditions; changes in the measurement following a transfer between 12-month ECL and lifetime ECL; and unwinding of the time value discount due to the passage of time.

Cash and cash equivalents

Impairment on cash and cash equivalents measured at amortised cost has been measured on the 12-month expected loss basis and reflects the short maturities of the exposures. The Group uses a similar approach for the assessment of expected credit losses for cash and cash equivalents to those used for debt securities.

The impairment allowance on cash and cash equivalents as at 31 December 2021 is \$15,871,000 (2020: \$21,571,000). The Group recognised a net impairment gain of \$5,575,000 for the year ended 31 December 2021 (2020: net impairment expense of \$6,946,000).

Credit Risk - Economic Variable Assumptions

The most significant period-end assumptions used for the ECL estimate as at 31 December 2021 and 2020 are set out below.

The PDs and LGDs are impacted by long-term changes in the various data sets gathered from external rating agencies such as Moody's. Macroeconomic variables used in the Group's ECL models also include, but are not limited to, gross domestic product growth, inflation rates, national budget deficits, debt to GDP ratios for the various territories. Refer to the table below for the ranges applied to each scenario for the two most significant assumptions. The weighting assigned to each scenario vary by jurisdiction.

Scenario	2021 Assumptions			2020 Assumptions		
	GDP growth	Inflation	Weights	GDP growth	Inflation	Weights
Base	Stable	Positive	15% - 50%	Stable	Positive	65% - 70%
Optimistic	Positive	Positive	40% - 70%	Positive	Positive	5% - 10%
Pessimistic	Negative	Negative	5% - 10%	Negative	Negative	15% - 20%
Acute pessimistic	Negative	Negative	5%	Negative	Negative	5% - 10%

Refer to Note 3(e) for descriptions of the scenarios.

(f) Concentrations of risks of reinsurance and financial assets with credit risk exposure

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Group's performance to developments affecting a particular industry.

The following table breaks down the Group's main credit risk exposure as categorised by the industry sectors of its counterparties.

	2021 \$'000	2020 \$'000
Financial services	7,958,131	7,554,263
Manufacturing	293,155	409,712
Real estate	1,150,683	1,075,725
Wholesale and retail trade	214,599	539,418
Public sector	12,749,744	12,130,753
Insurance and reinsurance	1,800,040	1,853,402
Consumers/individuals	618,629	302,613
Transportation storage	504,725	540,316
Utilities	698,425	483,646

4. Management of Insurance and Financial Risk (continued)

4.2 Financial risk (continued)

4.2.4 Capital management

The Group's principal capital resources are as follows:

	2021 \$'000	2020 \$'000
Shareholders' equity	4,974,381	4,670,365
Borrowings and repurchase agreements	<u>3,491,038</u>	<u>3,247,159</u>
Total	<u>8,465,419</u>	<u>7,917,524</u>

The movements in shareholders' equity are presented in the consolidated statement of changes in equity and the movements in borrowings and repurchase agreements are disclosed in note 22.

The Group's objectives when managing capital are:

- To comply with the capital requirements required by the regulators of the markets where the Group operates;
- To safeguard the Group's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To provide an adequate return to shareholders by pricing insurance and investment contracts commensurately with the level of risk.

In each country in which the Group operates, the local insurance regulator indicates the required minimum amount and type of capital that must be held by each of the subsidiaries in addition to their insurance liabilities. The Group is also subject to insurance solvency regulations in all the territories in which it issues insurance and investment contracts. The minimum required capital must be maintained at all times throughout the year. The Group monitors these requirements throughout the year to ensure compliance.

No changes were made in the objectives, policies or processes for managing capital during the year ended 31 December 2021.

The table below summarises the minimum required capital across the main territories in the Group. The Group has complied with these minimum capital requirements. These figures are an aggregate number, being the sum of the statutory capital and surplus for each insurance subsidiary in each country subject to local regulatory requirements (current or prospective), which may differ from jurisdiction to jurisdiction.

	Minimum regulatory capital	
	2021 \$'000	2020 \$'000
Guardian Re (SAC) Limited	67,582	58,465
Guardian General Insurance (OECS) Limited	12,829	12,591
Guardian Life (OECS) Limited	1,806	1,500
Guardian General Insurance Limited	73,327	86,061
Guardian General Insurance Jamaica Limited	163,023	170,666
Guardian Life Limited	565,442	587,358
Trinidad Life Insurance Companies	734,574	689,808
Dutch Caribbean Insurance Companies	515,183	479,389

The Trinidadian trust services subsidiary holds a license under the Financial Institutions Act 2008 and the Securities Industries Act 2012. Under the Financial Institutions Act, the subsidiary is required to have a minimum paid up share capital of \$15 million and to transfer a minimum of 10% of its profit after tax to a Statutory Reserve Fund until the balance in the Fund is not less than the paid up capital of the subsidiary as well as the subsidiary's regulatory capital shall be no less than 10% of its risk weighted assets. Under the Securities Industries Act 2012, the subsidiary is required to have minimum capital of \$6 million, of which at least \$3 million shall be regulatory capital. The subsidiary has complied with these requirements.

The Trinidadian asset management subsidiary holds a license under the Securities Industries Act 2012, and as such, the subsidiary is required to have a minimum capital of \$6 million, of which at least \$3 million shall be regulatory capital. The subsidiary has complied with this requirement.

5. Property, plant and equipment (continued)

The following are the dates of the last valuation of properties in the Group:

Guardian Life of the Caribbean Limited	-	December 2021
Bancassurance Caribbean Limited	-	December 2021
Guardian Life Limited	-	December 2021
Guardian General Insurance Limited	-	December 2021
Guardian Shared Services Limited	-	December 2021
Fatum Holding N.V.	-	Between October 2018 and September 2019

Valuations were made on the basis of open market value by external independent appraisers, who are accredited in the territory that they serve. Valuations are based on active market prices, adjusted for any difference in the nature, location or condition of the specific property.

Depreciation expense of \$48,457,000 (2020 - \$51,345,000) has been charged in operating expenses.

If freehold and leasehold properties were stated on a historical cost basis, the amounts would be as follows:

	2021	2020
	\$'000	\$'000
Cost	444,015	443,196
Accumulated depreciation	<u>(209,903)</u>	<u>(205,325)</u>
Net book value	<u>234,112</u>	<u>237,871</u>

6. Leases

The Group has both commercial and residential investment properties in the following territories: Jamaica, Barbados, Trinidad and Tobago, Grenada and Martinique.

Valuations are conducted by external valuers. All valuers are accredited in the territory that they serve, specializing in the valuation of commercial, residential and mixed use properties.

Residential properties are mainly revalued using the comparable sales approach, which estimates the fair value based on sale prices of properties of similar nature or in similar locations with price adjustments being made for any notable differences between the sample and subject properties such as location, size, and quality of improvements.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars
(Continued)

7. Investment properties (continued)

Commercial properties are primarily valued using the income and sales comparison approach, the direct capitalisation of income approach, or the profit tests or accounts approach. The income and sales comparison approach involves determining the value of the properties by applying an appropriate valuation model to convert the expected future cash flows into present values. Discount rates applied to this model throughout the Group range from 5.75% to 6.50% (2020: 6.0% to 6.75%) as deemed most appropriate by the valuers in the respective territories.

Both the direct capitalisation of income and profit tests or accounts approach apply a valuation model that converts monthly rental income and expenses into market values through the use of a capitalisation rate. The capitalisation rates within these models, as applied by external professional valuers, range from 8.0% to 11.75% (2020: 10.5% to 11.5%) across the Group.

The uncertain economic outlook as a result of the COVID-19 pandemic may have a material adverse effect on the marketability of investment properties. This uncertainty is factored into the valuation of investment property, specifically in estimating occupancy rates, expected revenue or revenue growth rates, and discount rates, all of which are significant inputs into the fair value determination.

Many of the 2021 valuations contain a 'material valuation uncertainty' clause due to the market disruption caused by the COVID-19 pandemic, which resulted in a reduction in transactional evidence and market yields. Accordingly, the valuer cannot attach as much weight to previous market evidence for comparison purposes, and there is an increased risk that the price realised in an actual transaction would differ from the value conclusion. As a result of this increased uncertainty, the assumptions may be revised significantly in 2022.

No investment property in the Group is subject to any liens or mortgages and the Group has no restrictions with regard to the transfer, resale or other use of its investment properties. The Group is not under any contractual obligation with regard to significant development, enhancement, repair or maintenance of any investment properties.

Future minimum lease payments receivable on leases of investment properties are as follows:

	2021 \$'000	2020 \$'000
Within one year	67,380	62,100
Between one and two years	27,335	66,073
Between two and three years	23,562	32,378
Between three and four years	23,053	27,967
Between four and five years	22,373	27,209
After five years	48,270	70,838
	<u>211,973</u>	<u>286,565</u>

Goodwill

Goodwill is assigned to the Group's cash-generating units on acquisition. In accordance with IFRS 3 Business Combinations, all assets that gave rise to goodwill were reviewed for impairment at year end using the value-in-use method. In each case, the cash flow projections were based on financial budgets for a three-year period, approved by senior management, with a growth assumption applied for later years.

A summary of the goodwill for each cash-generating unit is presented below:

	2021 \$'000	2020 \$'000
Guardian General Insurance Limited	97,459	97,459
Guardian Insurance Limited	153,977	153,977

8. Intangible assets (continued)**Goodwill (continued)**

Discount rates: Discount rates represent the current market assessment of the risks specific to each cash-generating unit, taking into consideration the time value of money and individual risks of the underlying assets that have not been incorporated in the cash flow estimates. The discount rate calculation is based on the specific circumstances of the Group and its operating segments and is derived from its weighted average cost of capital (WACC).

Growth rates: Rates are based on published industry research and management's expected performance of each cash-generating unit.

Based on the results of the above review, no impairment expense was required for goodwill.

On 26th November 2021, the Group acquired a 25% shareholding in EIKM Holdings Limited ('EIKM') for cash consideration of \$11,300,000. EIKM is incorporated in Trinidad and Tobago and is engaged in the sale and distribution of pharmaceutical products. The Group recognised goodwill on the acquisition of \$8,626,000, which is included in the Group's carrying value of its investment in EIKM.

The summarised financial information below, for the Group's principal associates (see Note 47), represents amounts shown in the respective associate's financial statements prepared in accordance with IFRSs (adjusted by the Group for equity accounting purposes).

The loss allowance on investment securities measured at fair value through other comprehensive income is recognised against other comprehensive income and accumulated in the fair value reserve. The total loss allowance accumulated in fair value reserve is \$32,984,000 (2020: \$28,208,000).

The carrying amount of investment securities that were pledged as collateral for liabilities was \$187,453,000 (2020: \$160,815,000).

Investment securities are pledged as collateral primarily as part of sales and repurchases and securities borrowing transactions under terms that are usual and customary for such activities. In addition, as part of these transactions, the Group has received collateral that it is permitted to resell or repledge in the absence of default.

As at 31 December 2021, the fair value of investment securities accepted as collateral that the Group is permitted to sell or repledge in the absence of default was \$19,791,000 (2020: \$24,446,000). No securities were sold or repledged during the year.

	2021	2020
	\$'000	\$'000
12. Properties for development and sale		
Properties for development and sale (Note 7)	<u>101,482</u>	<u>117,585</u>

Properties for development and sale comprise the Group's investment in one component of the Pointe Simon urban re-development project in Fort de France, Martinique.

The French government provides incentives for qualifying property developments in France's overseas territories. During 2013 and 2014, the Group availed itself of the programme and received funds based upon agreed valuations of twenty-five residential units in 2014 (2013 – three units). The sums received were recorded as other income. While legal title has been transferred to third parties, the arrangement contemplates that at the expiration of a six-year period (2020 and 2021), the units will return to the Group's legal ownership, and will be available for disposal to third parties at the prevailing market price. Accordingly, the Group did not derecognise these assets, and continued to account for these units within Properties for development and sale. As at 31 December 2021, all units have been returned to the Group's legal ownership and are available for disposal to third parties.

During 2014, the Group sold the hotel component of the development to a Martinique incorporated company known as Sas Compagnie Hoteliere de la Pointe Simon (CHPS). As part of the sale negotiation, the Group acquired a 24% interest in CHPS for nominal consideration. The Group financed the sale to CHPS and at 31 December 2021 the outstanding balance, included in loans and other receivables, was €10.2 million (2020: €10.2 million). During 2020, the original terms of the loan were modified. The outstanding loan balance at the end of the year have the following terms:

1. €9.7 million repayable in varied instalments payments commencing June 2022, with a bullet at maturity (December 2026) of €6.4 million.

Interest is based on EURIBOR 12 Months + 10% margin floored at 1.5%.

2. €0.4 million repayable over 2.5 years. Interest is based on EURIBOR 12 Months + 10% margin floored at 1.5%.

3. €0.1 million repayable at maturity, December 2026.

The highly uncertain economic outlook as a result of the COVID-19 pandemic was incorporated into the valuations carried out on these properties in 2021.

13. Pension plan assets/liabilities

The following information explains the quantification of the assets and liabilities recognised in the consolidated statement of financial position and the net income for the year in accordance with the provisions of IAS 19.

	Pension plan asset		Pension plan liability		Net pension plan asset/(liability)	
	2021	2020	2021	2020	2021	2020

13. Pension plan assets/liabilities (continued)

The amount in the consolidated statement of income is made up as follows:

	2021	2020
	\$'000	\$'000
Net interest expense	1,037	(3,244)
Current service cost	(21,915)	(22,109)
Past service cost	(735)	(2,364)
Administration expenses	(1,222)	(906)
Total pension cost (Note 36)	<u>(22,835)</u>	<u>(28,623)</u>

The remeasurement of pension plan obligation in other comprehensive income is made up as follows:

Actuarial gains and losses arising during the period from:

- changes in demographic assumptions	(21,944)	44,508
- changes in financial assumptions	61,770	(13,992)
- experience adjustment	(10,143)	3,743
	<u>29,683</u>	<u>34,259</u>

The movement in the fair value of pension plan assets of the year is as follows:

Balance at beginning of year	963,505	938,213
Administration expenses	(1,222)	(906)
Benefit payments	(38,626)	(45,163)
Company contributions	31,754	27,744
Contributions by plan participants	1,374	1,225
Settlements	-	(582)
Remeasurement arising from experience adjustment	(17,803)	1,707
Interest income	47,531	43,592
Exchange rate adjustments	1,350	(2,325)
Balance at end of year	<u>987,863</u>	<u>963,505</u>

The movement in the obligation to plan members over the year is as follows:

Balance at beginning of year	979,620	986,341
Current service cost	21,915	22,109
Interest cost	46,494	46,836
Past service cost	735	2,364
Contributions by plan participants	1,374	1,225
Remeasurement arising from changes in demographic assumptions	21,944	(44,508)
Remeasurement arising from changes in financial assumptions	(61,770)	13,992
Remeasurement arising from experience adjustment	(7,660)	(2,036)
Benefits paid	(38,626)	(45,163)
Exchange rate adjustments	686	(1,540)
Balance at end of year	<u>964,712</u>	<u>979,620</u>

	2021	2020
Discount rates	2.9% - 12.5%	2.6% - 11.2%
Future salary increases	0.0% - 6.3%	0.0% - 5.0%
Post-retirement mortality	GAM94/NIS2012	GAM94/NIS2012
Pre-retirement mortality	GAM94/NIS2012	GAM94/NIS2012
Withdrawal from service	Ignored/Yes	Ignored/Yes
Future pension increases	Ignored/3.5%	Ignored/3.5%
Proportion of employees opting for early retirement	Ignored	Ignored
Life expectancy of pensioners at the age of 65 - male	17.0 - 18.3 years	17.1 to 18.3 years
Life expectancy of pensioners at the age of 65 - female	21.8 - 22.1 years	20.4 to 22.1 years

The actual return on plan assets was \$29,732,000 (2020: \$44,729,000).

Pension plan assets are comprised as follows:	2021		2020	
	\$'000	%	\$'000	%
Quoted investments				
Equity securities				
- Trinidad and Tobago	144,314	14.6%	129,666	13.5%
- Non-Caribbean	33,548	3.4%	15,812	1.6%
Government securities				
- Trinidad and Tobago	165,832	16.8%	157,902	16.4%
- Non-Caribbean	48,679	4.9%	53,865	5.6%
Corporate bonds				
- Trinidad and Tobago	47,743	4.8%	46,908	4.9%
- Non-Caribbean	154,841	15.7%	157,724	16.4%
Unquoted investments				
Government securities				
- Other Caribbean	100,689	10.2%	109,366	11.4%
Corporate bonds				
- Other Caribbean	-	0.0%	2,502	0.3%
Cash and cash equivalents	33,037	3.3%	37,395	3.8%
Property	17,550	1.8%	18,400	1.9%
Other	241,630	24.5%	233,965	24.2%
	987,863	100.0%	963,505	100.0%

The defined benefit plan assets as at 31 December 2021 include investments in the Group's managed mutual funds of \$17,595,000 (2020: \$14,929,000). Included in the plan's assets is a property with a fair value of \$17,550,000 (2020: \$18,400,000), which is not occupied by the Group.

Contributions from the defined contribution plan are invested in a deposit administration contract. The deposit administration contract is part of a general fund, which is managed by a Group subsidiary.

The Group's expected contributions to its defined benefit pension plans for the year ending 31 December 2022 are \$30,157,000.

The duration of the defined benefit plans obligation at the end of the reporting period is 13 to 21 years (2020: 13 to 22 years).

Expressed in Trinidad and Tobago Dollars

(Continued)

13. Pension plan assets/liabilities (continued)

A quantitative sensitivity analysis for significant assumptions as at 31 December 2021 is shown below:

	Impact on the net defined benefit obligation	
	Increase	Decrease
	\$'000	\$'000
1% increase/decrease in discount rate	(105,306)	130,870
1% increase/decrease in future salary increases	21,584	(18,892)
1% increase/decrease in future pension increases	45,988	(39,086)
Life expectancy increase/decrease by 1 year - male	9,236	(9,452)
Life expectancy increase/decrease by 1 year - female	15,102	(15,358)

The sensitivity analysis above has been determined based on a method that extrapolates the impact on the net defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

14. Deferred taxation

The following amounts are shown in the consolidated statement of financial position:

	2021	2020
	\$'000	\$'000
Deferred tax assets:		
- To be recovered after more than 12 months	76,931	52,954
- To be recovered within 12 months	19,022	18,273
	<u>95,953</u>	<u>71,227</u>
Deferred tax liabilities:		
- Crystallizing after more than 12 months	(447,831)	(399,676)
- Crystallizing within 12 months	(19,959)	(20,341)
	<u>(467,790)</u>	<u>(420,017)</u>
Net deferred tax liability	<u>(371,837)</u>	<u>(348,790)</u>

Deferred income tax assets are recognised for tax losses carried forward to the extent that the realisation of the related tax benefit through future taxable profits is probable.

The movement on the net deferred tax account is as follows:

	2021	2020
	\$'000	\$'000
Balance at beginning of year	(348,790)	(301,903)
(Charged)/credited to:		
- statement of income (Note 38)	(53,786)	(21,418)
- other comprehensive income	22,019	(28,266)
Acquisition of subsidiary (Note 46)	-	(2,915)
Exchange rate adjustments	8,720	5,712
Balance at end of year	<u>(371,837)</u>	<u>(348,790)</u>

There are tax losses relating to subsidiaries that are available for set-off against future chargeable profits of \$224,111,000 (2020: \$208,917,000). These tax losses expire over varying periods. No deferred tax asset has been recognised on tax losses carried forward of \$67,095,000 (2020: \$41,910,000), due to the uncertain timing of their recovery. Some of these losses have not yet been agreed with the respective tax authorities.

Expressed in Trinidad and Tobago Dollars

(Continued)

21. Insurance contracts (continued)

21.2 Claims development tables - short-term insurance contracts (non-life)

The development of insurance liabilities provides a measure of the Group's ability to estimate the ultimate value of claims. Claims development tables are disclosed on an accident year basis (where the reference is to the actual date of the event that caused the claim), with the exception of international property and casualty claims, which is disclosed by underwriting year account.

As at 31 December 2021	Total \$'000
Insurance claims - gross	
- By accident year	935,129
- By underwriting year	<u>293,547</u>
Total liability (Note 21.1 (e))	<u><u>1,228,676</u></u>
Insurance claims - net	
- By accident year	532,195
- By underwriting year	<u>154,669</u>
Total liability (Note 21.1 (e))	<u><u>686,864</u></u>

The top half of each table below illustrates how the Group's estimate of total claims outstanding for each accident year/underwriting year has changed at successive year-ends. The bottom half of the table reconciles the cumulative claims to the amount appearing on the consolidated statement of financial position as per summary below.

Insurance claims - gross

Accident year	2016 \$'000	2017 \$'000	2018 \$'000	2019 \$'000	2020 \$'000	2021 \$'000	Total \$'000
Estimate of ultimate claims costs:							
- at end of accident year	1,246,664	3,206,956	1,282,538	2,046,275	1,313,159	1,509,719	-

Current estimate of cumulative claims	22,996	26,994	19,210	14,256	25,198	95,198	203,852
Cumulative payments to date	<u>(21,968)</u>	<u>(22,682)</u>	<u>(14,345)</u>	<u>(7,550)</u>	<u>(6,507)</u>	<u>(4,582)</u>	<u>(77,634)</u>
Liability recognized in the consolidated statement of financial position	1,028	4,312	4,865	6,706	18,691	90,616	126,218
Liability in respect of prior years							<u>28,451</u>
Total liability							<u>154,669</u>

22. Financial liabilities

	2021 \$'000	2020 \$'000
Non-current portion of financial liabilities		
Medium-term borrowings	3,245,019	2,263,613
Repurchase agreements	<u>55,066</u>	<u>-</u>
	<u>3,300,085</u>	<u>2,263,613</u>
Current portion of financial liabilities		
Medium-term borrowings	38,657	879,275
Short-term borrowings	10,313	25,488
Repurchase agreements	<u>141,983</u>	<u>78,783</u>
Total current portion of borrowings and repurchase agreements (Note 22.1)	190,953	983,546
Interest payable	<u>30,665</u>	<u>30,345</u>
	<u>221,618</u>	<u>1,013,891</u>
Total	<u>3,521,703</u>	<u>3,277,504</u>

The fair value of medium-term borrowings amounted to \$3,504,503,000 (2020: \$2,650,764,000). The fair value of medium-term borrowings is determined by applying a discounted cash flow model for the remaining term to maturity using a current yield curve for a similar debt instrument. For short-term debt, the carrying amounts approximate their fair value.

The repurchase agreements represent the normal activities of the asset management operations. The carrying amount of the repurchase agreements approximate their fair value.

The Group has not made any defaults of principal, interest or other breaches with respect to their borrowings during the year (2020 - Nil).

22. Financial liabilities (continued)**22.1 Borrowings and repurchase agreements**

	2021	2020
	\$'000	\$'000
Company	3,018,903	2,929,529
Subsidiaries	<u>472,135</u>	<u>317,630</u>
	<u>3,491,038</u>	<u>3,247,159</u>
Current	190,953	983,546
Non-current	<u>3,300,085</u>	<u>2,263,613</u>
	<u>3,491,038</u>	<u>3,247,159</u>

The movements in borrowings and repurchase agreements are summarized below:

Balance at beginning of year	3,247,159	2,500,070
Proceeds from borrowings and repurchase agreements	1,072,825	1,798,280
Repayment of borrowings and repurchase agreements	(781,193)	(1,018,973)
Transaction costs on new borrowings capitalised	(5,768)	(18,788)
Amortisation of transaction costs, premium and discounts during the year	2,841	(10,281)
Exchange rate adjustments	<u>(44,826)</u>	<u>(3,149)</u>
Balance at end of year	<u>3,491,038</u>	<u>3,247,159</u>

Details of major borrowings outstanding as at 31 December 2021 are as follow:

Company**Facility 1 - \$1 billion**

This is a fixed rate 12-year bond ending in January 2023 and comprises two series. Interest is charged at 7.975% per annum and is paid semi-annually. Series 1 principal repayments commenced on 27 July 2011 by 7 equal half-yearly instalments of \$3,375,000, 16 equal half-yearly instalments of \$18,750,000 and a final balloon instalment of \$576,375,000. Series 2 principal repayments commenced 27 January 2012 by 6 equal half-yearly instalments of \$375,000, 16 equal half-yearly instalments of \$2,083,333 and a final balloon instalment of \$64,416,667.

Facility 2 - \$1.02 billion

This is a secured fixed rate 5-year bond ending in December 2025. Interest is charged at 5% per annum and is paid semi-annually. The principal is payable at maturity.

Facility 3 - \$880 million

This is a secured fixed rate 6-year bond ending in December 2027. Interest is charged at 5% per annum and is paid semi-annually. The principal is payable at maturity.

Facility 4 - J\$13.4 billion

This is an unsecured fixed rate bond comprising of five series where interest is payable quarterly and principal is payable at maturity. Series A interest is charged at 5.750% ending in September 2022, Series B interest is charged at 6.500% ending in September 2025, Series C interest is charged at 6.750% ending in September 2026, Series D interest is charged at 7.000% ending in September 2027 and Series E interest is charged at 8.750% ending in September 2030.

Facilities 1, 2 and 3 are secured by a debenture creating a charge over the fixed and floating assets of Guardian Holdings Limited.

Subsidiary**Loan 1 - US\$40 million**

This is an unsecured fixed rate 5-year loan ending in June 2026. Interest is charged at 3.75% and is payable semi-annually. The principal is payable at maturity. Several of the Group's subsidiaries are guarantors on this loan.

23. Investment contract liabilities

2021
\$'000

2020
\$'000

The movements in the liabilities arising from investment contracts are summarised below:

Balance at beginning of year	2,696,558	2,788,681
Premiums received	340,035	463,073
Fees deducted from account balances	(15,883)	(17,394)
Account balances paid on surrender and other terminations in the year	(372,800)	(394,058)
Investment contract benefits increase/(decrease)	94,125	(19,916)
Other movements	7,406	(16,814)
Exchange rate adjustments	<u>(103,782)</u>	<u>(107,014)</u>
Balance at end of year	<u>2,645,659</u>	<u>2,696,558</u>

Investment contract liabilities carry floating rates of interest and therefore the carrying amounts approximate their fair values.

24. Third party interests in mutual funds

Balance at beginning of year	1,301,361	1,237,709
Share of net income	24,052	18,784
Unrealised losses	(44,182)	(16,805)
Net change in mutual fund holder balances	340,181	79,831
Distributions	<u>(22,000)</u>	<u>(18,158)</u>
Balance at end of year	<u>1,599,412</u>	<u>1,301,361</u>

25. Post-retirement medical benefit obligations

The amounts recognised in the consolidated statement of financial position are as follows:

Present value of obligations	<u>123,191</u>	<u>131,425</u>
------------------------------	----------------	----------------

The amount in the consolidated statement of income is made up as follows:

Interest cost	5,158	5,531
Current service cost	<u>2,229</u>	<u>2,495</u>
Cost for the year (Note 36)	<u>7,387</u>	<u>8,026</u>

The movement in the liability is as follows:

Balance at beginning of year	131,425	134,605
Remeasurement of obligation (actuarial losses)	(10,648)	(6,792)
Employer contributions	(4,919)	(4,330)
Expense as per above	7,387	8,026
Exchange rate adjustments	<u>(54)</u>	<u>(84)</u>
Balance at end of year	<u>123,191</u>	<u>131,425</u>

Expressed in Trinidad and Tobago Dollars

(Continued)

25. Post retirement medical benefit obligation (continued)

	2021	2020
The principal actuarial assumptions used were as follows:		
Discount rate	2.9% - 8.0%	2.6% - 9.0%
Healthcare cost escalation	2.0% - 8.0%	2.0% - 9.0%
Retiree premium escalation:		
Existing retirees	0.0% - 5.6%	0.0% - 4.8%
Future retirees	0.0% - 5.6%	0.0% - 4.8%
Pre-retirement mortality	NIS2012	NIS2012
Post-retirement mortality	GAM94	GAM94

A quantitative sensitivity analysis for significant assumptions as at 31 December 2021 is shown below:

	Impact on the obligation	
	Increase	Decrease
	\$'000	\$'000
1% increase/decrease in discount rate	(17,243)	21,967
1% increase/decrease in medical cost trend rate	20,125	(16,109)

Expected contributions to post-employment benefit plans for the year ending 31 December 2022 are \$4,979,000.

26. Other liabilities

	2021	2020
	\$'000	\$'000
Deposits and premiums received in advance	155,549	125,147
Amount due to reinsurers	427,191	303,142
Accounts payable and accruals	935,699	924,860
	<u>1,518,439</u>	<u>1,353,149</u>

The carrying amounts of other liabilities approximate their fair value.

27. Net premium income

(a) Insurance premium income		
Long-term insurance contracts	2,976,770	2,636,064
Short-term insurance contracts:		
- premiums receivable	4,053,555	3,920,467
- change in unearned premium provision	(23,412)	(105,711)
	<u>7,006,913</u>	<u>6,450,820</u>
(b) Insurance premium ceded to reinsurers		
Long-term reinsurance contracts	(101,052)	(100,064)
Short-term reinsurance contracts:		
- premiums payable	(2,302,980)	(2,074,807)
- change in unearned premium provision	63,128	71,549
	<u>(2,340,904)</u>	<u>(2,103,322)</u>

	<u>(1,223)</u>	<u>(5,079)</u>

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

Expressed in Trinidad and Tobago Dollars
(Continued)

42. Fair value measurement (continued)

Total unrealised gains/(losses) for the period included in consolidated statement of income for assets and liabilities held at end of year:

	2021 \$'000	2020 \$'000
Assets measured at fair value:		
Investment properties	40,325	(35,166)
Investment securities:		
Equity securities	64,620	17,223
Other	(175)	(444)
	<u>104,770</u>	<u>(18,387)</u>

For properties classified as level 3, an increase/decrease in the discount rates or capitalisation rates, will result in a decrease/increase in the property values.

The Group's equity securities classified as level 3 would increase/decrease in value by \$15,379,000 (2020: \$10,206,000) should there be a 5% increase/decrease in value.

The Series G Government of Barbados debt securities classified as level 3 were valued using a yield of 6.99% (2020: 6.99%). A 1% increase/decrease in this yield would result in a decrease/increase in the fair value of these assets of \$14,904,000 and \$18,450,000 respectively (2020: \$13,221,000 and \$16,756,000).

The following table provides the fair value measurement of the Group's assets and liabilities that are not measured at fair value in the consolidated statement of financial position but whose fair values are disclosed in the notes to the accounts.

	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total fair value \$'000
At 31 December 2021

Other Countries	802,743	746,157	845,073	923,141
	<u>6,989,261</u>	<u>5,932,168</u>	<u>3,617,550</u>	<u>3,641,598</u>

The total revenue information above consists of net underwriting revenue, investment income, net realised gains/losses, net fair value gains/losses, fee income, other income and commission income from brokerage activities. Revenue is based on locations of the customer and there are no transactions with a single customer that amount to more than 10% of total revenue.

Non-current assets for this purpose consist of property, plant and equipment, right-of-use assets, investment properties, intangible assets, investment in associated companies and properties for development and sale.

44. Contingent liabilities**Legal proceedings**

Group companies are defendants and plaintiffs in various legal actions. In the opinion of the Directors, after taking legal advice, the outcome of such actions will not give rise to any material loss.

45. Commitments**Capital commitments**

As at the year end, contracts and agreements have been entered into in respect of a property development project, renovations of a property and upgrade of an insurance system. The commitments not recognised in these consolidated financial statements are as follows:

	2021 \$'000	2020 \$'000
Property development	25,154	72,797
Property renovations	6,287	4,843
Intangibles asset - insurance system upgrade	<u>24,605</u>	<u>38,196</u>
	<u>56,046</u>	<u>115,836</u>
Credit commitments		
Loan commitments not yet disbursed by the Group	<u>130,587</u>	<u>45,291</u>

46. Acquisitions

Acquisitions during 2020

During 2020, the Group acquired an insurance brokerage company, to further expand its brokerage activities, and an insurance portfolio. Details of these acquisitions are provided below.

Acquisition of Financiële Dienstverlening Snel & Partners B.V.

On 11 August 2020, the Group acquired 100% of the shares of Financiële Dienstverlening Snel & Partners B.V. ("S&P") through its subsidiary Thoma Exploitatie B.V., for consideration of €2,719,000 (TT\$23,443,000). S&P is an insurance brokerage firm incorporated under the laws of the Netherlands.

The fair value and gross amount of receivables acquired was TT\$111,000. None of the receivables has been impaired and it is expected that the full contractual amounts can be collected.

During 2020, the fair valuation of the identifiable assets and liabilities acquired was completed and are shown in the table below.

	\$'000
Identifiable assets acquired and liabilities assumed:	
Customer-related intangibles (Note 8)	11,653
Other assets	2,187
Deferred tax liability (Note 14)	(2,915)
Other liabilities	(77)
	<hr/>
Identifiable net assets acquired	10,848
Goodwill (Note 8)	12,595
	<hr/>
Total consideration	23,443

	<u>503</u>	<u>503</u>

There was no provision for doubtful debts at the reporting date and no bad debt expense in the year (2020: Nil).

Financial assets of key associates comprise multiple corporate bonds plus interest receivable and preference shares issued by RGM to the Group. The preference shares held by the Group are cumulative, non-convertible and redeemable. The corporate bonds carry fixed interest rates and principal and interest are payable semi-annually. All bonds are secured by mortgages on various properties.

Financial assets of other related parties comprise debt, equity and other investments issued by entities controlled by related parties, in the ordinary course of business.

Borrowings from related parties consist of an affiliated company's participation in Series A, B, C and D of the Group's J\$13.4 billion bond. Details of the bond are disclosed in Note 22.

Loans to key management and other related parties of the Group are secured and settlement occurs in cash. The details of the loan advanced to CHPS are disclosed in Note 12.

48. Assets under management

Assets under management, which are not beneficially owned by the Group, but which the Group manages on behalf of investors are listed below:

	Carrying Amount	
	2021 \$'000	2020 \$'000
Amounts not included in the consolidated statement of financial position		
Cash and short-term investments	216,893	362,613
Investments	4,268,948	3,830,846
Interest and other receivables	81,657	71,698
	<u>4,567,498</u>	<u>4,265,157</u>

49. Pledged assets

The Group has deposited certain assets with the regulatory authorities in the countries in which it is authorised to conduct business as security for its policyholders. The type and values of these assets are in accordance with the legal requirements of the countries concerned. The carrying value of pledged assets is:

	2021 \$'000	2020 \$'000
Statutory deposits/funds	<u>438,111</u>	<u>10,880,616</u>

The Trinidad and Tobago Insurance Act 2018 was proclaimed with effect from 1 January 2021 and replaced the Insurance Act 1980. The new Act no longer requires the Trinidad and Tobago insurance entities to pledge qualifying assets with the Central Bank of Trinidad and Tobago ('CBTT') as security for its local policyholders, but instead requires the insurance entities to maintain adequate capital and appropriate forms of liquidity for their operations. The assets pledged by the Group's Trinidad and Tobago insurance subsidiaries as at the end of 2020 with CBTT were released during 2021.
