Chairman’s Report to the Shareholders

First Quarter Ended March 31st, 2022

Dear Shareholders,

On behalf of the board of directors, I am pleased to present the unaudited financial result of MPC Caribbean Clean Energy Limited (**Company or MPCCEL**) for the first quarter ended March 31st, 2022.

First Quarter 2022 in review

In the first quarter of the year, the commercial and technical development of the Company's underlying assets were within the expected range. The weather conditions have had a negative impact on revenues due to lower electrical energy production than initially forecasted, which has been reflected in the financial results. Technically, there was a high system availability.

Portfolio Highlights

KPI	Q1 2022
EBITDA	USD 2,206,018
Energy Output Variation ¹	-1.95 %
Weighted Average Availability ²	98.52%

The asset performance for Q1 2022 was as follows:

Paradise Park | Solar Park | Jamaica

The solar park in Jamaica shows an underperformance of 3.65%, which is also reflected in the financial results. Total operating expenditure (OPEX) was above the budget by 10.48% and revenue was slightly higher by 0.04%. This is due to technical malfunctions in the main components, in this case, the medium-voltage transformers, nevertheless, a long-term solution has been identified and is currently under implementation.

As a result, the EBITDA was 2.69% below the forecast values, however, on the positive aspect, the technical availability of the solar park was 0.25% above the expected level.

Tilawind | Wind Farm | Costa Rica

The wind farm has also had to contend with lower wind levels, resulting in lower production of electrical output. Due to the lower production of the wind turbines and the planned blade repairs, the OPEX were strictly maintained and therefore, the total amount was 46.33% below budget.

¹ Note: The Energy Output Variation is calculated as an accumulated difference of the actual generated energy (kWh) and the forecast (P50) energy output for the relevant period. P50 is essentially a statistical level of confidence and basis for our predicted energy generation.

² Note: Availability is defined as the percentage of time during a month that the wind turbine is operations-ready and available to produce power. This is independent of whether or not enough wind is available for the wind turbine to produce power. In regards to solar parks, it is the proportion of time that the is operations-ready and usable to produce power over a specified time period.

Please note that the productive irradiation hours and wind speeds are depending on short (daily), mid (monthly) and long-term (annual and multi-year) weather patterns. Therefore, the high degree of variability of revenue and cost patterns are shown and revenue and costs are not equally distributed throughout the year. Subsequently, the KPI are most meaningful in an annual comparison or with previous years’ quarter.

The operational performance mentioned was slightly below expectations by 0.32%, with availability being 1.96% higher than forecast.

San Isidro | Solar Park | El Salvador

The energy price per kWh was well above the budget in Q1 2022, which resulted in higher sales of electricity by 47.58%. The OPEX amount was 162.21% above the forecast and the reason to this is the activation of the O&M contract and the release of 2021 related costs to the contractor after the achievement of important technical milestones. Other maintenance measures within the warranty period are currently being checked, but no unplanned maintenance measures were recorded in the reporting period, which is also reflected in an availability of 0.51% above the target. The resulting EBITDA was 5.70% above the forecast as a result of the earnings components.

Outlook

The acquisition of the solar park Monte Plata, consisting of the operational project Monte Plata phase 1 (33.4 MWp) and the plant expansion with phase 2 (42.2 MWp), in the Dominican Republic is expected to be completed in the second quarter. After the conclusion of the financial closing with the senior lenders FMO and DEG, the prepared integration of all management processes and ESG standards will take place.

The expansion project of the asset has been advanced, so that the commissioning of the expanded solar park with a total installed expanded capacity of 75.6 MWp can be expected for the second quarter of 2023. An approximate yearly energy output for phase one and two is expected to be 49,048 MWh and 66,803 MWh respectively and pro-rated annual revenues of approximately USD 2.7 million.

In the existing portfolio, it is worth to mention that further blade repair measures at wind farm in Costa Rica are planned over the period of June to end of September.. In order to prevent any long-term impairments in the operative performance, these repair measures are necessary and will then be carried out during low wind season in order to avoid negative effect on commercial performance of the asset.

In the countries of our geographic presence, including Jamaica, Costa Rica, El Salvador and the Dominican Republic, no extreme weather conditions from 'El Niño' are expected for the year 2022. This leads to the conclusion that the external conditions observed in Q1 are continued in Q2 2022.

As the year advances, MPC Caribbean Clean Energy Limited will further expand its competitive growth with the integration of the Monte Plata assets and strategically align the asset portfolio to meet Shareholders' expectations.

MPC CARIBBEAN CLEAN ENERGY LIMITED

Notes to the Financial Statements

For the period ended March 31, 2022

(Expressed in United States dollars)

1. General Information

MPC Caribbean Clean Energy Limited (the "Company") was incorporated on November 8, 2017, under the laws of Barbados as an International Business Company as defined by the International Business Companies Act 1991 - 24. With effect from January 1, 2019, the International Business Companies Act 1991-24 was repealed. The Company continues as a Regular Business Company under the Companies Act Cap. 308. The Company principally engages in investment holding.

The Company's registered number is:- 42056

The Company's registered office address is:-

Suite 1, Ground Floor
The Financial Services Centre
Bishop's Court Hill
St. Michael, Barbados, BB 140004

The Company's shares were listed on the Main Market of the Jamaican Stock Exchange and Trinidad Stock Exchange in January 2019.

2. Summary of Significant Accounting Policies

The principal accounting policies applied in the preparation of these interim financial statements are as compared with the most recent annual audited financial statements.

3. Basis of Preparation

The unaudited interim financial statements have been prepared in accordance with International Accounting Standards 34 - Interim Financial Statements. The interim financial statements should be read in conjunction with the annual financial statements for the year ended December 31, 2021, which have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

The unaudited interim financial statements are prepared under the historical cost convention and are expressed in United States Dollars (USD) which is the functional currency of the Company.

4. Loss per share

Earnings per share is calculated by dividing the profit or loss for the period by the weighted average number of ordinary shares in issue over that period.

	Period ended 31-Mar-22	Period ended 31-Mar-21
Net loss attributable to ordinary shareholders	(29,133)	(80,702)
Weighted average number of shares	21,666,542	21,666,542
Loss per share	(0.00)	(0.00)

MPC CARIBBEAN CLEAN ENERGY LIMITED

Notes to the Financial Statements

For the period ended March 31, 2022

(Expressed in United States dollars)

4. Loss per share (Continued)

On November 8, 2019, the company opened a Rights Issuance where existing shareholders were given the option to acquire two new shares for every share that they originally owned. All the non-exercised rights were made available to new investors to purchase.

The issuance period closed on January 10, 2020. All applications were satisfied in full and 10,242,382 new Class B shares were issued and allotted to applicants in both the markets of Jamaica and Trinidad and Tobago, increasing the total Class B shares issued to 21,666,542. On July 7, 2020, the corporate and AML requirements were completed and on July 13, 2020, the raised funds of USD 9,292,378.58, net of underwriting costs and administrative expenses, were invested into MPC Caribbean Clean Energy Fund LLC.

5. Related Party Balances and Transactions

The following transactions were carried out with related parties:

Due to related party

The loan from the related party is unsecured, interest free, has no stated terms of repayment and includes: (i) Payments of fees by MPC Renewable Energies GmbH on behalf of the Company during the period ended March 31, 2021 and the related balances payable by the Company to MPC Renewable Energies GmbH as at March 31, 2022, and (ii) Directors fees (per agreements with Directors).

The carrying value of the 'Due to related party' is as follows:

	Quarter ended	Quarter ended
	31-Mar-22	31-Mar-21
At January 1	21,654	21,654
Related party payments of expenses	-	-
Reimbursement payments to related party	-	-
At March 31	<u>21,654</u>	<u>21,654</u>

6. Long-term convertible promissory note payable

On November 6, 2020, MPC Caribbean Clean Energy Limited issued a convertible promissory note to RBC Trust (Trinidad & Tobago) Limited, (the 'Holder'), in the amount of USD 10,000,000. This convertible promissory note is non-interest bearing but entitles the Holder to distributions of profits of the Company, from and including the issuance date. The Holder of the note will be entitled to receive distributions of profits when dividends are declared, as if it were the holder of one Class B share for every \$1 of the principal sum of the note held but limited to a maximum return of eight percent (8%) per annum. All payments of distributions in respect of this note shall be payable in same day funds to the Holder on the dates and times upon which dividends are declared and payable in respect of the Class B shares of the Company by the Directors of the Company.

At maturity, March 31, 2023, if the principal sum of the note is unpaid in cash on that date or earlier, the note will be converted into Class B shares of the Company at the rate of one Class B share for every one United States dollar (USD1) of the principal sum of the note held by the Holder. Such conversion will be subject to approval by a majority of the shareholders of the Company at a general meeting of the shareholders.
