General Accident Insurance Company Jamaica Limited Report to Stockholders For the quarter ended 31 December 2022

Investment Performance

General Accident's consolidated investment income for the year ended December 31, 2022 was \$361.4 million compared to prior year of \$226.5 million. We continue to seek to maximise the returns on our investment portfolio, therefore going into the new year we expect increases in our consolidated investment income over the short to medium term.

Summary

We continue to enjoy excellent growth in premium income across the region, primarily due to increase penetration of the broker markets in Barbados and Trinidad. Although we have not achieved the profitability targets in all regions, we remain committed to our growth plans and are confident that we will meet our strategic objectives.

As of December 2022, General Accident remains in compliance with the capital adequacy and liquidity metrics prescribed by the Financial Services Commission, in Jamaica, Barbados and Trinidad.

We remain focused on cementing our market leadership in Jamaica, growing our operations in Trinidad and Barbados, and placing technology at the core of our operations.

2. Summary of Accounting Policies

(a) Basis of preparation and compliance

These unaudited interim financial statements have been prepared in accordance and comply with International Financial Reporting Standards (IFRS) and their interpretations issued by the International Accounting Standards Board (IASB), and the relevant provisions of the Companies Act.

The interim financial statements have been prepared under the historical cost convention as modified by the revaluation of certain financial assets carried at fair value.

The accounting policies and method of computation are consistent with the audited financial statements for year ended December 31, 2021. These financial statements are expressed in Jamaican dollars which is the currency of the primary economic environment in which the company operates.

(b) Basis of consolidation

Subsidiaries are all entities (including structured entities) over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. The Group also assesses existence of control where it does not have more than 50% of the voting power but is able to govern the financial and operating policies by virtue of de-facto control. De-facto control may arise in circumstances where the size of the Group's voting rights relative to the size and dispersion of holdings of other shareholders give the Group the power to govern the financial and operating policies, etc.

2. Summary of Accounting Policies (Continued)

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of acquiree's identifiable net assets.

3. Segment Information
